The armies are listed in their order of precedence using the dates they became official within the three previous Warmaster army list sources. Thus Empire through to Dwarfs began in that sequence within the original rulebook (2000), although the Undead were later re-designated as Tomb Kings. Skaven down to Vampire Counts were formalised on the Specialist Games website (2006), although all except Araby had appeared in Warmags (2001 to 2003). Dogs of War to Norse were codified collectively in the Trial Armies supplement (2009), but with Albion, Goblins, Witch Hunters, and Wood Elves also appearing in earlier Warmags. Finally, it should be noted that a number of the armies and variants within the Trial Armies supplement were not transferred by the committee to this book.

Picking the Army

This section of the Warmaster Armies book explains how to choose equally matched armies to take part in a battle and updates the original section in the main rulebook.

In theory there is no reason why forces have to be equal, but most players prefer to fight battles between armies that are, notionally at least, the same fighting value. To facilitate this, all units are allocated a points value that reflects their worth in a typical battle.

As a matter of principle the points values of individual units are considered in proportion to the army as a whole so that troops of comparable fighting value may be a few points more or a few points less in some armies. This is intentional. In these cases the marginal difference in points is done to restrict or increase the choices available to the player.

THE ARMY

Army lists and rules are provided for 25 Warmaster armies. All armies are chosen in the same fashion using the appropriate list. The army lists are included on the following pages and you may wish to skip forward to your favoured army as you read through the rest of this section.

ARMY SIZE

Both sides select troops and characters up to the same maximum points value. Three 'standard' sized battles are considered here. Smaller and larger battles, or battles with intermediate points values, can also be arranged as discussed later.

Small battle	1000 points per side
Medium battle	2000 points per side
Large battle	3000 points per side

A small battle is ideal for beginners or for demonstrating the game but the tactical possibilities are limited. Small battles are more susceptible to the fortunes of dice rolling than are large battles. Medium sized battles are considered the usual kind and will typically last for a whole evening's play - although experienced players have been known to cram four or more such battles into a single day.

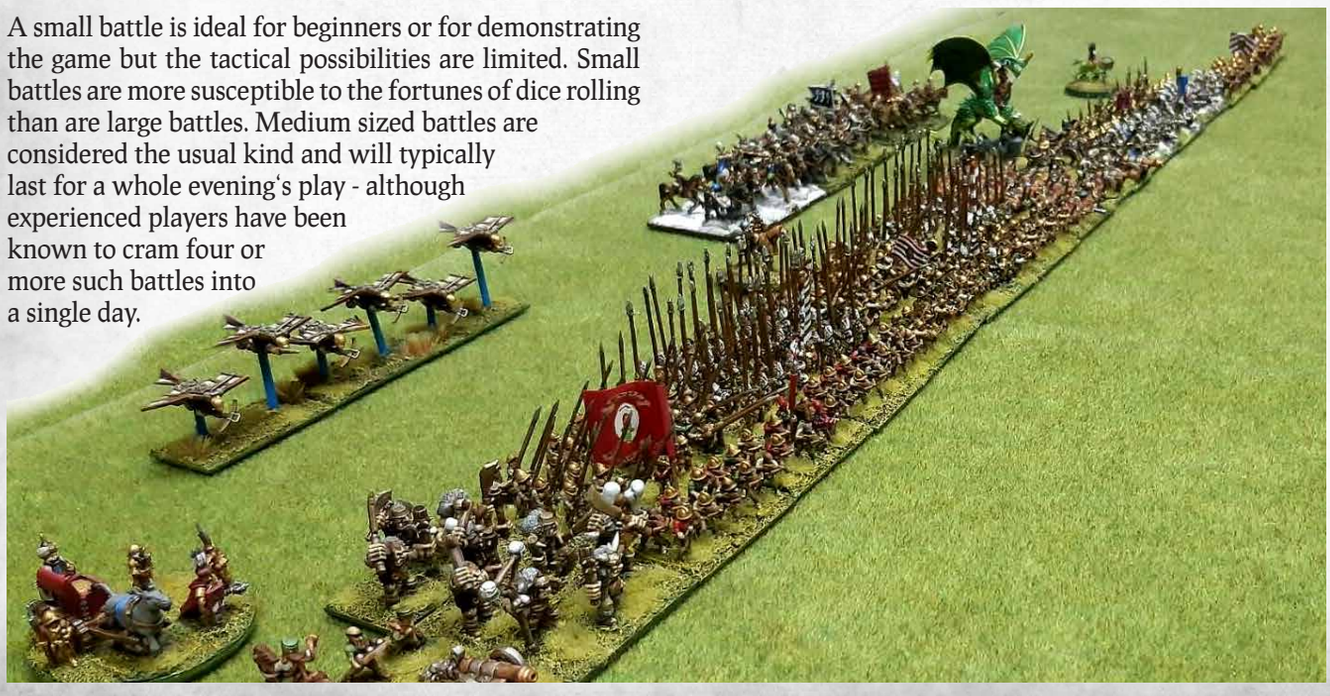
Large battles require more leisure but offer a varied game that better reflects the subtleties of the command system. Substantially bigger battles can be fought with even more points per side if players wish. Beware that a very large game can take an entire day or even several days to complete. There is no real maximum limit beyond the number of models and the size of the gaming area available. 10,000 points or more is certainly feasible. With very large armies it helps to have additional players to help move troops and roll dice.

Note that the army size indicates the maximum points value that can be spent. Armies can have fewer points than this value but cannot have more. Often it is impossible to spend the odd few points so a medium sized '2000 point' army might have only 1995 points of models. Such an army is still a 2000 point army as far as we are concerned. It is the maximum permitted value that determines the army size not the actual points spent.

The army lists are designed to work with armies of round thousands of points (1000, 2000, 3000, etc). However, it is also possible to choose armies of other sizes - say 1500 or 750. This is slightly less convenient but useful if players are still building their armies and want to use units as they are purchased. This is explained under Selecting the Army.

ARMY LISTS

Begin with the army list for your chosen army. The different lists include all the units available for each side together with their game stats, points values and special rules where appropriate. Most of this information is condensed into a single stat line for each unit. Any additional information is noted as special rules after the army list itself. Stat lines are presented as follows:



TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Halberdiers	Infantry	3	3	6+	-	3	45	2/-	-

Type. This describes the type of troop unit or character stand: Infantry, Cavalry, Monster, Artillery, Machine, Chariot, General, Wizard or Hero. Mounts for characters are sometimes optional and are included as a separate line as Monstrous Mount or Chariot Mount.

Attack. The basic number of dice rolled in combat by each stand in the unit.

Hits. The number of hits the unit can suffer before one stand is removed.

Armour. The score required to nullify a hit struck on the unit if it has armour (3+, 4+, 5+ or 6+). A unit with no armour has a value of 0.

Command. The Command value of a character.

Unit Size. The number of stands in a unit.

Points per Unit. The points value of a unit or character of that type.

Min/Max. This defines the minimum and maximum number of units of that type which an army must include per 1000 points of army size. A dash indicates there is no restriction.

SELECTING THE ARMY

Choose units and characters to make up the army. You can choose up to a maximum total value appropriate to the size of game. For example, High Elf Spearmen are 60 points per unit so 5 such units are worth 300 points.

Players are not entirely free to select forces as they want. Some units must always be included and some other units can only be included in limited numbers. These restrictions are indicated by the minimum/maximum column (min/max) in the army lists. The min/max value consists of two numbers separated by a slash – for example 1 / 2. The first number shows the minimum number of that unit/character the army must include for every 1000 points of army size. The second number shows the maximum number of that unit/character the army can include for every 1000 points of army size.

For example, in a Bretonnian army, Squires are min/max 1/4. This means that in a 1000 point army the player must include at least 1 unit but cannot include more than 4. In a 2000 point army the minimum is therefore 2 and the maximum 8, in a 3000 point army minimum 3 maximum 12, and so on.

If an entry includes a dash instead of a number this means no minimum or maximum applies. The player can chose as few or as many of this troop types as he wishes within the limitations of the points available. For example, –/2 means that in a 1000 points army there is no minimum and the maximum is 2, while 1/– means there is a minimum of 1 and no maximum.

All armies must include a single General. An army can never include more than one General no matter what its size. The Min/Max column is given as 1 to show this.

You may have decided your armies will be chosen to 1500 points or some other odd number. In this case determine min/max values by rounding your actual army size down to the next full 1000's. So, a 1500 point army is selected using the minimums and maximums for a 1000 point army, a 2250 point army is the same as a 2000 and so on.

If your chosen army size is less than 1000 points then use the 1000 point maximums but ignore the minimums. Very small games can be a useful exercise for learning the rules but be warned that the game does not work particularly well with extremely small forces and battles may feel bewilderingly rapid.

The value of any permitted magic items is added to that of the unit or character that carries them. Magic items must be allocated to specific characters and a separate note made. This will increase the points value of the unit or character appropriately, and the total cost must be taken into account when working out victory points. See Magic in the rulebook p.76 or a Magic Items Overview on p.88 in this book.

Empire

The Empire is by far the largest and most powerful of the human nations of the Old World. It stretches from the Grey Mountains in the west to the Worlds Edge Mountains and the borders of Kislev in the east. This vast nation is divided into many separate principalities or states each of which is something akin to an entire and independent land in its own right. Throughout much of the history of The Empire these states have fought amongst themselves. Rival dynasties have vied for power, alliances have been made and broken, and only rarely has a single claimant risen to control the entire land. The Empire of today is almost wholly united under the Prince of Altdorf the Elector of the Reikland - hereditary ruler of the western principality of the Reikland. Only the great sea-port of Marienburg in the Wasteland retains independence under the leadership of its powerful and wealthy mercantile community.

The armies of The Empire are raised and controlled by its separate states. The Emperor's army is nothing more than the army of the Reikland - although as the Reikland is the richest and most populous part of the Empire it also has by far the largest and best equipped army.

The Emperor's position is that of first amongst equals rather than absolute monarch. Although in practice rule of the Empire often passes from father to son, in principle the leaders of the various states choose the Emperor from amongst their own number. The Emperor can, in theory, call upon the other Electors to supply troops for the Emperor's campaigns. By the same token, individual Electors can call upon the Emperor or neighbouring states to send reinforcements in times of war. Jealousy, rivalry and politicking mean that some states inevitably support or oppose others. Minor territorial disputes or claims over tolls and access rights often lead to direct confrontation even with the Empire.

The armies of the Empire are committed to defending its borders and rarely mount lengthy campaigns beyond them. A long-standing alliance between the Emperor and the Tzars of Kislev has occasionally taken armies far to the north to fight against intrusions of Chaos. Such armies do not always return. The chief enemies of the Empire lie within its own borders - for the land is sparsely settled and much of the forest and mountain is little more than wilderness infested with greenskins and beastmen. The mountains to the south and east are also home to subterranean-living goblins as well as to skaven. Those states that adjoin these borderlands maintain large mobile armies to see off the inevitable raiding parties that issue from the mountain passes every spring.

Empire Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Halberdiers	Infantry	3	3	6+	-	3	45	2/-	-
Crossbowmen	Infantry	3/1	3	0	-	3	55	2/-	-
Handgunners	Infantry	3/1	3	0	-	3	65	-/3	*1
Flagellants	Infantry	5	3	0	-	3	70	-/1	*2
Skirmishers	Infantry	4	3	0 or 6+	-	+1	20	-/-	*3
Knights	Cavalry	3	3	4+	-	3	110	-/-	-
Pistoliers	Cavalry	3/1	3	5+	-	3	95	-/4	*4
Helblaster	Artillery	1/8-4-2	2	0	-	1	50	-/1	*5
Cannon	Artillery	1/2+ bounce	2	0	-	2	85	-/1	-
Steam Tank	Machine	3/3	4	3+	-	1	130	-/1	*6
General	General	+2	-	-	9	1	125	1	-
Hero	Hero	+1	-	-	8	1	80	-/2	-
Wizard	Wizard	+0	-	-	7	1	45	-/1	-
Griffon	Monstrous Mount	+2	-	-	-	-	+80	-/1	*7
War Altar	Chariot Mount	+2	-	-	-	-	+15	-/1	*8

Special Rules

1. Handgunners. Count enemy Armour values as one worse than normal when shot by a handgun. So an Armour value of 3+ counts as 4+, 4+ as 5+, and 5+ as 6+, whilst an Armour value of 6+ can't save against a handgun. One unit of Crossbowmen per full 1000 points can be replaced by Handgunners (including the 10pts extra in price) while still counting for the Crossbowmen min/max value. Note that this unit also counts for the min/max value of Handgunners.

2. Flagellants. So keen are they to meet their maker that a unit of Flagellants will always use its initiative to charge an enemy if possible and can't be given orders instead. They'll never use their initiative to evade. They can't be driven back by shooting and do not roll for drive backs. If victorious in combat they must pursue or advance where possible. Flagellants are unaffected by enemies that cause terror in combat, so they do not suffer the usual -1 Attack modifier.

3. Skirmishers. Skirmisher stands are not deployed as independent units. Instead, any infantry unit apart from Flagellants may add one stand of Skirmishers. This brings the size of the unit to 4 stands - 3 regular stands plus the Skirmisher stand.

Skirmishers always have the same Armour value as the rest of their unit. They fight as part of their unit and can be removed as a unit casualty if the player wishes.

Skirmisher casualties never count for Command penalties. Skirmisher stands never cause the parent unit to be in Irregular Formation no matter how they are placed.

4. Pistoliers. Pistoliers have a shooting range of only 15cm however they have 360° vision - i.e. stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

5. Helblaster. The Helblaster is a primitive type of crank-driven and unreliable machine gun. It has maximum range of 30cm. Its attacks value varies according to range: the closer the range the more deadly it becomes.

Range	01-10cm	11-20cm	21-30cm
Attack	8	4	2

Targets struck by a Helblaster count their Armour value as one worse than normal - so 3+ counts as 4+, 4+ as 5+, whilst 6+ is ignored. When shooting with a Helblaster roll to hit as normal but if any 1s are rolled count them up and resolve the effect before counting.

No of 1s	Result
1, 2	Fizzle. Despite scary noises the weapon is still functional. Work out the attacks as usual.
3	Misfire. The gun fails to go off - no shots at all hit this turn. Disregard all hits this turn.
4+	Ka-boom! The weapon explodes destroying itself and mortally surprising its crew. The Helblaster stand is removed as a casualty. No hits are struck against the enemy unless the exploding Helblaster is shooting at a charging foe, in which case 6 hits are automatically inflicted. Make Armour saves as for ordinary Helblaster hits.

6. Steam Tank. The Steam Tank forms a unit on its own, it moves up to 20cm, and must be given its own orders. The Steam Tank cannot be given a brigade order with other units, not even with other Steams Tanks. A character cannot join with a Steam Tank. A Steam Tank has 360° vision - i.e. it can draw line of sight from all edges of its stand for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy. Steam Tank shooting attacks have a range of 30cm. A Steam Tank therefore shoots to its front, side or rear against the closest enemy target.

Count enemy armour values as one worse than normal when shot by a Steam Tank. So, for example, an armour value of 3+ counts as 4+, 5+ counts as 6+, and 6+ can't save against a Steam Tank. A Steam Tank can shoot at charging enemy.

Because of its exceptionally heavy armour plating, a Steam Tank always counts as defended - so a 5 or 6 is normally required to inflict a hit from shooting or in combat. The Steam Tank fights combat like any other unit. Steam Tanks cannot be driven back or routed by shooting.

If the player attempts to issue an order to a Steam Tank and rolls double six then the order is failed as usual and the machine does not move. Ignore the usual Blunder chart for Heroes and Wizards. Roll on the following Malfunction chart. Note that although a General cannot blunder he must still roll for malfunctions.

1. **Destroyed.** The Steam Tank grinds to a halt rupturing steam and noxious gasses. Remove the Steam Tank as a casualty.
2. **Broken Down.** The Steam Tank's drive has broken. It does not move further this turn and cannot move in future turns. Should it be obliged to move for any reason it is destroyed. Otherwise, the Steam Tank can continue to shoot and fight as normal.
3. **Stuck.** The Steam tank does not move further this turn. It cannot shoot this turn. Otherwise it is unaffected and can move in future turns as normal.
4. **Commander Slain.** The Steam Tank does not move further this turn. It can move in future turns but suffers a command penalty of -1 for the remainder of the game. The Steam Tank can shoot as normal.
5. **Momentary Halt.** The Steam Tank cannot move further this turn but is otherwise unaffected.
6. **Steam Overload.** The Steam Tank cannot move further this turn but can shoot with double the usual number of Attacks (6) to represent steam being uncontrollably diverted into weaponry.

7. Griffons. Generals, Wizards and Heroes can ride Griffons. The Griffon can fly increasing its rider's Movement from 60cm to 100cm. It adds +2 Attacks to those of its rider. A unit that includes a Griffon rider causes terror in its enemies (and one might imagine a great deal of nervousness amongst its own ranks).

8. War Altar. A Wizard may be mounted on a War Altar. A Wizard with a War Altar suffers a movement reduction to 30cm. The army can only ever include one War Altar, and it can only be included if there is at least 1 unit of Flagellants in the army. The War Altar adds +2 attacks to the Wizard and can be used to add +1 to the Wizard's dice roll to cast a spell once per battle. The player must announce that the War Altar's spell bonus is being used before rolling the dice to determine if the spell is cast.

Empire Spells

BALL OF FLAME

5+ to cast.....Range 30cm

A ball of flame shoots form the Wizard's outstretched arm burning all in its path.

Draw an imaginary line 30cm long from the Wizard's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily affect several units and will affect all units that fall beneath the line (including your own). Unengaged units can be driven back by a Ball of Flame as with ordinary shooting (even including friends). Engaged units cannot be driven back by the Ball of Flame but carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

VOICE OF COMMAND

5+ to cast.....Range 30cm

The Wizard's voice booms out across the battlefield directing troops above the tumult of combat with the magical Voice of Command.

The spell can be cast on any unengaged friendly unit within range regardless of whether the Wizard can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible.

The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it: they remain where they are.

WEIRD ENCHANTMENT

4+ to cast.....Range 30cm

A weird enchantment forms around the target unit and engulfs it in strange lights, scary nightmares and disorientating special effects.

This spell can be cast on any enemy unit within range regardless of whether the Wizard can see it or not. The spell lasts until the end of the opposing player's following turn.

The unit moves at half pace in all situations: even when charging for example. The unit counts all enemies as terrifying (-1 Attack penalty) even when it is otherwise immune to terror. If the unit would normally cause terror then it ceases to do so and counts all enemies as terrifying just like everyone else. However, if the target is Undead or Daemon it will not count enemies as terrifying although all other penalties apply as described (Undead and Daemons are hard to spook).

TELEPORT

2+ to cast.....Range N/A

With a swirl of his cloak, a crack of thunder and just a hint of maniacal laughter the Wizard vanishes to reappear anywhere on the battlefield.

The Wizard is moved to a new position anywhere on the table. He can leave or join a unit if he wishes, enabling a Wizard to move into or out of combat for example. Once the Wizard has moved he can cast a second spell, but note this must be a different spell and not a further Teleport! Roll to cast the second spell as normal. A Wizard that Teleports successfully can therefore potentially cast two spells that turn.

Tomb Kings

In ages past the land of Khemri was fertile, populous and prosperous thanks to the waters of the Great River of Life whose annual floods irrigated the fields and guaranteed a bountiful harvest. Each city was ruled by a Priest King and for many centuries these omnipotent monarchs lived and died and were buried in tombs constructed by their faithful Liche Priests. The bodies of the Priest Kings, and those of their most faithful troops and retainers, were carefully embalmed and interred with holy spells of immortality to prepare them for the far-off day of re-awakening.

Unfortunately for the Priest Kings of Khemri their dreams of eternal life were to be realised only in the most horrific way. A rebellious Liche Priest called Nagash overthrew the cities of Khemri and made himself ruler of the entire land. Consequently he was driven into exile and eventually murdered. However - this was not the end of Nagash - for he was the greatest Sorcerer of his day if not all of all time - and whilst the Black Pyramid endured Nagash's spirit could always find refuge there. His evil was gradually absorbed into the Black Pyramid and his body reborn in the sorcerous sarcophagus that lay deep within.

Nagash's vengeance upon his enemies was absolute. From deep within the Black Pyramid he worked upon a great spell of death that he eventually cast upon the whole land of Khemri. Consequently a pestilence fell upon the nation and all living things sickened and died so that soon there were none to bury the dead and the cities became nothing but empty tombs. What was alive was now dead, and what was dead was revivified as undead. On that terrible day the rulers of old awoke to the horror that had befallen them. The golden immortality in which they had believed had proven a false dream. The Tomb Kings were mightily angered to discover that they had been treated in this way - and there were a great many of them. Whole dynasties rose as one, ancient rivals and bitter enemies side by side. But most of all their anger was reserved for Nagash. They saw the Black Pyramid and felt the dark winds of sorcery that blew about its shining black walls and understood that they had been betrayed.

From their tombs the Tomb Kings have re-ordered their kingdoms. Their peoples, mostly interred without the benefit of royal magic, are little more than automatons. Undead armies wheel and manoeuvre with ingrained military instinct, continually re-fighting old wars or pursuing new ones amidst the dry deserts. The terrible spell that created them binds them to their land but offers no succour. Those that perish in battle rise each dawn whilst even those that are destroyed entirely, burned to smoke or vaporised by sorcery, live on as spiteful spirits that can be heard in the wailing of the wind and groaning of great stones in the mountains. If the Tomb Kings take any comfort it is only in the recreation of their ancient empires - a shadow of former existence that evokes memories of the lives that they once led.

Tomb King Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Skeletons	Infantry	2	3	6+	-	3	30	2/-	-
Skeleton Bowmen	Infantry	2/1	3	0	-	3	45	2/-	-
Skeleton Cavalry	Cavalry	2	3	5+	-	3	60	-/-	-
Skeletal Chariots	Chariot	3/1	3	5+	-	3	110	-/3	-
Carrion	Monster	2	3	6+	-	3	65	-/1	*1
Bone Giant	Monster	6	4	4+	-	1	110	-/1	*2
Sphinx	Monster	4	6	3+	-	1	135	-/1	*3
Skull Chukka	Artillery	1/3	3	0	-	1	85	-/1	*4
Bone Thrower	Artillery	1/2 + skewer	2	0	-	2	65	-/1	*5
Tomb King	General	+2	-	-	9	1	130	1	*6
Liche Priest	Wizard	+1	-	-	8	1	90	-/2	-
Zombie Dragon	Monstrous Mount	+3	-	-	-	-	+100	-/1	*7
Liche Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*8

Special Rules

ARMY RULES

Undead. Undead units never act on initiative. An Undead unit only moves in the Command phase if given orders (except Carrion who can also home back as noted below).

Undead units are unaffected by the -1 Command penalty for enemy within 20cm.

Undead units are unaffected by the -1 Combat penalty for fighting terrifying troops.

Undead units are unaffected by the Confusion rule - they cannot become confused for any reason.

SPECIAL RULES

1. Carrion. Carrion can fly. Note that Carrion can always return to a character by homing back at the start of the Command phase.

2. Bone Giant. Bone Giants cause terror. When a Tomb King gives an order to a Bone Giant or a brigade that contains a Bone Giant there is a -1 Command penalty. There is no penalty when a Liche Priest gives an order.

3. Sphinx. Because the Sphinx has so many hits (6) we must consider the possibility of hurting the Sphinx and reducing its effectiveness in subsequent turns. Therefore, if a Sphinx has accumulated 4-5 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Sphinx is badly hurt all accumulated hits are discounted and its maximum Hits and Attacks are halved for the rest of the battle (to 3 Hits and 2 Attacks). The Sphinx causes terror.

4. Skull Chukka. The Skull Chukka is a Stone Thrower (see the Rulebook p.75) but with the following additional rule. When a unit is driven back as a result of hits scored by a Skull Chukka, then any dice rolled in respect to those hits will cause Confusion on the roll of 4, 5 or 6 (rather than 6 as normal). Note that if a unit has taken other hits as well it will be necessary to roll the Skull Chukka dice separately. See the Artillery and Machines section of the rulebook for the Stone Thrower rules.

5. Bone Thrower. The Bone Thrower is a Bolt Thrower as described in the Rulebook (p.75).

6. Tomb King. The Tomb King is empowered by the spells cast upon him when buried. He can use this power to increase the Combat Attacks value of all the stands in one unit within 20cm by +1 for the duration of one Combat phase. This ability can only be used once per battle.

7. Zombie Dragon. A Tomb King or Liche Priest can ride a Zombie Dragon. A Dragon can fly increasing its rider's move from 60 to 100cm and it adds +3 Attacks to those of its rider. Zombie Dragons have a special shooting attack - they can belch corrosive breath! This attack can only be used if the Dragon-riding character has joined a unit but is not engaged in combat. A character that has not joined a unit cannot use the Breath attack. The corrosive breath has a range of 20cm. It can be directed against one target as normal and has 3 Attacks worked out in the usual way. The Zombie Dragon is a terrifying creature - a unit that has been joined by a Dragon-riding character causes terror in its enemies.

8. Liche Chariot. A Tomb King or Liche Priest can ride a chariot. A character riding a chariot adds +1 to his Attacks.

RAISE DEAD

5+ to cast.....Range 30cm

At the Wizard's beckoning the mangled corpses that litter the battleground rise from the dead to continue the slaughter.

This spell can be cast upon a combat engagement taking place within 30cm of the Wizard. The spell can be cast regardless of whether the Wizard can see any units in the combat engagement or not. A single combat engagement can only be affected once by this spell in any turn regardless of how many units are involved in the combat. For purposes of deciding whether a combat is eligible as a target, combat engagements are as they appear when the dice to cast the spell is rolled: so it is possible for pursuit or advances to bring two units of raised dead into the same engagement later on.

A Skeleton unit of three stands is created. Each stand in the raised unit must be placed so that its front edge contacts an enemy stand from the targeted engagement, or that it supports a friendly stand from the same engagement, including raised stands. The placement of stands may not split up the engagement into multiple smaller engagements. If raised stands come into contact with unengaged enemy units, those units will join the engagement after the raised unit is placed, similar to incidental contact during pursuit. If it is impossible to position all stands in combat or support then the unit is not deployed and the spell fails. Raised dead do not count as charging in the first round of combat. Raised dead are ignored for working out break point and victory points at the end of the game.

TOUCH OF DEATH

4+ to cast.....Range N/A

The Wizard's enemies crumble to dust as he smites them with the corrupting Touch of Death.

The Wizard can cast this spell if he has joined a unit in combat. The spell can be cast on any single enemy unit that it is touching the unit the Wizard has joined.

The target unit takes three attacks worked out in the usual way. Any hits scored are carried over into the first round of combat and count as having been struck in the first round for purposes of working out combat results.

DOOM AND DESPAIR

4+ to cast.....Range 60cm

A dark cloud of doom and despair settles over the enemy, sapping their courage and dampening their warlike spirit.

This spell can be cast on any enemy unit within range regardless of whether the Wizard can see it or not.

The spell takes effect until the end of the opposing player's next turn.

Whilst the spell lasts the unit cannot charge and if engaged in combat will not pursue or advance. Even units that are otherwise obliged to charge, pursue, or advance will not do so if affected by Doom and Despair. Note that even other Undead are not immune - they are overcome by the ennui of the tomb!

DEATH BOLT

5+ to cast.....Range 30cm

A fearsome bolt of sorcerous lightning flies from the Wizard's outstretched fingertips and strikes an enemy unit.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

The Death Bolt is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by a Death Bolt as with ordinary shooting.

Chaos

The tribes of the northlands are called Marauders by the civilised folk of the south. Their domain stretches across the great steppes and throughout the rocky land of Norsca and encompasses many savage tribes of men. These tribes can be divided into three main groups - the towering flaxen-haired Norse, the raven-haired and dark-skinned Kurgan, and the squat, powerfully built, horse-riding Hung. These peoples together make up the barbarian hordes of the north whose incursions to the south comprise the greatest threat to the civilised nations of the world.

All of these tribes worship the Dark Gods that others call the gods of Chaos but which the north men know under many names and in countless guises. Because they live close to the vast polar source of magic, the influence of magical energy is especially strong amongst them. Its warping power blows strongest close to the pole, and the Marauder tribes live within its domain. When the wind of magic blows hard it brings mutation and change to the people and their animals, strange deformed creatures shamble from the darkness, and daemons walk the land sustained by the magically enriched atmosphere. When the wind blows strongest all life is corrupted, or destroyed, and the northern tribes push south in response driven by what is both the will of the Dark Gods and a howling storm of magical energy.

Battle is a way of life to the hardy warriors of the northlands. They share their land with the most heinous of monsters and when otherwise idle they spend their time fighting each other. They are tough bloodthirsty barbarians at heart, but they are also respectful of the gods who, in their eyes, give them their strength and direct them to glorious conquest. To fight well is to honour the gods and glorify the tribe. Great warriors are taken in death to live amongst the gods and are worshipped as gods themselves. The tribes see themselves as agents of the Dark Gods, destined to triumph over the lesser people of the south, to destroy, sacrifice and ultimately to rule in the name of Chaos.

Although it is commonplace for raiding armies to trouble the lands of Kislev and the northern parts of the Empire, it is rare for the tribes to act in any cohesive way. When that does happen, usually due to an extreme outpouring of magical energy from the north, the whole civilised world is placed in the greatest peril. This has happened several times in the history of the world and most notably during what became known as the Great War against Chaos over two hundred years ago. Only the sudden and dynamic unification of the Empire and the aid of the High Elves of Ulthuan saved the human realms of the Old World at that time, though Kislev was devastated and the city of Praag destroyed.

Chaos Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Chaos Warriors	Infantry	4	4	4+	-	3	140	1/-	-

Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*7

Special Rules

1. Ogres. If an Ogre unit can use its initiative to charge an enemy unit of humans at the start of the Command phase then it must do so. This happens automatically and their commander can do nothing about it. 'Humans' encompasses all 'men' including Chaos Warriors and Marauders, but not Dwarfs, Elves etc.

2. Trolls. When trying to issue an order to a unit of Trolls or to a brigade that contains a unit of Trolls, any Command penalty applied for distance between the character and the Troll unit is always doubled. So at 20cm no penalty applies, at 40cm -2, at 60cm -4, and so on. Trolls can regenerate wounds - in each round of combat after whole stands have been removed Trolls automatically regenerate one outstanding hit. If no hits are left over after removing whole stands then regeneration has no effect. Regenerated hits still count towards the combat result for the round.

3. Harpies. Harpies are based facing the long edge of the base in the same way as infantry, rather than the short edge like other monsters. Harpies can fly. A unit of harpies cannot be joined by a character.

4. Dragon Ogres. Dragon Ogres are immune to terror.

5. Spawn. Spawn units have -1 Command penalty if not part of a brigade that includes more non-Spawn units than Spawn units. Up to two Spawn units can be included in any brigade and do not count towards the maximum size of that brigade.

Spawn units cause terror in combat - enemies suffer the -1 Combat modifier for fighting terrifying creatures. Spawn units cannot be driven back by shooting and never roll for drive backs. Spawn units must pursue or advance if victorious in combat where it is permitted to do so.

Spawn units have a shooting range of 15cm and 360° vision - the unit can draw line of sight from all edges of its stand for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

6. Chaos Dragon. Generals, Wizards and Heroes can ride a Chaos Dragon. The Chaos Dragon can fly, increasing the rider's move from 60 to 100cm, and it adds +3 Attacks to those of its rider. In addition the Dragon has a special shooting attack. It can breathe fire. This special attack can only be used if the rider has joined a unit and is not engaged in combat. A rider that has not joined a unit cannot use the Dragon's fiery breath to attack. The Dragon's fire breath works as follows. The fire breath has a range of 20cm. It can be directed against one target as normal and has 3 Attacks worked out in the usual way. The Chaos Dragon is a large terrifying creature. A unit that has been joined by a Chaos Dragon causes terror in its enemies and therefore imposes the usual Combat penalty.

7. Chariot Mount. Generals, Sorcerers and Heroes can ride Chariots. An extra +1 Attack is added to those of its rider.

Chaos Spells

BOON OF CHAOS

4+ to cast.....Range N/A

A dark power billows from the Sorcerer filling his troops with the destructive vigour of chaos.

This spell can be cast if the Sorcerer has joined a unit in combat. The spell affects the unit he has joined. The effect lasts for the duration of the following Combat phase.

Every stand in the unit, including characters that have joined the unit, adds +1 to its Attacks value. As the Sorcerer must join the unit to cast the spell this includes the Sorcerer himself, but it is possible for other characters to join the unit as well, in which case the +1 is applied to whichever character fights.

ANGER OF THE GODS

4+ to cast.....Range 30cm

The anger of the chaos gods blots out the sun and sends clouds of rage scudding across the battlefield all around the Sorcerer.

The spell is cast upon the Sorcerer himself and affects all enemy units within 30cm of the stand.

The spell lasts until the end of the opposing player's following turn.

The spell affects the opposing army's ability to issue commands. All enemy units within 30cm of the Chaos Sorcerer suffer a -1 Command penalty. This penalty is applied when each order is issued: a unit might therefore be within 30cm of the Sorcerer for one order but not for a second, for example.

RAGE OF CHAOS

5+ to cast.....Range 30cm

The Sorcerer screams a blasphemous litany to his dark gods. From the black gore that drenches the battlefield leaps a roaring daemonic shadow that fights with great madness and ferocity.

This spell can be cast upon a friendly unit that is engaged in combat and which is within range. The Sorcerer does not have to be able to see the target to cast the spell.

The affect lasts for the duration of the following combat phase and the indicated bonus attacks are added to the unit's total attacks each round.

The unit gains bonus Rage of Chaos attacks for the following combat phase. To determine the number of bonus attacks roll one D6 at a time and add the results together. The player can roll as many D6 as he wishes up to a maximum of 1 per stand in the unit. The player always rolls one dice at a time and can decide to stop at any point. However - if the player rolls a second or subsequent dice and scores the same value as any previously rolled dice, then the total Rage of Chaos attacks are directed against the targeted unit instead of its enemy. Rage of Chaos attacks that rebound in this way are struck only once in the first round of combat: they are not struck each round.

Example, 1 + 4 + 6 = 11 extra attacks for the Chaos unit each round. 1+4+1 = 6 Attacks upon the Chaos unit in the first round.

CURSE OF CHAOS

5+ to cast.....Range 30cm

An arc of pure energy strikes the foe, wreaking monstrous changes, melting flesh and twisting bones into monstrous form.

This spell can be cast on an enemy unit. The Sorcerer must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

The Curse of Chaos is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by a Curse of Chaos as with ordinary shooting.

Orcs

Once Orcs ruled the whole of the Old World as well as the lands far to the east and south. The various tribes fought, conquered and absorbed each other in one huge glorious battle that lasted for countless centuries. 'Countless' because Orcs were and remain in a state of uncompromising savagery having mastered neither writing nor counting beyond three. This happily bloodthirsty state of affairs lasted until the human tribes united together with the Dwarfs to drive the Orcs from the lands west of the Worlds Edge Mountains. Subsequently, Orc tribes are mostly to be found in the Bad Lands to the south of the Old World and the Dark Lands to the east. There the great business of fighting amongst themselves continues to this day.

Orcs are the largest and most ferocious of the greenskinned races and they dominate the smaller Goblins and Snotlings almost completely. Despite this many independent Goblin tribes continue to live deep in the forests and mountains of the Old World as well as in the Worlds Edge Mountains and beyond. These smaller greenskins are far better adapted to life below ground and in the dense forests because they are smarter and more nimble-fingered than Orcs. This is why Orc tribes always include Goblin slaves to make armour and weapons, and do such practical stuff as Orcs either can't be bothered with or just don't understand. The smallest of these creatures are called Snotlings, tiny sub-goblins that live amongst and alongside their larger relatives. They are occasionally pressed to simple tasks but for the most part they are regarded as pests, treated like pets, or enthusiastically eaten - for all greenskins are cannibals though they prefer human flesh when they can get it.

The Orc way of life is war. Every Orc measures his worth by the number of enemies he has slain - and also the number of friends, for Orcs fight each other all the time. By fighting they establish which of them is best and this is reflected in their curious metabolism. The more dominant an Orc becomes the bigger he grows so it is always easy to see which Orcs are in charge and who is boss - just look for the big guy.

All Orcs want to be biggest and best, and the surest way to achieve this is to follow the biggest Orc and share in his success. Because the top chieftains are continuously fighting off rivals their reign does not usually last for very long. Nor is there any shortage of strong, young Orcs waiting to take a fallen chieftain's place. Thus Orc society is a genuine meritocracy where the best always rise to the top and stay there only so long as they can fight off the opposition.

There are an untold number of Orc tribes in the world and most are itinerant, surviving by a process of raiding and despoliation. If one chieftain proves very successful in this respect other chieftains will quickly throw in their lot with this up and coming warlord. A successful warlord's forces will therefore grow and will continue to grow until there are so many Orcs in one place they will either self-destruct in a mighty inter-tribal war or go on the warpath and invade one of the human lands to the west. A great invasion of this kind is known as a Waaagh. The great number of Orcs that make up the Waaagh generates a kind of unstoppable enthusiasm that sends the greenskins into a spree of killing and looting that only ends once the leader of the Waaagh has been slain. Because Orcs understand little or nothing of concepts such as retreat, consolidation, or holding territory, it is inevitable that a Waaagh will run out of steam eventually; the only question is how much destruction can it cause first.

Orc Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Orc Warriors	Infantry	4	3	6+	-	3	60	2/-	-
Goblins	Infantry	2/1	3	0	-	3	30	2/-	*1
Black Orcs	Infantry	4	4	5+	-	3	110	-/1	-
Trolls	Infantry	5	3	5+	-	3	110	-/3	*2

Orc Hero	Hero	+1	-	-	8	1	80	-/2	-
Orc Shaman	Wizard	+0	-	-	7	1	45	-/1	-
Goblin Hero	Hero	+1	-	-	7	1	45	-/2	-
Goblin Shaman	Wizard	+0	-	-	6	1	30	-/1	-
Wyvern	Monstrous Mount	+2	-	-	-	-	+80	-/1	*8
Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*9

Special Rules

1. Goblins. A Goblin unit is allowed to shoot as if it had bows but its range is reduced to 15cm.

2. Trolls. When trying to issue an order to a unit of Trolls or to a brigade that contains a unit of Trolls, any Command penalty applied for distance between the character and the Troll unit is always doubled. So at 20cm no penalty applies, at 40cm -2, at 60cm -4, and so on. Trolls can regenerate wounds - in each round of combat after whole stands have been removed Trolls automatically regenerate one outstanding hit. If no hits are left over after removing whole stands then regeneration has no effect. Regenerated hits still count towards the combat result for the round.

3. Ogres. If an Ogre unit can use its initiative to charge an enemy unit of humans at the start of the Command phase then it must do so. This happens automatically and their commander can do nothing about it. 'Humans' encompasses all 'men' including Chaos Warriors and Marauders, but not Dwarfs, Elves etc.

4. Wolf Riders. The Wolf Rider's range is restricted to 15cm. Wolf Riders have 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

5. Giants. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately. Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

6. Rock Lobber. Rock Lobber is a Stone Thrower as described in the Rulebook p.75.

7. Orc General. Once per game, at any point in the Command Phase, the Orc General motivates his troops forwards. For the remainder of that Command phase, the Orc General ignores the Command Penalty for having an enemy within 20cm of a unit.

8. Wyverns. Generals, Wizards and Heroes can ride Wyverns. A Wyvern can fly, increasing its rider's move from 60 to 100cm, and it adds +2 Attacks to those of its rider. A unit that includes a Wyvern rider causes terror in its enemies.

9. Chariots. A General, Wizard or Hero can ride a Chariot. A character in a chariot adds +1 to his Attacks.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

Orc Spells

FOOT OF GORK

6+ to cast.....Range 50cm

A gigantic spectral green foot descends from the heavens with a mighty thunk, crushing the enemy to pulp and grinding their bones into the dirt.

This spell can be cast on any unengaged enemy unit within range regardless of whether the Shaman can see it or not. The spell cannot be cast on a unit engaged in combat.

The unit suffers six attacks worked out in the usual way. A unit cannot be driven back by the Foot of Gork because Gork's foot descends from above!.

GOTCHA

5+ to cast.....Range 30cm

With a mighty heave a huge green fist erupts from the Shaman's gaping mouth and strikes all within its path.

Draw an imaginary line 30cm long from the Shaman's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily affect several units and will affect all units that fall beneath the line (including your own). Unengaged units can be driven back by a Gotcha as with ordinary shooting (even including friends). Engaged units cannot be driven back by the Gotcha but carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

GERROFF!!!

5+ to cast.....Range 60cm

The voice of Gork booms out across the battlefield driving back his foes with a rancid gale-force yell.

This spell can be cast on any unengaged enemy unit within range regardless of whether the Shaman can see it or not. The spell cannot be cast on a unit engaged in combat.

The enemy unit is driven back 1D6 x 5cm towards its own table edge. This is treated in the same way as a drive back from shooting, except that the direction is established by determining the shortest route to the table edge. A unit cannot be routed by a drive back from a Gerroff spell. If the unit leaves the table edge it must roll as described in the main Warmaster rules.

WAAAGH!

4+ to cast.....Range 30cm

The Shaman summons the power of the mighty Waaagh! to invigorate the greenskins.

This spell can be cast on a friendly unit of Orc or Goblins engaged in combat; including Black Orcs, Wolf Riders, Boar Boyz and any type of Orcs or Goblin troops but not Trolls, Ogres, Giants or other non-greenskins. The spell can be cast regardless of whether the Shaman can see the target or not.

The spell lasts for the duration of the following Combat phase. Every stand in the unit, including characters that have joined the unit, adds +1 to its Attacks value.

High Elves

The Elven Kingdoms are the most ancient and cultured of all the world's realms aside from those of the cold-blooded Lizardmen races. Long before the crude townships of men took shape the Elves were building glittering cities in the island-continent of Ulthuan. Soon more cities arose in their colonies throughout the world. After millennia of habitation many of these cities still exist. They are graced by fantastical towers, sweeping arches, and a thousand other wonders undreamed of by mankind. Within soaring spires the High Elves pursue their age-long studies of art, sorcery and the world both natural and otherwise.

The Elven mind is not only keen but is matched by a near perfect physique and extraordinary longevity. Elves resemble men but are taller and more elegantly proportioned with long athletic limbs. They have lean, intelligent and handsome faces with delicately pointed ears and entrancing almond shaped eyes. It has been said that their swift precise movements make the most graceful human seem oafish in comparison. These qualities make them dangerous warriors as well as unparalleled craftsmen and sorcerers.

Elves are not warlike by nature as are, for example, Orcs and even Dwarfs and men to some extent. However they are proud -some say arrogant - and ultimately confident in their purpose. Thousands of years ago the Elves and Dwarfs fought a long and bitter war over possession of the Old World - a war fuelled by pride and suspicion on both sides.

This war weakened the two races to such an extent that both were nearly destroyed as a result. Much of the Dwarf realm was subsequently overrun by greenskins, the Elves were driven from their cities in the Old World, and the Elven homelands were plunged into the devastating civil war known as The Sundering. Elves and Dwarfs have never forgotten that war and it remains a source of recrimination and antagonism between them to this day.

Although their strength is less than it once was the Elven Kingdoms constitute the greatest bastion against Chaos in the world. Millennia ago - when the Age of Chaos began - the most adept of the High Elf Mages constructed a gigantic vortex of power at the centre of the island-continent of Ulthuan at the heart of the Elven Kingdoms. The purpose of this vortex was to draw magical energy out of the world, which was at that time overrun with daemons and other wholly sorcerous creatures. By means of a system of magical standing stones arranged around the circular island like a spider's web, the power of Chaos was gradually drawn away and stability restored. The Daemon armies were destroyed or banished back to the Realms of Chaos from which they had come. This is a burden that the High Elves carry to this day. Were Ulthuan and its vortex to fall the world would be quickly consumed in magic and mortal creatures would cease to exist - at least in any form recognisable as such.

The Elven Kingdoms remain eternally alert to the threat of Chaos. They are the undisputed masters of the seas and have fortresses situated all over the globe at strategic positions. There they wait and watch the lights of magic playing upon the northern skies, and prepare for the next battle against the forces of Chaos. However, their numbers are fewer now than ever, and the burden of defence grows ever more heavy. For this reason the Elves regard the human realms as vital to the eternal battle against Chaos, for if the human realms fell it would be only a question of time before Ulthuan itself would be overwhelmed by the tides of Chaos.

High Elf Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Spearmen	Infantry	3	3	5+	-	3	60	2/-	-
Archers	Infantry	3/1	3	6+	-	3	75	1/-	*1
Silver Helms	Cavalry	3	3	4+	-	3	110	-/3	-
Reavers	Cavalry	3/1	3	6+	-	3	90	-/3	-
Chariots	Chariot	3	3	5+	-	3	95	-/3	-
Giant Eagles	Monster	2	3	6+	-	3	70	-/1	*2
Dragon Rider	Monster	6/3	6	4+	-	1	270	-/1	*3
Elven Bolt Thrower	Artillery	1/3	2	0	-	2	55	-/1	*4
General	General	+2	-	-	10	1	180	1	-
Hero	Hero	+1	-	-	8	1	80	-/1	-
Mage	Wizard	+0	-	-	8	1	90	-/1	*5
Giant Eagle	Monstrous Mount	+2	-	-	-	-	+20	-/1	*6
Dragon	Monstrous Mount	+3	-	-	-	-	+100	-/1	*3
Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*7

Special Rules

1. Archers. High Elf archers add +1 to their dice rolls when making Shooting attacks. They will therefore score a hit against targets in the open on a 3 or more, against targets that are defended on a 4 or more, and against fortified targets on a 5 or more.

2. Giant Eagles. Giant Eagles can fly.

3. Dragons. Dragons can fly. Dragon Rider units and any other units that include a Dragon-riding character cause terror in their enemies.

Because Dragon Riders have a great many hits (6) which are difficult to inflict even during a lengthy combat engagement, we must consider the possibility of hurting the Dragon and reducing its effectiveness in subsequent turns. Therefore, if a Dragon Rider has accumulated 4-5 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Dragon has been badly hurt all accumulated hits are discounted and its maximum hits value and Attacks are halved for the rest of the battle (to 3 Hits and 3/2 Attacks).

Generals, Wizards and Heroes can ride Dragons. A Dragon can fly increasing its rider's move from 60 to 100cm. An extra +3 Attacks are added to those of its rider. A Dragon can breathe fire if the character has joined a unit that isn't engaged in combat. A Dragon ridden by a character can't breathe fire if it is not part of a unit.

Dragons can make a fiery breath. This applies both to a unit of Dragon Riders and to Dragons ridden by characters that have joined a unit of troops. Fire Breath works as follows. The fire breath has a range of 20cm. Breath can be directed against one target as for normal shooting and has 3 Attacks that are worked out in the usual way at 4+ to hit.

4. Elven Bolt Thrower. Rules for the Elven Bolt Thrower are described in the Artillery and Machines section in the Rulebook p.75.

5. Wizard. High Elf Mages are especially powerful wizards and to represent this can re-roll a failed spell on any dice result except a 1. If a spell is failed because a 1 is rolled then no re-roll is permitted.

6. Giant Eagle Mount. Generals, Wizards and Heroes can ride a Giant Eagle. An Eagle can fly increasing its rider's move from 60 to 100cm. An extra +2 Attacks are added to those of its rider.

7. Chariot Mount. Generals, Wizards and Heroes can ride Chariots. An extra +1 Attack is added to those of its rider.

High Elf Spells

STORM OF STONE

6+ to cast.....Range 30cm

The ground erupts around the Mage, and a hail of stones, rocks and dirt hurls itself upon his foes.

This spell affects every enemy unit within range.

Every enemy unit within range takes 3 Attacks worked out in the normal way. Unengaged units are not driven back by the Storm of Stone (the assault comes from the ground beneath their feet). Engaged units carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

LIGHT OF BATTLE

5+ to cast.....Range 30cm

A radiant light shines forth upon the Mage's companions filling them with magical vigour.

This spell affects every friendly unit within range.

The spell lasts for the duration of the following Combat phase. Every unit and every character that has joined a unit gains a bonus +1 attack. These attacks can be allocated to any stand in the unit and can be allocated to a different stand in each combat round.

HEAVEN'S FIRE

4+ to cast.....Range 30cm

The Mage imbues the Elven archers with an unearthly swiftness enabling them to rain death upon the enemy.

This spell can be cast upon a friendly unit of unengaged missile armed infantry or cavalry within range. It cannot be cast on artillery. The Mage does not need to be able to see the friendly unit nor their intended target.

When the Heaven's Fire spell is cast on a unit, it can shoot twice that turn instead of once. If it has already shot that turn it can therefore shoot again immediately. If it has yet to shoot it can shoot twice. When a unit shoots twice due to Heaven's Fire the second shot is always at a -1 penalty to hit.

HAIL OF DESTRUCTION

5+ to cast.....Range 30cm

A hail of fiery arrows flies from the Mage's outstretched fingertips and strikes an enemy unit.

This spell can be cast on an enemy unit. The Mage must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

The Hail of Destruction is treated like three ordinary shooting attacks (4+ to hit) except that armour has no effect (all targets count as having no armour). A unit can be driven back by a Hail of Destruction as with ordinary shooting.

Dwarfs

The Dwarfs live in fortified subterranean strongholds in the mountainous regions of the Old World. Beneath these near impregnable fortresses they have dug thousands of miles of tunnels, shafts, mines and galleries. The Worlds Edge Mountains are riddled with Dwarf delvings and constitute a hidden underground realm as large in extent as any human kingdom. The adjoining Grey Mountains and Dragonback ranges are also home to Dwarfs and there are scattered settlements in most of the mountainous regions of the Old World.

Dwarfs are attracted to these bleak places by hidden mineral wealth and especially gold. Dwarfs are utterly besotted with gold. They are also quite enthusiastic about gemstones and other rare and precious metals - but most of all they love gold! Dwarfs sing songs about gold, dig through solid rock to find gold, and spend endless happy hours counting the gold they possess. There are hundreds of different Dwarfish words for gold and new ones are being coined all the time. A Dwarf who finds himself in the presence of large amounts of the yellow shiny stuff can easily go 'gold crazy'. Such an individual may become insanely violent, even going so far as to attack his friends and family who he believes to be "after me gold". Given this strong materialistic streak it is not surprising that Dwarfs are such keen traders and merchants. They are always willing to do business with other races - though only on cash terms - gold always acceptable.

Dwarfs are shorter and far stouter than men or elves. They are also much stronger and more resilient. They consider humans and elves to be gangling weaklings liable to be blown over in a decent breeze. Dwarfs are expert craftsmen, especially when it comes to metal work, smithying, gemcutting and jewellery making. Despite their cumbersome appearance they are astonishingly skilful at making fine, intricate mechanisms such as locks, concealed drawers, and hidden doorways. They are adept stonemasons and take great pride in their ability to build to last. Indeed, the phrase 'Dwarf-built' is a byword for indestructible, whilst the Dwarfish word for 'shoddy' translates quite literally as 'manmade'. Even the Elves consider Dwarf metalcraft the finest in the world. Elves are less appreciative of Dwarf taste, which they consider to be extraordinarily gaudy and vulgar.

Before the coming of men the Elves established colonies in the Old World so that they could trade with the Dwarfs. For many years the two races benefited from this arrangement and both peoples flourished. However, differences in temperament doomed the relationship to inevitable failure. The Dwarfs saw the Elves as arrogant and effeminate. The Elves thought the Dwarfs brutish and vulgar. If Elves had been more tactful and Dwarfs less prickly things might have turned out differently. But it was not to be. Once war began both sides were too proud to concede defeat.

After hundreds of years of continuous warfare both races were exhausted. The Elves returned to Ulthuan and abandoned the Old World. The Dwarfs considered themselves the victors but their numbers were so depleted that their empire could barely defend itself. It was at this point that hordes of greenskins and ratmen attacked the Dwarf realm from above and below. Many strongholds were destroyed and others damaged. The once sprawling underground empire was reduced to embattled enclaves in the mountains.

Today the Dwarf realm is much reduced in size and population. Men have established themselves on the lands once fought over by Dwarfs and Elves. The Dwarfs have learned to trade with men and the two races have forged a mostly peaceful relationship. It was a combined force of Dwarfs and men that finally drove the greenskins form the lands now known as the Empire. It was Dwarf craftsmanship that raised the first human cities. Relations with the Elves remain embittered. Dwarfs never forget injustices against their own kind and can bear a grudge practically forever. They reserve their most heartfelt hatred for the greenskins and ratmen who have taken over the ruins of many strongholds that are rightful property of the Dwarfs.

Dwarf Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special

Runesmith	Hero	+1	-	-	8	1	90	-/1	*8
Anvil	Special Bonus	+1	-	-	-	-	+30	-/1	*9

Special Rules

1. Handgunners. A handgun shot can pierce armour far more easily than an arrow or a crossbow bolt. Therefore, count enemy Armour values as one worse than normal when shot by a handgun. One unit of Handgunners per full 1000 points can replace a unit of Warriors while still counting for the Warrior min/max value. Note that this unit still counts for max value of Handgunners.

2. Rangers. One unit of Rangers per full 1000 points does not have to be deployed before the game if the player does not wish to do so. Instead the unit can be infiltrated onto the battlefield once the game has begun. To infiltrate a unit, the Dwarf player nominates the point where he wants the Rangers to appear and issues an 'infiltration' order from any character. The character does not have to be within his normal command range to issue an infiltration order - the character's command range is considered to extend over the entire tabletop when issuing an infiltration order. Treat the order as issued to the nominated point, and apply any modifiers for distance and proximity of enemy, but ignore penalties for dense terrain. The nominated point must lie either on the table within dense terrain or on any base edge other than the enemy player's own table edge. If successful, place one stand on the nominated spot and arrange the rest of the unit into formation around it. The infiltrated unit cannot be placed so that it touches an enemy unit. Once deployed, orders can be given to the unit by the same character that gave the infiltration order if he is within his normal command range, the infiltrating unit is considered to have used its first order to deploy. If the infiltration order is failed the unit is not deployed and cannot infiltrate that turn, it can attempt to infiltrate in a subsequent turn at the same or a different place. Rangers don't suffer the -1 Command penalty for Dense Terrain. Although they are infantry, Rangers can pursue any type of retreating enemy.

3. Troll Slayers. A Troll Slayer unit will always use its initiative to charge an enemy if possible and cannot be given orders instead. They will never use their initiative to evade. Troll Slayers cannot be driven back by shooting and never roll for drive backs. Troll Slayers must pursue or advance if victorious in combat where they are permitted to do so. Troll Slayers are unaffected by enemy that cause terror in combat - they don't suffer the -1 Attack modifier. Troll Slayers positively enjoy fighting monsters - the bigger the better in fact! Troll Slayers add +1 Attack when fighting against a Monster stand.

Troll Slayer units earn victory points differently to other units as follows:

If a Troll Slayer unit has any stands remaining at the end of the battle then the full points value of the unit is awarded to the opposing side as victory points. It doesn't matter if the unit has 3, 2 or 1 stand remaining - if there are any stands left at all the enemy gets the full victory points.

If a Troll Slayer unit is destroyed no victory points are scored by either side.

Troll Slayer units that have been destroyed still count towards the Dwarf army's losses for purposes of calculating withdrawal.

4. Cannons. Full rules for Cannons are in the main Rulebook (p.74)

5. Flame Cannon. The Flame Cannon is an infernal device that shoots a gout of flame. It has range of 30cm and its attacks are slightly unusual. Rather than having a fixed number of attacks it has 2D6 Attacks instead - roll 2 dice and add the scores together. But if the Flame Cannon rolls a double then it does not shoot as expected! Depending on the double rolled something has gone horribly wrong.

Flame Cannon Misfire Chart

Double Rolled	What's that gurgling noise?!
1.	The Flame Cannon explodes and is destroyed. No attacks are caused.
2.	The Flame Cannon emits an enormous belch of fire inflicting a total of 4+2D6 attacks on the target before it explodes and destroys itself.
3.	The Flame Cannon makes a worrying wheezing noise before spewing out an unusually smoky flame. Six attacks are inflicted this turn but the number of attacks caused by all further shooting is reduced from 2D6 to 1D6.
4.	The Flame Cannon splutters and its boiler goes out. The crew scramble around to re-light it. The Flame Cannon does not shoot this turn but it is otherwise unaffected.
5.	The Flame Cannon chuffs out a great gout of soot, covering the target in black smoke and hot coals. Ten attacks are inflicted this turn –otherwise the Flame cannon is unaffected.
6.	The Flame Cannon lurches in its mountings and heaves forth an especially huge flame inflicting 12+D6 attacks on the target. The Flame Cannon is otherwise unaffected

A Flame Cannon can shoot at charging enemy in the usual way.

6. Gyrocopter. The Gyrocopter is a flying machine, so all the usual flying rules apply. The model always forms a single unit on its own, must be given orders individually, cannot be brigaded with other units and cannot be joined by a character in combat.

The Gyrocopter's fast-firing gun is light in weight and fires a small calibre shot. It counts Armour values as one worse than normal. The Gyrocopter has 360° vision - the unit can draw line of sight from all edges of its stand for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

7. Hero. One Hero in the army may be upgraded to carry an Oathstone for +15 pts. Once per game, the Hero may use the Oathstone to inspire one unit that he has joined (except Troll Slayers). Both the Hero, and the unit he has joined, gain +1 attack per stand, and are immune to Terror, until the end of the combat phase.

8. Runesmith. Although they are not Wizards and cannot therefore cast spells, Dwarf Runesmiths can combat the magic of their enemies. If an enemy Wizard who is within 50cm of the Runesmith casts a spell the Runesmith can attempt to anti-magic it. Note that it does not matter what the spell is or where it is cast, the Runesmith can ‚anti-magic' it so long as the caster is with 50cm. To determine if this works roll a D6 - on the score of 4, 5 or 6 the Runesmith has succeeded and the spell doesn't work, it is dispelled by the Runesmith's defiant efforts. If he fails then the Runesmith's efforts come to nothing and the spell works as normal. A Runesmith can attempt to anti-magic any number of spells in a turn, but only one attempt can be made to anti-magic any individual spell - even if the army includes more than one Runesmith and several are in range of the enemy Wizard.

9. Anvil. The army can only include a single anvil and it is incorporated onto the stand of a Runesmith. If a Runesmith stand includes the Anvil, once per battle he can add +1 to his dice roll when he attempts to dispel enemy magic spells using the Dwarf anti-magic ability (see Runesmith). In addition the Runesmith can strike the Anvil during the Shooting phase of his own turn. The anvil's plangent rune-song fills the Dwarfs with even greater resolve! Roll a D6. On the score of a 4, 5 or 6 all Dwarf units within 20cm of the Runesmith are unaffected by Terror until the start of the Dwarf player's next turn. On a roll of less than 4 there is no effect.

Skaven

Skaven are neither rats nor humans but a vile combination of the two races. The origins of the Skaven are not known for certain. It is likely they were mutated at the dawn of the Age of Chaos when powerful waves of magic swamped the world. Millions of tons of magically energised material were hurled over the planet in the form of meteorites. Some of these were huge boulders as big as a house but most were much smaller down to the finest particles of dust that fell to earth and polluted the ground with magical energy. Creatures that breathed the dust or strayed within the radiating power of the larger stones became mutated into the most horrible monsters. The Skaven may well have mutated from ordinary vermin as a result of consuming this corrupting material - or 'warpstone' as they call it. Even today the Skaven crave warpstone. Even minute traces of warpstone would kill most creatures but for Skaven it is a potent stimulant and one that confers great powers upon their sorcerers. It also destroys and mutates Skaven and drives them insane - but such is its hold over the whole race that they delve for it beneath the earth wherever it may be found.

Like ordinary rats Skaven abhor the daylight and avoid open places. They dig tunnels beneath the earth, often taking over old Dwarf mines and Goblin burrows. Though few suspect their presence they live below the cities of men in the sewers and cellars and amongst ruins, emerging only at night to prey upon vagrants and other unfortunates. Over the centuries the Skaven have constructed thousands of miles of tunnels and huge city-sized nests so that the whole planet is riddled with their workings. Even the mines of the Dwarfs are undermined by the underworld of the Skaven and the two races have fought many battles beneath the earth.

The Skaven thrive upon decay and corruption but their society is highly stratified from the highest Lords of Decay to the most lowly Skaven slaves. They live as large extended groups called Clans of which there are a great many. The most powerful Clans rule the rest and they in turn are ruled over by the Council of Thirteen whose members are the dreaded Lords of Decay. It is this council that directs the Skaven's attempts to overthrow the races of the Overworld. The ordinary Clans are made up of many thousands of Skaven warriors and slaves and very little else but some Clans have developed special skills. These include Clan Pestilens whose rulers have developed a form of germ warfare, spreading pestilence and corruption by means of noxious vapours and poisons.

Clan Eshin is the master of subterfuge whose agents scuttle over the rooftops of human cities on their secret missions of sabotage and intelligence gathering. Clan Moulder's sorcerers have become the masters of mutating magic and have created many vile monsters by feeding them warpstone - their most successful creations are the Rat Ogres - gigantic Skaven monstrosities many times the size of an ordinary Skaven. Clan Skryre is famed for its machineries that blend sorcery and an advanced science far beyond the understanding of mere humans. Most powerful of all are the Grey Seers the supreme sorcerers of the Skaven Race.

Special Rules

ARMY RULES

Strength in Numbers. Brigades may be of any size and are not restricted to the normal four unit maximum.

Vermintide. Skaven units that win a round of combat can choose to pursue retreating enemy units regardless of troop type. Any Skaven units (including artillery) can pursue any enemy units (including flyers, cavalry and chariots). Although allowed to pursue regardless of enemy troop type, Skaven are still constrained by terrain and fortified status the same as other armies – e.g. they cannot pursue if fortified.

Under the Lash. All Skaven characters have a Command range of 20cm whether General, Heroes or Wizards. Even Skaven Generals have a Command range of 20cm. Skaven are very good at directing their underlings - but only so long as they remain close at hand. We call it 'under the lash'.

SPECIAL RULES

1. Jezzails. Count enemy armour values as one worse than normal when shot by a jezzail. So, for example, an armour value of 3+ counts as 4+, 5+ counts as 6+, and 6+ can't save against a jezzail.

2. Plague Monks. A unit of Plague Monks will always use its initiative to charge an enemy if possible and can't be given orders instead. They will never use their initiative to evade. They can't be driven back by shooting and never roll for drive backs. If victorious in combat they must pursue or advance where possible.

Plague Monks are unaffected by enemies that cause terror in combat, they do not suffer the usual -1 Attack modifier.

3. Rat Swarms. Rat Swarms cannot be driven back by shooting and do not roll for drive backs. A Rat Swarm stand cannot be supported by other kinds of infantry - only by other Ratswarm stands. Note, however, that Rat Swarms can support other kinds of infantry as normal. A Rat Swarm cannot be given magic items.

4. Gutter Runners. Gutter Runners are armed with throwing stars and darts, and are therefore allowed to shoot as if they had bows, but their range is reduced to 15cm and have 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy. In addition, Gutter Runners do not have to be deployed before the game if the player does not wish to do so. Instead individual units can be infiltrated onto the battlefield once the game has begun. To infiltrate a unit, the Skaven player nominates the point where he wants the Gutter Runners to appear and issues an 'infiltration' order from any character. The character does not have to be within his normal command range to issue an infiltration order - the character's command range is considered to extend over the entire tabletop when issuing an infiltration order. Treat the order as issued to the nominated point, and apply any modifiers for distance and proximity of enemy, but ignore penalties for dense terrain. The nominated point must lie either on the table within dense terrain or on any base edge other than the enemy player's own table edge. If successful, place one stand on the nominated spot and arrange the rest of the unit into formation around it. The infiltrated unit cannot be placed so that it touches an enemy unit. Once deployed, orders can be given to the unit by the same character that gave the infiltration order. Skaven characters may ignore the Under the Lash rule when issuing orders to Gutter Runners. Treat the character as having the normal command range for their type. The infiltrating unit is considered to have used its first order to deploy. If the infiltration order is failed the unit is not deployed and cannot infiltrate that turn, it can attempt to infiltrate in a subsequent turn at the same or a different place. Gutter Runners don't suffer -1 Command penalty for Dense Terrain.

5. Warp Lightning Cannon. The Warp Lightning Cannon follows the rules for Elven Bolt Throwers as per page 75 of the rulebook, but they can move up to 20cm. A half pace move is 10cm. When making a shooting attack, any roll of double 1s to hit will cause the Warp Lightning Cannon unit to become confused. This includes stand and shoot attacks.

6. Doom Wheel. When the Doom Wheel charges against targets in the open it receives D6 bonus Attacks in addition to the normal +1 Attack for charging. Note that this bonus applies only when charging - not during pursuits, advances or when the Doom Wheel is charged itself. The Doom Wheel has a move of 20cm and causes terror.

7. Grey Seer. The Grey Seer is the army's General and can use Skaven magic in the same manner as a Warlock and can be given a magic item restricted to either a General or a Wizard.

8. Screaming Bell. A Screaming Bell is a gargantuan device and therefore it uses a 40 x 60mm base, with the short edge being the front. It cannot move of its own accord - but relies upon the great mass of Skaven to push it forward. The Screaming Bell can therefore only move in the Command phase if it forms a brigade with one or more infantry units. It can then move 20cm at infantry pace. It cannot move using initiative and cannot be driven back by shooting and does not roll for drive backs. In combat it is automatically destroyed if forced to retreat but will pursue, advance and fall back so long as it is touching a Skaven infantry unit at the start and end of its move: otherwise it cannot pursue, advance or fall back as it is unable to move of its own accord. All Skaven units touching the Screaming Bell are unaffected by the usual penalty for Terror whilst they remain so. In addition, any Skaven Hero or Warlock within 30cm of the Screaming Bell adds +1 to their Command value. Any enemy character within 30cm of the Screaming Bell deducts -1 from their Command value. A Skaven army can only ever include a maximum of 1 Screaming Bell no matter how large.

9. Rat Ogre Bodyguard. The Grey Seer, Heroes and Warlocks can have a Rat Ogre Bodyguard.A character with a bodyguard adds +1 to his Attacks.

Skaven Spells

WITHER

4+ to cast.....Range 30cm

Chanting a vile curse, the caster inflicts a wasting, shrinking sickness on the enemy.

This spell can be cast upon an enemy unit that is engaged in combat and which is within range. The Wizard does not have to be able to see the target to cast the spell. The spell lasts for the duration of the following Combat phase. Every stand in the unit, including characters that have joined the unit, deducts -1 from its Attacks value.

WARP LIGHTNING

5+ to cast.....Range 30cm

An arc of pure warp energy strikes the foe wreaking strange changes, melting flesh and twisting bone into monstrous forms.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

Warp Lightning is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by Warp Lightning as with ordinary shooting.

DEATH FRENZY

5+ to cast.....Range 30cm

The Skaven screams a blasphemous litany to the Horned Rat driving the Skaven masses into a frenzy of warpdust fuelled destruction.

This spell can be cast upon a friendly unit that is engaged in combat and which is within range. The Wizard does not have to be able to see the target to cast the spell.

The effect lasts for the duration of the following combat phase and the indicated bonus attacks are added to the unit's total attacks each round.

The unit gains bonus Death Frenzy attacks for the following combat phase. To determine the number of bonus attacks roll one D6 at a time and add the results together. The player can roll as many D6 as he wishes up to a maximum of 1 per stand in the unit. The player always rolls one dice at a time and can decide to stop at any point. However - if the player rolls a second or subsequent dice and scores the same value as any previously rolled dice, then the total Death Frenzy attacks are directed against the targeted unit instead of its enemy. Death Frenzy attacks that rebound in this way are struck only once in the first round of combat: they are not struck each round.

Example, 1 + 4 + 6 = 11 extra attacks for the Skaven unit each round. 1+4+1 = 6 Attacks upon the Skaven unit in the first round.

PLAGUE

6+ to cast.....Range 30cm

A swirling could of virulence envelopes the enemy troops causing their bodies to erupt in pustules, their skins to split apart with running sores, their joints to swell with buboes and their hair to crawl with lice and fleas.

This spell can be cast on any unengaged enemy unit within range regardless of whether the Wizard can see it or not. The spell cannot be cast on a unit engaged in combat.

The unit suffers six attacks worked out in the usual way. A unit cannot be driven back by Plague (the vile Plague erupts from within!).

Lizardmen

Before Chaos came into the world there was a more ancient forgotten age - the Age of the Old Ones. This far-off time lies beyond the memory of man and is recalled only dimly by the Elves - the most ancient of all the world's warm-blooded races. In that distant age the planet was dominated by cold-blooded creatures. The undisputed rulers of the world were the reptilian lizardmen. The mysterious Old Ones themselves came not from this planet but from the great darkness. They travelled between the stars in their silver ships by means of immense inter-dimensional portals fashioned with arcane skills blending both sorcery and science. In that forgotten era the Old Ones were unchallenged masters of the universe of time and space. Our world was but one small insignificant colony amidst a glittering galaxy of stars.

According to the most ancient records preserved in Lustria, themselves a cryptic and much distorted copy of even older accounts now lost, the Old Ones discovered a dying world of ice deserts inhabited only by primitive reptiles. They employed their strange sorcery to arco-engineer the native creatures into various types of workers and slaves. First of all they set the mystical master-race of Slann to fulfil their ambitions and rule over the rest. The Slann used the incomparable power of their minds to reposition the planet in its orbit so that temperatures became more tolerable and jungles grew up to cover the equatorial regions. Most importantly they constructed a permanent trans-dimensional gateway through the axis of the planet. Portals over the poles allowed the Old Ones to transport huge fleets from world to world. By this means new creatures of many kinds were introduced including the ancestors of the warm-blooded races such as Elves, Dwarfs and Men.

The Slann caused their lizardmen servants to raise great pyramid cities where from mighty Slann Mages observed the stars and contemplated the inner secrets of the multiverse. Their great minds spanned the stars and their thoughts quested throughout the time-stream exploring its endless weave of possibilities and consequences. The secrets of the Old Ones lay within their grasp and their minions flourished on the newly made world. Mighty cities arose peopled by the lizard races. The first Elves walked the land of Ulthuan and the Slann nurtured them - cultivating the young race in preparation for the troubled time that they foresaw in the stars. What they saw was the coming of Chaos - the destruction of the Old One's intergalactic civilisation and the collapse of the mighty warp gates. Being creatures of great wisdom the Slann set about creating new races strong enough to stand against the powers of Chaos gathering in the outer darkness.

The coming of Chaos to the world was the ultimate test of the Slann. Their civilisation was almost destroyed - many of the wise ones were slain - the warp gates fell and volatile magic flooded the world and altered it forever. But as the Slann had planned all along - their minions proved stronger than Chaos. The world was saved thanks to the lizard races, the first Elves, the ancestors of the Dwarfs, and the other nascent peoples nurtured by the Slann. But the world was changed. The efforts of the Slann had all but finished them. Their time of greatness was over and the remaining Slann Mages fell into a centuries long sleep from which they awoke enfeebled and diminished - if they awoke at all. Their great cities crumbled and declined. Only their cold-blooded servants continued as ever, guarding the pyramid cities and star-temples of the Slann, awaiting the instructions of their masters with reptilian patience. So it has been for thousands of years and now even fewer Slann remain than ever and the great ones of old have all passed on. The lizardmen races continue to live amongst the ruins and preserve to this day the intent of the Old Ones if not their understanding.

Special Rules

ARMY RULES

Born in Jungle. No command penalty is applied to any units in the Lizardmen army on account of dense terrain. The Lizardmen's ruin-infested jungle homeland is mostly dense terrain and they are used to communicating through thick jungle and narrow tunnels by a mix of instinct and bizarre sub-sonic noises inaudible to other races.

SPECIAL RULES

1. Skinks. Skinks have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

2. Reptilian. Reptilian troops can only be issued an order by a character within 20cm. If reptilian units form part of a brigade an order can be issued so long as all reptilian units are within 20cm of the character issuing the order. This rule represents the creatures being cold-blooded brutes and slow to react.

3. Salamander. Salamander stands are not deployed as independent units. Instead, any Skink infantry unit may add one stand of Salamanders. This brings the size of the unit to 4 stands - 3 regular stands plus the Salamander stand.

Salamanders always have the same Armour value as the rest of their unit. They fight as part of their unit and can be removed as a unit casualty if the player wishes.

Salamander casualties never count for Command penalties. Salamander stands never cause the parent unit to be in Irregular Formation no matter how they are placed.

If a Salamander stand is attached to a Skink unit the entire unit, including the Salamander, is considered to employ 'Salamander Venom' shooting attacks. Enemy Armour saving throws suffer a - 1 penalty when hit by Salamander Venom (e.g. 5+ save requires a roll of 6).

Salamander stands have 2 shooting attacks, a range of 15cm, and 360° vision in the same way as Skinks. If their unit is charged then Salamanders can shoot in the same way as any other shooting stand.

4. Terradon. Terradons can fly. Terradon riders have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

5. Stegadon. As the Stegadon is so gargantuan, it uses a 40 x 60mm base, with the short edge being the front.

The Stegadon causes terror in its foes.

The Stegadon can only be brigaded with Skink units. It cannot be brigaded with Skink units that have attached Salamanders. It cannot be brigaded with any other units including with other Stegadons.

The Stegadon's crew has a shooting range of 15cm and 360° vision - the unit can draw line of sight from all edges of its stand for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

Because the Stegadon has so many hits we must consider the possibility of hurting the beast and reducing its effectiveness. Therefore, if a Stegadon has accumulated 6-9 hits by the end of the Shooting or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Stegadon is badly hurt all accumulated hits are discounted and its Hits and Attack values are halved for the remainder of the battle to 5/2 Attacks and 5 Hits.

6. Slann Mage. The Slann Mage rides a palanquin carried by his bodyguard of fierce Saurus warriors - his combat bonus is due to his bodyguard. The Slann Mage is the army's general but uniquely amongst commanders he cannot give orders, but has foreseen the flow of the battle and given his Skink retainers instructions. To represent this any Skink character within 20cm of the Slann can announce his use of the General's Divine Guidance - deducting -1 from his dice score (e.g. 8 counts as 7, 10 as 9 and so on). When Divine Guidance is used the Skink cannot 'Blunder' - any roll of double 6 simply counts as a fail. If a Divine Guidance roll is failed then the Slann's Divine

Guidance cannot be used by any other characters that have not ordered yet in that turn, their confusion over the mixup is represented by adding +1 to their first order rolls.

In addition the Slann is a great sorcerer. He can cast spells as a Wizard and can be given a magic item restricted to either a General or Wizard should you so wish. Slann Mages are especially powerful wizards and to represent this can re-roll a failed spell on any dice result except a 1. If a spell is failed because a 1 is rolled then no re-roll is permitted. The Slann Mage can also cast his spell using a Skink Shaman as the focus if desired - work out range and line of sight as if the spell was cast by the Shaman. This does not affect the Shaman's own ability to cast spells that turn.

7. Stegadon Mount. The Slann Mage may ride on top of a Stegadon, adding +3 attacks to its rider. If he rides a Stegadon then any unit he joins will cause terror and the usual Combat modifier will apply. No other character can ride a Stegadon.

8. Carnosaur. A Saurus Hero can ride a Carnosaur. If a character rides a Carnosaur then any unit he joins will cause terror. No other character can ride a Carnosaur.

Lizardmen Spells

GAZE OF SOTEK

5+ to cast.....Range 30cm

Burning jade-coloured rays leap from the Wizard's lidded eyes enshrouding and choking his enemies in writhing coils of magic.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

The Gaze of Sotek is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by the Gaze of Sotek as with ordinary shooting.

MAZDAMUNDI'S REVENGE

4+ to cast.....Range 60cm

The Wizard's foes' bowels melt with dread or possibly something much worse, hindering their movement as if hobbled.

This spell can be cast on any enemy unit within range regardless of whether the Wizard can see it or not.

The spell takes effect until the end of the opposing player's next turn.

Whilst the spell lasts the unit cannot charge and if engaged in combat will not pursue or advance. Even units that are otherwise obliged to charge, pursue, or advance will not do so if affected by Mazdamundi's Revenge.

WINGS OF THE JUNGLE

5+ to cast.....Range N/A

An eerie aura surrounds the Wizard and his companions lifting them into the air and transporting them effortlessly from one place to another.

The spell can be cast on any unengaged friendly unit that the Wizard has joined. The spell affects only a single unit, never a brigade and there is no supporting charge possible.

The unit can be moved just as if it had received an order in the Command phase. The Wizard is moved together with the unit and remains joined with it. Other character stands that have joined the unit will not move with it: they remain where they are.

SHIELD OF THE OLD ONES

5+ to cast.....Range 30cm

The enemy's blows are magically turned aside by the strange power of the Old Ones.

This spell can be cast upon a friendly unit that is engaged in combat and which is within range. The Wizard does not have to be able to see the target to cast the spell.

The effect lasts for the duration of the following combat phase.

The unit's Armour value counts as 1 better up to maximum value of 4+. i.e. 0 counts as 6+, 6+ as 5+ and 5+ as 4+. If the unit's Armour value is already 4+, or another bonus brings it to 4+, this spell has no effect.

Bretonnia

Bretonnia has grown into a powerful and influential nation under the leadership of its proud King Leoncour. At the capital of Couronne the greatest knights gather to attend their king and to accept from him such heroic quests as he chooses to set them. To the knights of Bretonnia honour is everything and it is an undoubted fact that a knight would sooner die than bring dishonour upon himself or his lord.

The realm of Bretonnia is not as ancient as that of the Empire. For many hundreds of years the various tribes that inhabited this region fought amongst themselves. Many were little more than brigands who roamed the land pillaging and looting at will. Implacable rivals vied for power whilst raids and wars despoiled the land. This long period of anarchic conflict ended with the founding of the nation under the visionary warlord Gilles le Breton. Not only did this great warrior subjugate all the other powers in the land but he instigated the laws of chivalry that were to bind them to a common purpose. The wars of internal strife were ended with a blow of the sword and a new nation and a new vision arose from the battle's mire.

The laws of chivalry govern Bretonnian society to this day informing alike the high ideals of the knights and the simple coda of the peasants. Because these laws are now so old - and because they have been re-interpreted and occasionally misconstrued over the years - many now appear quite bizarre or pointless. However, the Bretonnians make a great thing of enforcing these laws nonetheless. For the most part they describe the feudal status of different classes, rights attaining to the ownership of property, definitions and distinctions within the strict social order, and the duties and responsibilities due to each class from the others.

Much heed is paid to proper modes of address between the classes, to the means of settling petty priorities between folk of comparable standing, and to the many special forms of respect owed to superiors of distinct ranks. All this serves to keep everyone in their place especially the peasantry – who are inferior to everybody and quite right too.

The nobles of Bretonnia aspire to the high ideals of knighthood and train from early youth in the arts of war. They are skilled and hardy warriors who live to fight. They frequently engage in fiercely competitive mock battles and tourneys between themselves. Knighthood is an honour and one that can only be earned by the performance of heroic deeds - such matters usually involve slaying troublesome monsters, destroying roving bands of Orcs, and suchlike. During their lives Knights will often undertake further adventures and may be compelled to fight powerful enemies as a form of penance or spiritual journey. Knights acquire honour and rise in status as a mark of their heroism, taking priority over lesser Knights and earning certain privileged titles and badges of honour.

The most renowned of all Knights are those who quest for the Grail of the Lady of Bretonnia. The Lady is the protective deity of the nation and its rulers. She is said to have aided Gilles le Breton by appearing before him on the eve of a great battle. The Lady bade Gilles drink from her grail which he did unhesitatingly. As he drank the Lady vanished and Gilles, now suddenly sure of what he needed to do, went on to destroy his enemies and become king. Since that time the Bretonnians have built many shrines to The Lady. The greatest deed a Knight can undertake is to search for the Grail of The Lady - the damsels of The Lady grant this quest only to the bravest and most strong hearted for few who begin the quest are ever fated to succeed.

Special Rules

ARMY RULES

Feudal Society. The Bretonnian army is essentially an army of Knights and it is the Knights' contribution to the battle that counts - never mind the pot-washers and clod-breakers. To represent this, the Bretonnian army calculates when it must withdraw from the battle in a different way to other armies. Instead of counting all of its units at the start of the game, count only the number of units of Knights, Grail Knights and Pegasus Knights. Once the army has lost half or more of its units of Knights/Grail Knights/Pegasus Knights it must withdraw.

SPECIAL RULES

1. Peasants. A unit of Peasants suffers an additional -1 Command penalty when given an order. However, this penalty is waived if the Peasant unit is part of a brigade that includes at least one non-Peasant unit. Peasants cannot use initiative to charge - though they can use initiative to evade as usual. Peasants are able to make supporting charges. When they charge they receive no bonus attack modifier for doing so.

2. Knights. A Knight unit will always use its initiative to charge an enemy if possible and cannot be given orders instead. They will never use their initiative to evade. Knights are unaffected by enemy that cause terror in combat and they don't suffer the usual -1 Attack modifier.

3. Grail Knights. If the unit of Grail Knights is charging against an enemy in the open it receives an additional +1 Attack modifier in the same way as chariots and monsters.

4. Pegasus Knights. Pegasus Knights can fly.

5. Trebuchet. The Bretonnian Trebuchet is one of the mightiest and most excellent of stone throwers that are built in the Old World. At first it was designed to help the noble knights with the occasional and messy sieges that had to be done but later was adjusted to be used in field battles too. As the Trebuchet is so gargantuan, it uses a 40 x 60mm base, with the short edge being the front.

To represent that the Trebuchet is such a bulky warmachine, which takes time to assemble and disassemble, the Trebuchet can move but cannot shoot in the turn it moved.

If a Trebuchet is driven back more than 10cm by shooting it is destroyed (drive backs of less than 10cm are simply ignored). If it is forced to retreat from combat it is also destroyed like any other artillery. A Trebuchet is not affected by the Gerroff!!! spell.

The Trebuchet has a shooting range of 80cm. Fortified units count as defended and defended targets count as in the open. No armour roll is made when shot at by a Trebuchet.

The Trebuchet may not shoot at charging enemies.

The Trebuchet can shoot at targets that it can see as for all other artillery, and it can shoot over the heads of friends and obstacles on lower ground just as can other artillery.

Shooting Blind: If there is no target in sight a Trebuchet may instead shoot at the nearest enemy unit in range it cannot see. When Shooting Blind it always hits on 6+ no matter if the target is in the open, defended or even fortified.

6. Unicorn. Only an Enchantress can ride a Unicorn. The Unicorn adds +1 to the Enchantress's Attacks. Once per battle the Unicorn's magical power adds +1 to the dice roll when casting a spell. The player must announce that he is using the Unicorn's magic before rolling to see if the spell works.

7. Pegasus. The Pegasus can be ridden by a General, Hero or Enchantress and adds +1 Attack to the rider as well as allowing the character to fly.

8. Hippogriff. A single General or Hero can ride a Hippogriff. A Hippogriff can fly, increasing its rider's move from 60 to 100cm, and it adds +2 Attacks to those of its rider. A unit that includes a Hippogriff rider causes terror in its enemies.

9. Grail Reliquae. This sacred item can be given to one unit of Peasants only in a whole army. This unit and all Peasant units touching it become Grail Pilgrims (for as long as they keep contact). Grail Pilgrims are immune to terror, don't get the -1 Command penalty and get +1 Attack (they still keep the restriction that they don't get +1 Attacks for charging in the open), they have to attack by initiative if possible and cannot be driven back or confused. Before taking any specific action with a Peasant unit check if they are still touching the unit carrying the Grail Reliquae. If they do so they count as Grail Pilgrims - if not they are simple Peasants.

Bretonnian Spells

SHIELD OF COMBAT

4+ to cast.....Range N/A

The enemy's blows are magically deflected by unseen forces and cause no harm.

An Enchantress can cast this spell upon a unit that she has joined. The spell lasts until the end of the opposing player's following turn.

The unit can re-roll any failed armour rolls during the Combat phase. This does not include hits suffered from enemy missile fire during a charge, as these are deemed to be shooting hits and are encompassed by the Aerial Shield spell.

Note that only a single re-roll is permitted regardless of what other factors apply. It is never permitted to re-roll a re-roll in any circumstances.

EERIE MIST

4+ to cast.....Range 30cm

An eerie mist rises about the enemy unit stifling the sights and sounds of battle.

This spell can be cast on any enemy unit within range regardless of whether the Enchantress can see it or not. The spell lasts until the end of the opposing player's following turn.

The unit cannot use its initiative. Any order given to the unit, or to any brigade of which it is a part, suffers a -1 Command penalty.

AERIAL SHIELD

5+ to cast.....Range 30cm

The enemy's missiles sparkle in the sunlight and vanish magically in mid-air causing no harm to their target.

This spell can be cast on a friendly unit whether the Enchantress can see it or not.

The spell lasts until the beginning of the next Bretonnian Shooting phase.

All enemies that shoot at the enchanted unit get -1 on shooting rolls. But keep in mind that regardless of all other circumstances the shooting may never get worse than 6+. So even if the enchanted unit is fortified all enemies still hit on 6+.

LADY'S FAVOUR

5+ to cast.....Range 30cm

A vision of The Lady appears to lead the Bretonnians into the midst of battle or away from danger.

The spell can be cast on any unengaged friendly unit within range regardless of whether the Enchantress can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible..

The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it: they remain where they are.

Kislev

The land of Kislev lies in the north-eastern portion of the Old World between towering mountains to the east, the barren wastes of the Troll Country to the west and the borders of the Empire to the south. Dense pine forests give way to scattered birch forests and desolate tundra to the north. It is an old saying that in Kislev the winters are long, the snow lies deep, and enemies are never far away.

Kislev shares its southern border with the Empire but in every other direction it is surrounded by deadly foes. The eastern mountains are full of goblins and other greenskins whilst beyond the lands are home to savage marauder tribes. To the north-west is the land of Norsca - barbarians in thrall to the Dark Gods. When the armies of Chaos gather Kislev lies directly in their path between the forces of darkness and the lands to the south. With typically grim humour Kislevites describe their land as lying between the hammer and the anvil (meaning Chaos and the Empire).

Kislev is reckoned a backward and barbarous country by the people of the southlands. Some even go as far as to say that the Kislevites are little better than the savage marauder tribes themselves. There is some truth in this - because the people of Kislev are an admixture of native Old Worlders like the people of the Empire and a marauding Kurgan tribe called the Gospodars. As with the tribes of Chaos there are those amongst the Kislevites who possess the gift of prophecy and other sorcerous abilities. The ruling family of the Tzars is descended directly from the Sorceress Khan-Queens of the Gospodars. Female members of the family often possess great powers. This mixture of southern and northern blood makes the Kislevites seem exotic and dangerous to the people of the Empire.

Many of the Tzar's subjects are fierce nomadic horsemen and hunters rather than settled farmers and town-dwelling traders. These nomads are the most savage of the Kislevites retaining both the ancient traditions and pure blood of the Gospodars of old. The townships of Kislev are built mainly of huge timbers. Good building stone is rare whilst tall pine trees are plentiful. Only the largest cities have stone walls and imposing civic buildings constructed from masonry. Gilded domes distinguish the temples of the strange Kislevite gods from those of the Empire.

For many years the Tzars of Kislev have enjoyed the friendship of the Emperor and the goodwill of the Dwarfs. The present ruler is the Tzarina Katarina - a great sorceress known throughout the Old World as the Ice Queen of Kislev. In her the old powers of the Khan-Queens have resurfaced and she is both abhorred and feared by her people, especially by the nomadic tribes who believe her to be favoured by the ancient gods of the Gospodars.

Kislev Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Winged Lancers	Cavalry	3	3	5+	-	3	110	-/3	*1
Horse Archers	Cavalry	3/1	3	6+	-	3	75	2/-	*2
Cossacks	Cavalry	3/1	3	5+	-	3	95	-/2	*2
Bowmen	Infantry	3/1	3	0	-	3	55	-/-	*3
Red Guard	Infantry	3/1	3	5+	-	3	90	-/1	*4
Axemen	Infantry	3	3	6+	-	3	45	2/-	-
Bears	Infantry	5	4	0	-	3	90	-/1	*5
War Wagon	Artillery	4/4	4	4+	-	1	125	-/1	*6
General	General	+2	-	-	9	1	125	1	-
Hero	Hero	+1	-	-	8	1	80	-/2	-
Shaman	Wizard	+0	-	-	7	1	45	-/1	-
Bear	Special Mount	+1	-	-	-	-	+10	-/1	*7
Yozhin	Monstrous Mount	+1	-	-	-	-	+40	-/1	*8
Tzarina	Special Bonus	+0	-	-	-	-	+25	-/1	*9

Special Rules

1. Winged Lancers. Winged Lancers receive +1 Attack in the first round of every combat when fighting to the front and are Immune to Terror.

2. Horse Archers, Cossacks. Kislevite Horsemen have a shooting range of 15 cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

3. Bowmen. One unit of Bowmen per full 1000 points can replace a unit of Axemen while still counting for Axemen min/max value.

4. Red Guard. In addition to traditional Kislevite long axes Red Guard are armed with handguns. Count enemy armour values as one worse than normal when shot by a handgun. So an armour value of 3+ counts as 4+, 4+ as 5+, and 5+ as 6+, whilst an armour value of 6+ can't save against a handgun.

5. Bears. Bears are defined as infantry for rules purposes as this gives them the appropriate mobility for such creatures, but they add +1 Attack when they charge an enemy in the open in the same way as monsters and chariots.

A Bear unit can only give support and be supported by other Bear units and must pursue retreating enemy where possible and must advance if they are able to do so. Also, Bears never count as defended outside a dense terrain.

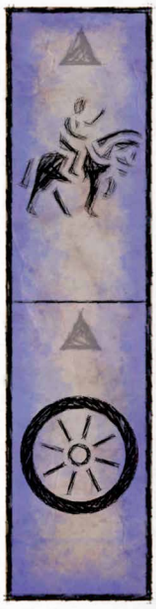
Note that these rules apply only to Bear units - not to characters riding a Bear or Shamans that have transformed in Monster Bear.

6. War Wagon. The War Wagon consists of a wagon stand and a horse team stand. The unit must always be in one of two formations: a column with the horse team in front of the wagon, or a laager with the horse team placed beside the wagon edge to edge.

The War Wagon cannot charge and moves 20cm at full pace. A War Wagon unit moving more than 5 cm must end its move in a column formation. After a successful order, if at least one stand moves no more than 5cm, the unit may end its move in laager formation. The War Wagon may enter laager formation as part of an evade, following the 5cm movement restriction.

Uniquely, the War Wagon attacks are shared between the stands. A total of 4 melee attacks that can be directed from either the horse team or wagon stand and a total of 4 shooting attacks with 360 vison. Count enemy armour values as one worse than normal when shot by a War Wagon.

A War Wagon in column formation cannot pursue. Unlike other artillery it can retreat from combat and is not destroyed if forced to do so.



A War Wagon in laager formation counts as a defended unit, with no sides or rear. It cannot make way. It cannot be driven back or routed by shooting, but roll for (defended) drive backs to see if it becomes confused.

A War Wagon in laager formation will neither pursue nor retreat. If obliged to retreat, it instead remains in place, is not destroyed, continues to count as defended, and enemy stands do not receive any pursuit bonuses against it in subsequent rounds of combat.

Either stand can be removed as causality. If the horse team stand is removed, the wagon stand will count as in laager formation for the remainder of the game. If the wagon stand is removed, the remaining horse team stand has no armour, no attacks, and counts as in column formation.

Any Kislev infantry unit with a side edge of one stand touching wholly the short edge of a laagered wagon stand counts as defended for shooting and combat. This advantage applies only in the first round of combat.

7. Bear Mount. Generals, Heroes and Shamans can ride a Bear mount. The Bear adds +1 Attack to that of its rider.

8. Yozhin. This creature lives in swamps near the Praag since the great incursion of Chaos. Yozhin strongly hates any kind of Chaos, being (possibly) chaos-twisted creature itself. Only powerful Shamans may summon a Yozhin and make it to fight on their side. A single Shaman in the army can be assisted by Yozhin. There is no restriction for going into any water/boggy/swamp terrain for him. A unit that has been joined by a Yozhin riding Shaman causes terror in its enemies. Yozhin adds +1 Attack to Shaman's attacks value.

9. Tzarina. The General may be a Tzarina of the royal blood - perhaps Tzarina Katrina herself. The Tzarina rides a horse-drawn sled - note this is not a chariot! The Tzarina can cast spells like a Wizard and can carry a magic item restricted to a Wizard if desired. Once during the battle the Tzarina can add +1 to the dice when attempting to cast a spell. The player must announce that the Tzarina's special spell casting bonus is being used before rolling for the spell.

Kislev Spells

MONSTER BEAR!

5+ to cast.....Range N/A

The Wizard transforms himself into a gigantic ferocious supernatural bear and hurls himself into the enemy's ranks.

The Wizard can cast this spell on himself if he has joined a unit that is engaged in combat. The spell lasts for the duration of the following Combat phase.

The unit causes terror and the Wizard gains a further +2 Attack bonus that he adds to the unit in the regular way. Note that if the Tzarina uses this spell she adds +4 Attacks: +2 as General and +2 from Monster Bear.

ICY BLAST

5+ to cast.....Range 30cm

An icy blast shoots from the Wizard's outstretched arm and strikes his foes.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat. The Icy Blast is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by an Icy Blast as with ordinary shooting.

CHILL

4+ to cast.....Range 30cm

A fierce chill envelops the unit, freezing its warriors and hindering its ability to fight.

This spell can be cast upon an enemy unit that is engaged in combat and which is within range. The Wizard does not have to be able to see the target to cast the spell. The spell lasts for the duration of the following Combat phase. Every stand in the unit, including characters that have joined the unit, deducts -1 from its Attacks value.

FREEZE

6+ to cast.....Range 60cm

An ill wind turns the enemy so brittle that wood, flesh and even iron shatters and falls to the ground in splinters.

This spell can be cast at an enemy unit within range regardless of whether the Wizard can see it or not. The spell cannot be directed at a unit engaged in combat.

Roll a D6. If the score exceeds the number of hits that the target troop type has then one stand is destroyed. If not then the target is unscathed. If a stand is destroyed it is removed as a casualty. A unit cannot be driven back by Freeze.

Dark Elves

Over five thousand years ago a great civil war erupted amongst the Elven Kingdoms on the island-continent of Ulthuan. Upon one side were the supporters of the Phoenix King whilst upon the other were the supporters of Malekith Lord of Nagarythe. Malekith was the son of Aenarion - the first and greatest of the Phoenix Kings - and his mother was a powerful and influential sorceress called Morathi. Many fair-minded Elves believed that Malekith was the rightful heir to the Phoenix throne. They remembered that he had fought valiantly against the daemontides of Chaos and his noble appearance recalled that of his mighty father.

Morathi nurtured a huge ambition to rule and her son was to provide her with the means to achieve power. She was prepared to go to any ends to realise her ambitions and was fearless and proud even in the face of the gods themselves. She was also skilled in all the arts of magic and especially in the lore of daemons and all manner of necromancy. Unbeknown to the common folk, her mastery of the dark powers earned her the admiration of many who believed that such forces could be harnessed and used to empower the Elves. Her followers grew in number and she became so bold that the forbidden gods were worshipped openly in the temples of Nagarythe and many flocked to join the new cults.

Thanks in part to his mother's efforts Malekith's cause prospered even as darkness and corruption spread amongst the elves. As Malekith's influence grew he came to believe himself indestructible. So certain was he of his divine destiny that he decided to pass into the flame of Asuryan to prove his right to rule.

By this rite the greatest of the Elven gods grants power and divine authority to the true kings of Ulthuan. But the Elven gods were not bowed by Morathi's power and the flame rejected her son. Malekith was not killed, but his body was badly burned and afterwards he made a suit of black armour that he wears to this day. Seriously weakened, blackened of body, his mind warped by pain and resentment, Malekith gave up all pretence of rightful lordship and chose instead to impose his will by force of arms alone.

The long, bitter and bloody war that followed became known as The Sundering – for its result was to divide the Elf race. From then on the High Elves of Ulthuan, the Wood Elves of the abandoned Elf colonies in the Old World, and the Dark Elves of Malekith would develop separately. The Dark Elves were eventually driven out of Ulthuan. The land of Nagarythe and a great part of the other western lands of Ulthuan were torn apart by great magical upheavals as the rival sides battled for supremacy. Nagarythe finally sank beneath the waves. Malekith and his supporters fled to the northern part of the New World where they founded their own kingdom in exile upon the borderlands of Chaos. This they named Naggaroth - which means Land of Chill in Elvish.

From his icy realm Malekith broods over his lost kingdom and weaves dark spells against his enemies. His ships harass those of the High Elves, his raiders harry the coasts of Ulthuan and the Old World, whilst his generals plan to return to their homeland and win the Elven Kingdoms for their dark master. In the land of Naggaroth the Dark Elves raised temples to all manner of blood-thirsty Daemons. Witch Elves roam the night searching for sacrifices, breaking into homes to steal away children, and murdering those foolish enough to walk abroad beneath the stars. Under the evil gaze of Morathi thousands are sacrificed upon the altars of Khaine while to this day she preserves her unholy youth by bathing in the blood of innocents.

Dark Elf Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Spearmen	Infantry	3	3	5+	-	3	60	2/-	-
Crossbowmen	Infantry	3/2	3	6+	-	3	75	1/-	*1
Witch Elves	Infantry	5	3	0	-	3	70	-/2	*2
Dark Riders	Cavalry	3/2	3	6+	-	3	95	-/3	*1
Cold One Knights	Cavalry	3	3	4+	-	3	130	-/3	*3
Harpies	Monster	2	3	6+	-	3	65	-/1	*4
War Hydra	Monster	6/2	4	4+	-	1	125	-/1	*5
Bolt Thrower	Artillery	1/3	2	0	-	2	55	-/1	*6
General	General	+2	-	-	10	1	155	1	*7
Hero	Hero	+1	-	-	8	1	80	-/1	-
Sorceress	Wizard	+0	-	-	8	1	80	-/1	-
Manticore	Monstrous Mount	+2	-	-	-	-	+80	-/1	*8
Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	-
Cauldron of Blood	Chariot Mount	+2	-	-	-	-	+15	-/1	*9

Special Rules

1. Crossbowmen and Dark Riders. These units are equipped with the repeating crossbow. These units shoot once at ranges up to 30cm and twice at ranges up to 15cm. A unit of three stands would therefore shoot 6 Attacks at a target within 15cm and 3 Attacks at a target at greater ranges. Units may shoot at enemies that charge them - in which case they shoot 1 Attack per stand regardless of range.

2. Witch Elves. A unit of Witch Elves always uses its initiative to charge an enemy if possible and cannot be given orders instead. Witch Elves never use their initiative to evade. The unit cannot be driven back by shooting and never roll for drive backs. If victorious in combat they must pursue or advance where possible. Witch Elves are unaffected by enemies that cause terror in combat and do not suffer the usual -1 Attack modifier.

3. Cold One Knights. Such is their unthinking instinct to take a bite out of anything that passes, Cold One Knights have an Attack value bonus of +1 in the first round of each combat when fighting to the front, i.e. the Cold One Knights' stand has to touch the enemy in arc of sight with its frontal edge and/or frontal corners (including contact by frontal corner only). For the same reason Cold One Knights cannot form brigades except with other units of Cold One Knights.

4. Harpies. Harpies are based facing the long edge of the base in the same way as infantry, rather than the short edge like other monsters. Harpies can fly. A unit of harpies cannot be joined by a character.

5. War Hydra. War Hydras are so aggressive that they cannot be included as part of a brigade not even with other War Hydras. They cause terror in their enemies. The War Hydra can breath fire with a range of 20cm and 2 Attacks that are worked out in the normal way. Once all hits have been struck for that round, and assuming it has not been slain, the War Hydra automatically regenerates 1 hit that it suffered that round. A hit that is inflicted and subsequently regenerated still counts towards the results for that round.

6. Bolt Thrower. Dark Elf Bolt Throwers are Elven Bolt Throwers. See Rulebook p.75.

7. General. Dark Elf commanders are masters of manipulation and cruelty - this makes them uncompromising in their dealings with subordinates! If a Dark Elf Hero or Sorceress rolls a double 6 when issuing orders then the General must either lose 1 level of Command value (i.e. drop from 10 to 9) or execute the failed underling - in which case the character is removed as a casualty but does not count towards the enemy's victory points. In addition, if the General rolls a 'blunder' (ie a double 6) then the General automatically loses 1 level. Regardless of these penalties a General can only drop 2 levels (to a minimum of 8) after which all subordinates who blunder are executed and any 'blunders' rolled by the General merely end the phase as normal.

8. Manticore. Generals, Heroes and the Sorceress can ride a Manticore. The Manticore can fly increasing the rider's movement to 100cm. An extra +2 Attacks are added to those of the rider. A unit joined by the character causes Terror.

9. Cauldron of Blood. A Sorceress can have a Cauldron of Blood. A Sorceress with a Cauldron of Blood suffers a movement reduction to 30cm. The army can only ever include one Cauldron of Blood and it can only be included if there is at least 1 unit of Witch Elves in the army. The Cauldron of Blood adds +2 Attacks to the Sorceress and can be used to add +1 to the Sorceress's dice roll to cast a spell once per battle. The player must announce that the Cauldron of Blood's spell bonus is being used before rolling the dice to determine if the spell is cast.

Dark Elf Spells

DOOM BOLT

5+ to cast.....Range 30cm

A bolt of pure malicious darkness arcs from the Sorceress's fingertip and stabs towards the foes of the Dark Elves.

Draw an imaginary line 30cm long from the Sorceress's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily effect several units and will affect all units that fall beneath the line (including your own). Unengaged units can be driven back by a Doom Bolt as with ordinary shooting (even including friends). Engaged units cannot be driven back by the Doom Bolt but carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

BLACK HORROR

6+ to cast.....Range 50cm

A whirling vortex of dark enemy surrounds and drags its victims into the infernal realms of Khaine the Lord of Murder.

This spell can be cast upon an enemy unit the Sorceress can see and which is not engaged in combat. The units suffers 4 Attacks with no saves for Armour. A unit that takes hits from the Black Horror is not driven back as a result - the whirling vortex sucks its victims down affording them no chance to avoid it.

DOMINION

4+ to cast.....Range 60cm

Upon invoking the curse of the foul god Khaine an unnatural and unbearable agony suffuses the body of his foes.

This spell can be cast on any enemy unit within range regardless of whether the Sorceress can see it or not.

The spell takes affect until the end of the opposing player's next turn.

Whilst the spell lasts the unit cannot charge and if engaged in combat will not pursue or advance. Even units that are otherwise obliged to charge, pursue, or advance will not do so if affected by Dominion.

SOUL STEALER

5+ to cast.....Range N/A

Invoking the daemons of the abyss the Sorceress tears the very souls from her enemies.

The Sorceress can cast this spell if she has joined a unit in combat. The spell can be cast on any single enemy unit that is touching the unit the Sorceress has joined.

The target unit takes three attacks worked out in the usual way. Targets get no armour saving throws when they suffer hits from the Soul Stealer - all Armour values count as 0. Any hits scored are carried over into the first round of combat and count as having been struck in the first round for purposes of working out combat results.

Daemons

The world is awash with unseen magic that comes from the dark dimension between time and space. It was introduced into the world when the great intra-spatial gateways of the Old Ones collapsed, creating a rift in space and spewing magically volatile warp-matter over the whole planet. Magic is a malleable energy that can be harnessed and wielded, but the very act of doing so reshapes and changes everyone and everything it comes into contact with. Whether used for good or ill, magic is ultimately corrupting and dangerous.

The ancient gateways continue to leak raw magic from the dark dimension to this day. The dark dimension is home to things of an altogether different order to mortal creatures. These are not living creatures of flesh but a network of ethereal forces whose consciousnesses continually flow and interchange. Individuality and linear thought are meaningless concepts in the dark dimension. In that timeless, spaceless, nothingness there is only endless being: a single moment extending through all eternity.

Just as magic pollutes and disfigures the material world so the dark dimension is reshaped by the world of mortals. Thought, ambition, emotion and other gross forms of individual consciousness leak from the material universe. This focused consciousness overwhelms and transforms the naturally guileless intelligence of the dark dimension. It becomes aware. It coalesces into a kind of distinct consciousness. Things stir in the dark dimension. Gods, daemons and spirits are made manifest in the stuff of the warp. Reshaped in turn by these newly created consciousnesses other lesser beings are created, and so it goes on.

Thus are the gods of the Old World, and the bitterest agents of man's own destruction, self-created from the terror of mankind itself. There may be a thousand gods or a million aspects of a single deity - it matters little. The daemon armies of Chaos constantly reshape and reform in the face of man's ever shifting fears. Most of all men dread the elemental horrors of life, and these are represented by the four great gods of the Marauder tribes of the north. They are worshipped under many names and in many guises but in the lands of the south they are recognised (by those who dare pursue such studies) as the great powers of Khorne the Blood God, Tzeentch the Changer of the Ways, Nurgle the Plague Lord, and Slaanesh the Lord of Pleasure. These are the Great Gods of Chaos of which all other gods are but parts or conjunctions. In the lands of the Empire many a theologist has been burned for saying as much.

Daemon Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Daemon Horde	Infantry	4	3	5+	-	3	75	3/-	-
Daemon Swarm	Infantry	2	4	0	-	3	45	-/4	*1
Daemon Cavalry	Cavalry	4	3	5+	-	3	110	-/3	-

Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*7

Special Rules

ARMY RULES

Ignore Terror. All units ignore the -1 Attack penalty in combat for fighting terrifying troops – you cannot frighten them at all.

Daemonic Instability. At the start of the player's own Command phase, before making any initiatives moves, all friendly Daemon units that have taken at least 1 casualty (i.e. lost at least 1 stand out of 3) must make a 'Daemonic Instability' test. Roll a D6. If the unit has lost 2 stands (i.e. has only 1 stand remaining from 3) and is further away than 20cm from a friendly Daemon Wizard deduct 1 from the roll.

0-1 One stand is destroyed – the daemons fade away and are absorbed back into the Realm of Chaos from which they came. Remove one stand from play. If a character is with the unit and the last stand is removed the character is destroyed too.

2-3 The unit becomes confused - if not already confused the stand becomes confused as it is torn between this world and the next.

4-5 No effect – unless the unit is confused in which case it ceases to be confused as it is favoured with the invigorating power of Chaos.

6 The unit regains one stand. The regained stand is placed directly behind, in front or beside another stand from the same unit, and facing the same direction. If it is impossible to position the stand in in this manner then the stand cannot be added.

SPECIAL RULES

1. Daemon Swarms. These cannot be driven back by shooting and do not roll for drive backs. A Daemon Swarm cannot be given a magic item.

2. Daemon Flyers. These can fly. Daemon Flyers are an exception to the normal conventions for basing monsters in that they face the long edge of the stand in the same way as infantry rather than the short edge as most other monsters.

3. Greater Daemons. Greater Daemons can fly regardless of whether the actual model has wings – aerial propulsion is deemed feasible by sheer effort of will.

Greater Daemons cause terror in their enemies. A Greater Daemon that has accumulated 4-5 hits at the end of the Shooting or Combat phase and is no longer engaged in combat is deemed to have been badly hurt. Once a Greater Daemon is badly hurt accumulated hits are discounted and its Hits and Attacks values are halved for the rest of the battle (to 3 Hits and 4 Attacks).

4. Daemon Overlord. The Daemon Overlord is the army's General and has the option of having the powers of a Wizard for additional 25 points. If given magical powers the Daemon Overlord can be given a magic item restricted to either a General or a Wizard. Note that the Daemon Overlord is still a General and his command range extends over the whole battlefield as for other Generals.

5. Daemonic Wings. Some of the creatures of the deep vaults of hell may have wings, some of them fly on hovering discs and some even have the ability of disappearing and reappearing wherever they want on the battlefield. Daemon characters may be given the ability of flying.

6. Favour of the Gods. Demon Overlord, Lord Heroes or Sorcerers can be given the Favour of the Gods. The character gains then +1 extra Attack and causes terror in its enemies as described in the Warmaster rulebook.

7. Chariot Mount. Generals, Wizards and Heroes can ride Chariots. An extra +1 Attack is added to those of its rider.

Daemonic Spells

SUMMON DAEMONS

4+ to cast.....Range 60cm

With a sulphurous blast of elemental power fresh Daemons emerge from the warp to reinforce their beleaguered kindred.

This spell can be cast on any friendly Daemon unit originally of three stands that has lost one or two stands as casualties. It does not matter whether the Wizard can see the unit or not.

The unit regains one stand. The regained stand is placed directly behind, in front or beside another stand from the same unit, and facing the same direction. If the unit is already in combat the additional stand can be placed so that it touches the enemy and will count as charging if the unit charged. If it is impossible to position the stand in this manner, the spell cannot be cast and will not work.

DAEMONIC RAGE

5+ to cast.....Range 30cm

A keening cry of pure power rises upon daemonic lips as magical energy surges through their eldritch bodies.

This spell affects every friendly unit within range.

The spell lasts during the following Combat phase.

Every unit gains a bonus +1 attack. This attack can be allocated to any stand in the unit and can be allocated to a different stand in each combat round.

SORCEROUS BLAST

5+ to cast.....Range 30cm

With a single gesture a bolt of black lightning leaps from fingertip to the foe, searing the enemy with a blast of dark power.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

The Sorcerous Blast is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by a Sorcerous Blast as with ordinary shooting.

FRENZY OF CHAOS

6+ to cast.....Range 30cm

Rumbling thunderous power surges through the daemonic ranks driving all into a frenzied thirst for blood.

This spell can be cast upon a friendly unit which is engaged in combat and that is within range. The Sorcerer does not have to be able to see the target to cast the spell.

The effect lasts until the end of the following Combat phase.

The unit can re-roll any failed attacks in combat: take any dice that fail to score hits and roll them again. Note that you cannot re-roll a dice that has already been re-rolled either because of a spell, magic item or any other reason.

Vampire Counts

Upon the eastern marches of the Empire lies the blighted land of Sylvania. It is a region dominated by dark forests and bleak mountains. For the most part its inhabitants are poor, for the soil is thin and unprofitable to work, whilst the mountains are devoid of the mineral wealth found in abundance to the south and north. Moreover the land has an unfortunate reputation. Its forests are said to be haunted and the ground itself is thought to carry the contagion of Chaos so that even the dead that are buried in it do not rest easily. Those who live there are few in number, impoverished, malnourished, and utterly lacking in ambition and vigour. The ordinary folk of the land are broken in spirit and live in harsh servitude under callous and uncaring masters.

Although part of the Empire from its inception, Sylvania developed quite separately during the long period of anarchy known as the Age of Three Emperors when all centralised government broke down. In these years a new power arose in Sylvania taking the form of the Counts Carstein. The Carsteins quickly gained a reputation for cruelty that surpassed anything that had ever happened before in the Empire. Throughout the adjoining lands, stories were whispered of ghastly tortures and wanton cruelty, of necromancy and dark magic, and of the haunting of the land by restless spirits. People feared to walk abroad after nightfall for strange creatures stalked the night - creatures that feasted on the blood and flesh of men.

The true nature of the Carsteins emerged during the years that followed the coming of the comet and destruction of the city of Mordheim. It was a time of great contagion when the power of magic waxed strongly throughout the Empire. Harnessing much of that magic the great Vlad Von Carstein raised an army of dead from the poisoned soil and made his bid for the throne of the Empire.

Thus began the Wars of the Vampire Counts in which the dead sought to overthrow the living and the Carsteins sought to rule the whole of the Empire. Had they succeeded the Empire would have become a dead land where the living would exist only as cattle to feed a Vampiric nobility. Vlad almost did succeed but was slain as his undead hordes besieged Altdorf.

Vlad's successors were to continue the war at first led by the insane Konrad Von Carstein and then by Mannfred Von Carstein. The armies of the dead ranged over the lands of the Empire until Mannfred was eventually driven back to Sylvania and defeated at the battle of Hel Fenn. After that battle Mannfred disappeared, presumed destroyed, but his body was never found and rumours of his return haunt the Empire to this day. Following this defeat Sylvania was scoured by the priests of Sigmar and many vampires were hunted out and destroyed. Syvlania itself was claimed by the Count of Stirland and now forms part of that province.

It remains a land of dread where the downtrodden peasantry still live in terror of the night and the things that walk beneath the moon.

Special Rules

ARMY RULES

The following rules for Undead apply to all units except for Ghouls. Ghouls are considered to be ordinary mortal troops and the following rules do not apply to them.

Undead. Undead units never act on initiative. An Undead unit only moves in the Command phase if given orders (aside from Fell Bats which can 'home back' as noted below). This also mean an Undead unit cannot make a supporting charge to support an unit of Ghouls charging on initiative.

Undead units are unaffected by the -1 Command penalty for enemy within 20cm.

Undead units are unaffected by the -1 Combat penalty for fighting terrifying troops.

Undead units are unaffected by the Confusion rule - they cannot become confused for any reason.

SPECIAL RULES

1. Ethereal Host. Ethereal Host Attacks always inflict a hit on a score of 4+ regardless of whether the enemy is in the open, defended, or fortified. Enemy otherwise count as in the open, defended, or fortified in all respects (i.e. charge bonuses count or don't count depending on status). Ethereal hosts cannot be driven back by shooting and do not roll for drive backs. They cause terror as described in the Warmaster rulebook. Ethereal Hosts cannot have magic items.

2. Dire Wolves. If the unit charges against an enemy in the open it receives an additional +1 Attack modifier in the same way as chariots and monsters. Dire Wolves cannot have magic items.

3. Fell Bats. Fell Bats can fly. Although they cannot use initiative they are allowed to home back as described in the Warmaster rulebook. No order is required to home back. Fell Bats are an exception to the normal rules for basing monsters, in that they are based along the long base edge in the same way as infantry, rather than the short edge like other monsters.

4. Vampire Lords. These are powerful sorcerers as well as the army's general. They can cast spells in the same way as a Wizard and can be given a magic item restricted to either a General or a Wizard. Note that the Vampire Lord is still a General and his command range extends over the whole battlefield as for other Generals.

5. Winged Nightmare. Any character can ride a Winged Nightmare. A Winged Nightmare can fly increasing its rider's move to 100cm and adding +2 to its rider's attacks. A unit joined by a character riding a Winged Nightmare causes terror in its enemies.

6. Black Coach. A Vampire Lord or Vampire can be mounted within a Black Coach adding +1 to its occupant's attacks. A unit joined by a character riding in the Black Coach causes terror in its enemies.

RAISE DEAD

5+ to cast.....Range 30cm

At the Wizard's beckoning the mangled corpses that litter the battleground rise from the dead to continue the slaughter.

This spell can be cast upon a combat engagement taking place within 30cm of the Wizard. The spell can be cast regardless of whether the Wizard can see any units in the combat engagement or not. A single combat engagement only can be affected once by this spell in any turn regardless of how many units are involved in the combat. For purposes of deciding whether a combat is eligible as a target, combat engagements are as they appear when the dice to cast the spell is rolled: so it is possible for pursuit or advances to bring two units of raised dead into the same engagement later on.

A Skeleton unit of three stands is created. Each stand in the raised unit must be placed so that its front edge contacts an enemy stand from the targeted engagement, or that it supports a friendly stand from the same engagement, including raised stands. The placement of stands may not split up the engagement into multiple smaller engagements. If raised stands come into contact with unengaged enemy units, those units will join the engagement after the raised unit is placed, similar to incidental contact during pursuit. If it is impossible to position all stands in combat or support then the unit is not deployed and the spell fails. Raised dead do not count as charging in the first round of combat. Raised dead are ignored for working out break point and victory points at the end of the game.

VANHEL'S DANSE MACABRE

5+ to cast.....Range 40cm

The bodies of the dead move under the powerful influence of necromantic magic renewing their vigour once more.

This spell can be cast on any friendly unit apart from Ghouls. The spell can be cast on a unit within range regardless of whether the Wizard can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible.

The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it: they remain where they are.

DEATH BOLT

5+ to cast.....Range 30cm

A fearsome bolt of sorcerous lightning flies from the Wizard's outstretched finger tips and strikes an enemy unit.

The Necromancer must be able to see his target to cast this spell and it cannot be directed against a unit in combat. The Deathbolt is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by Deathbolt as with ordinary shooting.

CURSE OF YEARS

6+ to cast.....Range N/A

The Wizard's enemies crumble to dust as he smites them with the corrupting Curse of Years.

The Wizard can cast this spell if he has joined a unit in combat. The spell can be cast on any single enemy unit that is touching the unit the Wizard has joined.

The target unit takes six attacks worked out in the usual way. Any hits scored are carried over into the first round of combat and count as having been struck in the first round for purposes of working out combat results.

ش Araby

The land of Araby lies along the north west coast of the Southlands between the Atalan mountains and the Great Ocean. To the east is the Great Desert that separates Araby from the Lands of the Dead. Although the climate is dry and hot the western winds carry moisture-laden clouds that give up their water as they are suddenly forced upwards by tall Atalan peaks.

The Arabians are great sailors and have for many centuries fished the adjoining seas and traded south along the coast, northwards to the Old World, and westwards as far as Ulthuan. The High Elves do not permit Arabian vessels to travel further west than Ulthuan itself, their high-prowed dhows are a common sight in the outer harbours of Lothern. For their part the High Elves maintain a mercantile presence in Copher and Lashiek as they have since time immemorial. The Elves and men of Araby had dealings even during the long centuries when the Elves abandoned the Old World.

The mostly densely populated part of Araby lies to the north of the River of the Serpent; the largest waterway in the land and one of the few rivers that flows all year long. This land is home to four great cities: Lashiek, Copher, Martek, and Alhaka or (as it is sometimes rendered) Al-haikk which means City of Thieves in the Arabian tongue. Each of these cities and the surrounding lands forms an independent principality ruled over by a Sultan or Caliph. South of the River of Serpents the land is not so fertile and the terrain is much dryer. East of the Atalan mountains the great desert stretches for hundreds of miles towards the Land of the Dead.

Araby lies far from the world's poles and therefore from the ultimate source of the magical winds that blow from the north. As a result magic that is common in the Old World is far more diffuse in Araby so it is much more difficult for sorcerers to work their spellcraft. Arabian magic has therefore developed quite differently than that of other men. Arabian sorcerers use their powers to control elemental spirits of the desert, djinn, efreets, genies and such-like spirits. These spirits are worshipped by the superstitious people of Araby. It is commonly believed that the spirits must be appeased with prayers and small tokens of respect such as gifts of food and drink.

The rulers of Araby maintain their own armies based upon the great cities and tributary tribes that live in the surrounding lands. The leaders of these tribes are called Emirs or, amongst the desert tribes of the south and east, Sheiks. The rulers of cities and their surrounding lands are called Sultans and the Sultan of Alhaka is the acknowledged overlord of all the other cities of Araby. In consequence he is also known as the Great Sultan - the ruler of all Araby.

The Sultans are proud of their troops and especially of their cavalry. It is popularly supposed that the horses of Araby are descended from Elven horses brought over from the west many centuries ago. They are graceful and swift creatures and very highly valued. The very best of the Arabian foot soldiers are also well equipped, with steel armour, keen tulwars, gleaming helmets, and fine silk clothing. These household troops or guards accompany the Sultans when they travel beyond the grounds of their magnificent palaces. The loyalty of these troops is famous. They are amply rewarded with riches, luxuries, and prestige as a result. As well as these regular and garrison troops there are the irregular fighters from the desert tribes, including camel mounted warriors from the lands to the south and east.

Araby Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Spearmen	Infantry	3	3	6+	-	3	45	2/-	-
Bowmen	Infantry	3/1	3	0	-	3	55	2/-	-
Guards	Infantry	3	3	5+	-	3	65	-/4	*1
Knights	Cavalry	3	3	4+	-	3	110	-/-	-
Desert Riders	Cavalry	3/1	3	6+	-	3	75	-/-	*2
Camel Riders	Cavalry	3/1	3	5+	-	3	100	-/2	*3
Magic Carpets	Cavalry	1/2	3	6+	-	3	85	-/1	*4
Elephants	Monster	5	4	5+	-	3	200	-/1	*5

Elephant	Monstrous Mount	+2	-	-	-	-	+65	-/1	*7
Djinn	Monstrous Mount	+2/+2	-	-	-	-	+90	-/1	*8

Special Rules

1. Guards. The Sultan's Guards are so unquestioningly loyal that they will obey the first order given to them each turn on the Command roll of 10 or less so long as the order comes from the General himself. No penalties are applied to this order. Further orders are given using the General's normal command value and penalties. This applies only to Guards and not to brigades that include Guards and other units.

2. Desert Riders. Desert Riders have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

3. Camel Riders. Camel Riders ignore distance modifiers when commands are issued to them. This applies only to Camel Riders and not to brigades that include Camel Riders and other units. Remember that characters are still bound by their maximum command ranges and cannot issue orders to units beyond range. This represents their fierce self-reliance and their mounts' instinctive sense of direction allowing them to operate effectively far from their own battle lines. Because Camels are such intractable creatures all orders are issued with a Command penalty of -1, this penalty applies to any unit of Camel Riders or to any brigade that contains one or more units of Camel Riders.

4. Magic Carpets. Magic carpets can fly – they have been rated as aerial 'cavalry' as this is the closest categorisation to their type. Because they are awkward flyers, they can be pursued by any type of enemy troops. They have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

5. Elephants. Elephants cause terror and cannot be brigaded with cavalry. If an Elephant unit would for any reason become confused, it will stampede instead. Their stampede ceases at the end of their player's next Command phase. Stampeding Elephants cannot be given orders or use initiative. At the beginning of the Command phase, prior to resolving any movement generated by Initiative, roll one D6 for each affected unit:

1-2: Move towards the nearest enemy unit as far as possible. If they contact an enemy unit they charge; a friendly unit, they burst through.

3-4: Move directly away from the nearest enemy unit as far as possible. If the elephants contacts an enemy unit, they charge; a friendly unit, they burst through.

5: Move towards the nearest friendly unit as far as possible. If the elephants contacts any unit (friendly or enemy), they charge.

6: Move directly away from the nearest friendly unit as far as possible. If the elephants contacts any unit (friendly or enemy), they charge.

A stampeding Elephants that charges will fight in the Combat phase. It counts as 'enemies' for the duration of the combat. If the Elephants win a combat round they must pursue if possible and will continue to do so each round. Should their opponents be destroyed, they will not advance but will halt.

6. Flying Carpet. This is considered to be a flying chariot mount.

7. Elephant. The Elephant mount is a standard monster mount except that a character mounted on an Elephant cannot join a unit of friendly cavalry. A unit joined by a character riding an Elephant causes Terror.

8. Djinn. The Djinn accompanies its master and can transform both of them into a whirlwind enabling the stand to fly as for a normal flying mount. If the Wizard has a Djinn he can also cast the Curse of the Djinn spell with a +1 casting bonus (see spells). Note that unusually the Djinn has +2 shooting attacks - these are added to a stand from a unit that the character has joined and can only be used when the character joins a unit. If the Wizard is accompanied by a Djinn then any unit he joins causes Terror.

Araby Spells

SAND STORM

4+ to cast.....Range 30cm

The Wizard commands the desert spirits to engulf his foes in a swirling cloud of choking sand and dust.

The spell is cast upon the Wizard himself and affects all enemy units within 30cm of the stand. The spell lasts until the end of the opposing player's following turn.

The spell affects the opposing army's ability to issue commands. All enemy units within 30cm of the Arabian Wizard suffer a -1 Command penalty. This penalty is applied when each order is issued. For example, a unit might therefore be within 30cm of the Sorcerer for one order but not for a second, for example.

MIRAGE

4+ to cast.....Range 60cm

The Wizard creates the illusion of a huge host of fearsome warriors, bearing down inexorably upon his startled foes.

To use this spell the player will need an additional unit chosen from the Araby list - this can be infantry, cavalry or monsters it does not matter which. This unit becomes the 'illusion' and is immediately placed within 60cm of the Wizard and more than 20cm from any enemy units. The illusionary unit cannot move or fight - for it isn't really there! However, the illusionary unit is treated as if it were real by the enemy up until such time as an enemy unit charges into contact with it, touches it as an incidental contact during combat, advances upon it, or brings it into combat in any other fashion. This means, for example, Command penalties are suffered for proximity, and enemy shooters are obliged to target the illusion if it is the closest target - it cannot be harmed of course! The illusionary unit is also dispelled immediately if the Araby player moves any of his units or characters through it.

Whilst the Mirage unit is on the battlefield the Wizard cannot cast any other spells - if the player wishes the Wizard to cast a new spell the Mirage comes to an end and the Wizard can then attempt a new spell as normal.

SUNSTRIKE

5+ to cast.....Range 30cm

Bright beams of burning energy leap from the Wizard's eyes and scythe through all before him.

Draw an imaginary line 30cm long from the Wizard's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth. Each unit under the line takes three shooting attacks worked out in the usual way - all relevant modifiers are applied. Note that this spell can easily affect several units and will affect all units that fall beneath its path (including you own). Unengaged units can be driven back by Sunstrike as with ordinary shooting whether friend or foe. Engaged units cannot be driven back but carry over any hits that are scored into the first round of combat. Hits caused by the Sunstrike count as having been struck in the combat itself.

CURSE OF THE DJINN

6+ to cast.....Rage 30cm

The Wizard channels the immense power of the Djinn through his own body and lays a terrible curse upon his foes.

The Wizard may cast this spell on an enemy unit within range. The target unit must re-roll all successful armour saves for the duration of the following close combat phase.

If the Wizard has a Djinn then he adds +1 to his dice roll when casting this spell, and therefore casts successfully on a 5+.

Dogs of War

Unlike other Warmaster armies, the Dogs of War do not come from a particular place, nor do they comprise a particular race, although men do feature very strongly amongst their number. They are bands of warriors who live by fighting - fighting for pay, fighting for adventure and, most importantly of all, fighting for the chance to win fabulous wealth. Some are merely bandits, pirates and cut-throats of the most untrustworthy kind, but others are gallant Princes and buccaneers who lead bold warriors to adventure and conquest in faraway lands.

As already explained, not all mercenaries are human, although many are. Amongst the Dogs of War, freebooters from the frozen wastes of Norsca rub shoulders with Corsairs from Araby and mysterious warrior monks from the east. Mercenaries commonly form into itinerant bands under the leadership of a charismatic or especially brutal leader. The most famous of these bands are, more often than not, known by the name of their leader, such as Hagar Whitefang's Were-Marauders, Khalag's Sure Shots, and the renowned Golgfag's Ogres. An entire army of Dogs of War is made up of many of these bands under the overall leadership of a roguish mercenary general.

Mercenary armies of Dogs of War fight all over the world. They are drawn to places where fortunes can be won by ruthless adventurers. The treasure-houses of the Lizardmen in Lustria are a major prize and have attracted many a would-be conqueror, such as the crazed Piaza Pizzaro and the near-legendary Sven Hasselfriesian. Further east the mysterious Dragon Isles and the shadowy lands of Cathay have tempted soldiers of fortune such as Count Egmund Baernhof and the infamous Thorson Grint. South to the Southlands and the legendary treasures of Karak Zorn, eastwards to Cathay, and west to the treasure-houses of Lustria, the world is truly awash with rag-tag armies of sellswords who nurture wishful dreams of empire!

Although Dogs of War ply their bloody trade to every point of the compass, the most notorious breeding-ground of mercenaries is the land of Tilea in the Old World. From all the kingdoms of the Old World and many lands beyond, sellswords come to Tilea where they can be assured of ready and profitable employment. The reasons for this are quite obvious. Tilea is an anarchic and largely ungovernable country, where selfserving individuals rule precariously over proudly independent cities. The real power lies with wealthy Merchant Princes who plot and scheme against the tax-gathering authorities and each other with almost equal enthusiasm. Indeed, such is the tradition in Tilea that all armies of any size are mercenary armies - paid for and deployed by a wealthy Prince, a devious merchant or some ambitious tyrant.

Tilea is also a melting-pot to which all kinds of mercenaries come with the notion of joining whatever overseas adventure is flavour of the month. Such ventures are sometimes funded by wealthy merchants keen to open up new trade routes east and south, but often the whole thing is down to some crazed adventurer with a theory that the world is round, cubed, the shape of a very tall floppy hat, or some other such nonsense. No matter what the motivation, bold armies of Dogs of War depart every few weeks from the ports of Tilea and sail off into the sunset. On the whole they are never heard of again, but just occasionally a ship sails back stuffed to the gunnels with treasure, bearing a few jewel-encrusted survivors back to a new life of ease and luxury.

Dogs of War Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special

Pay Wagon	Chariot Mount	+1	-	-	-	-	+20	-/1	*8

Special Rules

1. Pikemen. The pike is the traditional weapon of the mercenaries of Tilea. Twice as long as a spear and even longer than a cavalryman's lance this is a truly fearsome although rather unwieldy weapon. Pikemen are based facing the short edge of the base in the same way as Cavalry, rather than the long edge like other Infantry. Pikemen can not enter dense terrain (even partially). They still may be in a defended position on higher ground or behind a low obstacle as usual, but can only claim defended status when fighting to the front. An enemy does not receive charge bonuses when charging Pikemen in the front, nor do Pikemen receive any charge bonus themselves. A Pikemen stand cannot support or be supported by other infantry - only by other Pikemen stands. In all other respects they count as infantry (movement/pursuit etc.).

2. Handgunners. A handgun shot can pierce armour far easier than an arrow or a crossbow bolt. Therefore, count enemy Armour values as one worse (-1) than normal. One unit of Crossbowmen per full 1000 points can be replaced by Handgunners (including the 10 points extra in price) while still counting for the Crossbowmen min/max value. Note that this unit still counts for the min/max value of Handgunners.

3. Ogres. Ogres flock to Dogs of War armies for the chance of a good fight and as much as they can eat. These creatures are notoriously fond of fresh human meat, although they will eat practically anything that was once alive (or still is). To represent this an Ogre unit must use its Initiative to charge an enemy unit of humans (humans... Men not Dwarfs, Elves etc.) if it is within 20cm at the start of the Command phase and the Ogres can reach it. This happens automatically.

4. Light Cavalry. Dogs of War armies make great use of expert light cavalry from all around the world. Empire Pistoliers, Arabian Desert Riders, Hobgoblin Wolf Riders and Kislev Horse Archers are particularly adept at outmanoeuvring an enemy and harrying his flanks. Light cavalry has a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

5. Galloper Guns. These are lighter artillery than Dwarf or Empire cannons; due to this they are shorter ranged, but can make up for their lighter shot by producing a higher volume of fire. Galloper Guns move 20cm (10cm half-pace). All the normal rules for artillery apply as well as cannon's rules for shooting (bounce through, no saves and reduction of cover values - see Rulebook p.74). Because they are light guns they have a range of only 40cm. They still may shoot at the charging enemy by firing 'grapeshot' as normal.

6. Giants. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately.

Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must

consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

7. Birdmen. Only half-mad nutters like Tileans would try to fly! The Birdmen wear insane contraptions of light wood covered in canvas that are shaped like wings and allow them to glide on the air currents. These 'wings' allow the Birdmen to fly and still use their crossbows as normal. Because they are awkward flyers, they can be pursued by any type of enemy troops. Birdmen are based facing the long edge of the base in the same way as other infantry.

8. Paymaster, Pay Wagon. There may only ever be one Paymaster in the army. Only the Paymaster may use the Wagon. If the Pay Wagon is used the Paymaster may bribe the units around him to fight harder. He may add +1 to all of his Command checks for a single turn only.

9. Griffon. Generals, Wizards and Heroes may ride Griffons. The Griffon combines the appearance of a lion and an eagle. These creatures are hatched from stolen eggs and hand-reared to serve as mounts for favoured individuals. The Griffon can fly, increasing the rider's movement to 100cm and it adds +2 Attacks to those of the rider. A unit which includes a Griffon causes terror in its enemies.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

BALL OF FLAME

5+ to cast.....Range 30cm

A ball of flame shoots form the Wizard's outstretched arm burning all in its path.

Draw an imaginary line 30cm long from the Wizard's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily affect several units and will affect all units that fall beneath the line (including your own). Unengaged units can be driven back by a Ball of Flame as with ordinary shooting (even including friends). Engaged units cannot be driven back by the Ball of Flame but carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

VOICE OF COMMAND

5+ to cast.....Range 30cm

The Wizard's voice booms out across the battlefield directing troops above the tumult of combat with the magical Voice of Command.

The spell can be cast on any unengaged friendly unit within range regardless of whether the Wizard can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible.

The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it: they remain where they are.

WEIRD ENCHANTMENT

4+ to cast.....Range 30cm

A weird enchantment forms around the target unit and engulfs it in strange lights, scary nightmares and disorientating special effects.

This spell can be cast on any enemy unit within range regardless of whether the Wizard can see it or not. The spell lasts until the end of the opposing player's following turn.

The unit moves at half pace in all situations: even when charging for example. The unit counts all enemies as terrifying (-1 Attack penalty) even when it is otherwise immune to terror. If the unit would normally cause terror then it ceases to do so and counts all enemies as terrifying just like everyone else. However, if the target is Undead or Daemon it will not count enemies as terrifying although all other penalties apply as described (Undead and Daemons are hard to spook).

TELEPORT

2+ to cast.....Range N/A

With a swirl of his cloak, a crack of thunder and just a hint of maniacal laughter the Wizard vanishes to reappear anywhere on the battlefield.

The Wizard is moved to a new position anywhere on the table. He can leave or join a unit if he wishes, enabling a Wizard to move into or out of combat for example. Once the Wizard has moved he can cast a second spell, but note this must be a different spell and not a further Teleport! Roll to cast the second spell as normal. A Wizard that Teleports successfully can therefore potentially cast two spells that turn.

Ogre Kingdoms

Far to the east of the Old World lie the savage Ogre Kingdoms. Among the frozen and desolate mountains of this realm live the Ogres – ugly, violent monsters who kill and eat anything they can catch.

An Ogre Kingdoms army is a massive, blunt instrument that smashes into enemy lines with the force of a ton of bricks. It is a hard-hitting army that will normally be vastly outnumbered on the battlefield. Nevertheless, with the right combination of Ogre units led by a fearsome Tyrant an opponent's lines can be ripped asunder by a devastating bull charge even before a single ironbound club is swung. A single Ogre has enough brute strength to destroy a farmstead or village. Thus, the ramshackle armies that march west from the Ogre homelands are powerful enough to destroy empires.

Ogres have been described by scholars as 'thick as two short planks'. They have also been described as having enough intelligence to nail the planks together and beat the observer to a bloody pulp. There is some truth to this, for although the race is unable to create anything of lasting worth, they do have a knack for cobbling together crude weaponry out of whatever is to hand, and even using the machineries of war they take, trade or earn from other races.

That said, the Mountains of Mourn are so inhospitable that nothing that makes its way into the Ogre Kingdoms is wasted - if an object is not immediately edible it will invariably find another use within a few hours of its discovery.

Ogres have an insatiable appetite for destruction as well as for food and even in times of relative peace they will hunt and kill the vicious cave-beasts that dwell in the mountains, as well as war constantly amongst themselves. Ogres are well known for their tendency to brawl, and can be found across the four corners of the world, fighting in small mercenary groups that ultimately leave comparatively little evidence of their passing. In contrast, a full migration of Ogres can be devastating, stripping all life from the lands they come across and devouring entire populations in a matter of days. It may take decades before the desolation left in their wake begins to recover, but full-scale Ogre migrations are mercifully rare.

Ogres, being completely illiterate, rely on crude cave paintings and a tradition of storytelling (or just plain old boasting) to convey the folk tales and legends of their civilisation. One of their earliest myths concerns Old Stoneguts, an Ogre that caught and ate the sun one evening but, due to the heartburn it was causing him, threw it back up the very next morning. Ogres place great stock in feats of strength, and the mythology of the Ogre Kingdoms is continually fuelled by the Herculean (and often extremely exaggerated) tasks undertaken by its inhabitants.

Ogre Kingdoms Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Bull Ogres	Infantry	4	4	5+	-	3	105	2/-	*1
Leadbelchers	Infantry	3/2	4	6+	-	3	90	-/2	*2
Ironguts	Infantry	4	4	4+	-	3	140	-/2	-
Yhetees	Infantry	5	4	0	-	3	90	-/2	*3
Gnoblars	Infantry	2/1	3	0	-	3	30	-/4	*4
Gorgers	Infantry	5	3	5+	-	3	110	-/1	*5
Rhinox Riders	Cavalry	5	4	5+	-	3	200	-/1	*6
Sabretusks	Cavalry	3	3	0	-	3	40	-/1	-
Slave Giant	Monster	8	8	5+	-	1	135	-/1	*7
Scrap Launcher	Artillery	1/3	3	0	-	1	75	-/1	*8
Tyrant	General	+2	-	-	9	1	125	1	-
Bruiser	Hero	+1	-	-	8	1	80	-/1	-
Butcher	Wizard	+1	-	-	8	1	90	-/1	-
Bull Rhinox	Monstrous Mount	+2	-	-	-	-	+65	-/1	*9

Special Rules

1. Bull Ogres. If an Ogre unit can use its initiative to charge an enemy unit of humans at the start of the Command phase then it must do so. This happens automatically and their commander can do nothing about it. 'Humans' encompasses all 'men' including Chaos Warriors and Marauders, but not Dwarfs, Elves etc.

2. Leadbelchers. Leadbelchers' cannons have a range of 15cm. The unit has 2 shooting attacks. Leadbelchers shooting attacks impose a -1 penalty to armour rolls.

3. Yhetees. If a unit of Yhetees is charging against an enemy in the open it receives an additional +1 Attack modifier in the same way as chariots and monsters. A Yhetee unit can only give support and be supported by other Yhetee units and must pursue retreating enemies where possible and must advance into a combat if they are able to do so.

4. Gnoblars. Unit is allowed to shoot as if it had bows but its range is reduced to 15cm. A Gnoblar stand cannot be supported by other kinds of infantry - only by other Gnoblar stands. Note, however, that Gnoblars can support other kinds of infantry as normal. Gnoblars cannot be given magic items. Characters cannot join Gnoblar units.

5. Gorgers. When trying to issue an order to a unit of Gorgers or to a brigade that contains a unit of Gorgers, there is always a -1 Command penalty due their beastly and unruly nature. Gorgers always ignore distance modifiers when receiving orders and can pursue any type of retreating enemy. Gorgers do not have to be deployed before the game if the player does not wish to do so. Instead individual units can be infiltrated onto the battlefield once the game has begun. To infiltrate a unit, the Ogre player nominates the point where he wants the Gorgers to appear and issues an 'infiltration' order from any character. The character does not have to be within his normal command range to issue an infiltration order - the character's command range is considered to extend over the entire tabletop when issuing an infiltration order. Treat the order as issued to the nominated point, and apply the Gorgers' standard -1 and any modifiers for proximity of enemy. The nominated point must lie either on the table within dense terrain or on any base edge other than the enemy player's own table edge. If successful, place one stand on the nominated spot and arrange the rest of the unit into formation around it. The infiltrated unit cannot be placed so that it touches an enemy unit. Once deployed, orders can be given to the unit by the same character that gave the infiltration order. The infiltrating unit is considered to have used its first order to deploy. If the infiltration order is failed the unit is not deployed and cannot infiltrate that turn, it can attempt to infiltrate in a subsequent turn at the same or a different place. Gorgers don't suffer -1 Command penalty for Dense Terrain.

6. Rhinox Riders. Units of Rhinox Riders are unaffected by terror. Rhinox Riders receive +1 Attack when charging against an enemy in open in the same way as chariots and monsters.

5. Slave Giant. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately.

Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

8. Scrap Launcher. Scrap Launcher is a Stone Thrower as described in the Warmaster Rulebook p.75.

9. Bull Rhinox. Tyrant, Bruisers and Butchers may ride the Bull Rhinox. A unit that is joined with a character mounted on this huge beast causes terror in enemies.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

Ogre Spells

TOOTH CRACKER

3+ to cast.....Range 30cm

The Butcher grinds his way through a lump of earth encrusted bedrock taken from the peak of a mountain, imbuing himself and his fellows with supernatural resilience. This often costs the Butcher more than a couple of teeth.

This spell can only be cast on an unengaged friendly unit within range regardless of whether the Shaman can see it or not.

The target friendly unit can't be driven back by enemy shooting attacks until your next turn. In addition the unit cannot become confused for any reason until the end of your next command phase.

BONE CRUNCHER

5+ to cast.....Range 30cm

Shovelling dry bones into his mouth, the Butcher painfully crunches his way through femurs, ribs and skulls. As he points at his foes and spits his bloody curse, the enemy find their own bones breaking within their bodies.

This spell can be cast on an enemy unit. The Wizard must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat.

Bone Cruncher is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by Bone Cruncher as with ordinary shooting.

BULL GORGER

4+ to cast.....Range N/A

The Butcher greedily devours the heart of a Bull Rhinox, no doubt enjoying the feast of healthy blood and muscle whilst he imbues himself and his charges with the strength of a charging Rhinox.

This spell can be cast if the Butcher has joined a unit in combat. The spell affects the unit he has joined. The effect lasts for the duration of the following Combat phase.

Every stand in the unit, including characters that have joined the unit, adds +1 to its Attacks value. As the Butcher must join the unit to cast the spell this includes the Butcher himself, but it is possible for other characters to join the unit as well, in which case the +1 is applied to whichever character fights.

TROLL GUTS

5+ to cast.....Range 30cm

The Ogre Butcher forces down the toxic guts of a Stone Troll, great quantities of acid and bile ravaging his much-abused gut as he transfers the supernatural abilities of the troll onto himself and his companions.

This spell can be cast on one friendly unit within range that is engaged in combat.

The affected unit increases its Hits value by +1 until the end of the following Combat phase. At the end of the following Combat phase, the unit's Hits value returns to normal so any outstanding Hits will be applied, potentially causing the loss of stands.

Albion

Aeons ago, the Isle of Albion was the site of a sprawling techno-arcane complex created by an unspeakably ancient spacefaring race called the Slann. Their carefully aligned stone circles and thousands of miles of impressively taut leylines once served to harness the mysterious psychomagical power of the warp. This power was used to control the gigantic interspatial portals through which Slann craft traversed the galaxy. At some time there was an unfortunate accident; the portals became unstable, opening a rift into the void and creating the zone of contamination and temporal instability that is now known as the Chaos Wastes. In order to stop their damaged portals running out of control and engulfing the entire world, the Slann destroyed or disabled their control complex on Albion. A vast quantity of dangerous psycho-active energy was released as a result.

This catastrophe turned the isle of Albion into a warped land that was ever afterwards shrouded by chilling mists and ceaseless drizzle. The explosive release of warp energy had the effect of distorting local time and space in surprising ways. As a result, the island proved almost impossible to find afterwards and many Old Worlders came to doubt its very existence. Isolated from the world and from reality, the island's inhabitants degenerated physically and culturally, coming to live an ape-like existence alongside the other malformed monsters of their devastated land.

Despite this, they still retain some vestigial memory of a time of greatness when their ancestors helped build the stone circles and other wonders that once formed the nerve centre the Slanns' techo-arcane warp mechanism.

The mist-wreathed isle of Albion has seen as much bloodshed and warfare as the rest of the known world. Albion is seen as a damp, bog-ridden backwater and reports of recent incursions have concentrated on the clashes between the supposedly more advanced invaders. However, a closer examination of the campaigns in Albion show that its native armies are every bit as lethal as those of any of the more so-called 'civilised' nations..

The core of any Albion army comprises nobles in chariots and warbands of warriors on foot, screened by youths armed with slings and javelins led by the local chieftain. Poorer nobles and richer warriors are mounted on hardy native ponies and form the cavalry used to both scout and to support the noble chariot warriors.

Albion is famed for the great wolfhounds the natives breed. They are exported widely, but most especially to Bretonnia and the Empire where their size, strength and ferocity are much prized by noble huntsmen. In times of war these wolfhounds are gathered into huge slavering packs and are used to supplement the cavalry, screening attacks and harassing vulnerable enemy flanks.

In time of war some Chieftains can also call on the giant eagles whose eyries dot the highest peaks of the land. Few of Albion's chieftains will pass up the chance to recruit some of their island's largest inhabitants – the famed giants of Albion. Just like those giants that accompany Orc armies, these massive warriors make up for in brawn what they lack in brains!

Not quite so strong, but then again not quite so dim, are the bands of ogres which flock to join the armies of Albion – for a share of the loot and the chance to turn a former enemy into a quick snack! In addition to the warrior chieftains who lead the armies, there are heroic warriors who help to marshal the army and the enigmatic druids who are not only the army's wizards but also its law makers, judges and soothsayers.

Albion Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Warriors	Infantry	3	3	5+	-	3	60	2/-	-

Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*5
Fenbeast	Monster	6	4	5+	-	1	-	-/1	*6

Special Rules

1. Ogres. If an Ogre unit can use its initiative to charge an enemy unit of humans at the start of the Command phase then it must do so. This happens automatically and their commander can do nothing about it. 'Humans' encompasses all 'men' including Chaos Warriors and Marauders, but not Dwarfs, Elves etc.

2. Giant. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately.

Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

3. Giant Eagle. Giant Eagles can fly.

4. Giant Eagle Mount. Giant Eagles can be ridden by Druids only. An Eagle can fly increasing its rider's move from 60 to 100cm, and it adds +2 Attacks to those of its rider.

5. Chariot Mount. Generals, Druids and Heroes can ride Chariots. An extra +1 Attack is added to those of its rider.

6. Fenbeast. Fenbeast is an individual troop unit, but it can not be fielded like other units in the standard way. Fenbeast can appear on the battlefield only by the Druid's Summon Fenbeast spell. It cannot be brigaded with other troop units, not even other Fenbeasts. Fenbeasts never use their initiative to move in the Command phase. Because they are completely dominated by the will of the Druid who summoned them, the Druid counts as having a Command value of +1 when commanding the Fenbeast – that is 8 rather than 7. They can move through bogs as though they were open terrain. Unlike the wild Bog Beasts from the 'Dark Shadows' campaign, Fenbeast will make way for friendly troops. Fenbeasts are terrifying creatures and cause terror.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

Albion Spells

DOWNPOUR

4+ to cast.....Range 30cm

The Druid brings down a localised shower of fine, freezing rain upon his foes.

The spell is cast upon the Druid himself and affects all enemy units within 30cm of the stand. The spell lasts until the end of the opposing player's following turn. The spell affects the opposing army's ability to issue commands.

All enemy units within 30cm of the Druid suffer a –1 Command penalty. This penalty is applied when each order is issued: a unit might therefore be within 30cm of the Druid for one order but not for a second, for example.

STORM OF HAIL

5+ to cast.....Range 30cm

The Druid harnesses the power of the weather to attack his enemies with enormous hailstones.

The Druid targets a single enemy unit within range and that he can see. This has the effect of three shooting attacks except that it ignores any armour save the target may have. The target unit may be driven back in the same way as for shooting.

MISTS OF ALBION

5+ to cast.....Range 30cm

The Druid breathes out some of the mystical mist that surrounds his enigmatic homeland and envelopes his compatriots, making them hard to target by enemy troops.

This spell may be cast upon a single unengaged friendly Infantry unit within range, regardless of whether the caster can see them or not. The spell lasts until the start of the caster's next turn, or until the target unit moves in any way. The target Infantry unit counts as Defended, even if in open terrain.

SUMMON FENBEAST

6+ to cast.....Range 30cm

The Druid performs one of the most arcane rituals known to his order, using his power over the elements to bind together the horrific creature known as the Fenbeast.

The Druid summons forth a Fenbeast. Once summoned, the Fenbeast is under the control of the summoning player.

Since it is summoned in the Shooting phase it cannot be given orders until the following turn. It may be summoned into contact with an enemy unit only if that unit is already in combat. It may be removed from play if destroyed (like any other unit) or if the loss of a Druid character reduces the number of Druids to less than the number of Fenbeasts – the owning player chooses a Fenbeast and removes it from play. Summoning a Fenbeast unit does not influence army withdrawal calculation in any way and it does not have a points value. Fenbeasts may only be given orders by Druids. Fenbeasts may not be brigaded with other troops, not even other Fenbeasts. An army cannot have more summoned Fenbeasts in play than it has Druids.

Goblins

Goblins are small, green, vicious, mean-spirited and generally unpleasant creatures. Clues as to their character may be discerned in their tiny pointed teeth, beady glinting eyes, scrawny grasping hands and general demeanour of a whipped dog.

To give them their due, Goblins are prolific. There are lots of them and no matter how many die or run away, there are always plenty left. Their preferred method of fighting is to shoot their enemy in the back from a good distance. They are half-way decent shots but in other respects are poor and often unwilling fighters. However, they are dangerous in large numbers and quite capable of overwhelming far better troops by sheer weight of numbers.

Like all greenskins, Goblins are quarrelsome and fractious. They fight amongst themselves both on and off the battlefield. They feel little sense of loyalty to their own kind let alone anyone else, and will cheerfully maim, kill and even eat their comrades if they can get away with it.

Goblins are generally recognised as belonging to two main breeds, namely Common Goblins and Night Goblins. These types are not physically different to each other, although all kinds of Goblin are liable to extreme variations in size, so it is quite usual for a mob of Goblins to include some individuals as much as twice the size of others. In this respect, where a big Snotling becomes a Goblin and vice versa is debatable, though from an Orc's point of view it hardly matters as they're all there to be bossed about.

The majority of Goblins living in open areas, most notably in the Badlands and Dark Lands, are Common Goblins or just ordinary Gobbos. They are as common as muck throughout the hills, valleys and plains of the Old World and beyond. We quite cheerfully refer to all the different kinds of Goblins as Goblins, but where this might prove confusing we call ordinary Common Goblins just that ... Common Goblins. And ain't they just!

Common Goblins ride Giant Wolves much as humans ride horses. Not only are these large and dangerous creatures ridden by individual Goblins, but chariots and carts may be pulled by several Giant Wolves harnessed together. Giant Wolves are vicious creatures with slavering fangs and sharp claws, quite often more dangerous than their Goblin riders. They are faster than horses too.

Goblin Wolf Riders commonly raid and pillage ahead of advancing Goblin hordes, scouring the countryside for signs of enemy troop movements. On the battlefield they harry the flanks of enemy units and chase down those who've fled braver greenskins.

Night Goblins are adapted to life underground where they subsist on fungi, cave squigs, beetles and bits of each other. They live under the mountains throughout the Old World and Southlands in tunnels and caverns that are cool and dark. Night Goblins have a strong aversion to daylight and when forced above ground wear black or very dark enveloping robes to protect themselves from the sun's rays.

Goblin Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Goblins	Infantry	2/1	3	0	-	3	30	4/-	*1
Squig Herd	Infantry	3	3	0	-	3	30	-/-	-
Trolls	Infantry	5	3	5+	-	3	110	-/4	*2
Wolf Riders	Cavalry	2/1	3	6+	-	3	60	2/-	*3
Wolf Chariots	Chariot	3	3	6+	-	3	75	-/4	-
Pump Wagon	Chariot	D6	3	5+	-	1	50	-/2	*4
Giant	Monster	8	8	5+	-	1	135	-/1	*5
Doom Diver	Artillery	1/3	2	0	-	2	80	-/1	*6
Spear Chukka	Artillery	1/2 + skewer	2	0	-	2	65	-/2	*7
Goblin Warboss	General	+1	-	-	8	1	80	1	-
Goblin Hero	Hero	+1	-	-	7	1	45	-/4	-
Goblin Shaman	Wizard	+0	-	-	6	1	30	-/2	-
Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*8
Wyvern	Monstrous Mount	+2	-	-	-	-	+80	-/1	*9

Special Rules

1. Goblins. A Goblin unit is allowed to shoot as if it had bows but its range is reduced to 15cm. Up to two units per full 1000 points can be replaced by Squig Herd while still counting for the Goblin min/max value.

2. Trolls. When trying to issue an order to a unit of Trolls or to a brigade that contains a unit of Trolls, any Command penalty applied for distance between the character and the Troll unit is always doubled. So at 20cm no penalty applies, at 40cm -2, at 60cm -4, and so on. Trolls can regenerate wounds - in each round of combat after whole stands have been removed Trolls automatically regenerate one outstanding hit. If no hits are left over after removing whole stands then regeneration has no effect. Regenerated hits still count towards the combat result for the round.

3. Wolf Riders. The Wolf Riders have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

4. Pump Wagon. The Pump Wagon doesn't move in the Command phase by initiative or by successful orders. Instead of this it can always move once up to 1D6 x 10cm. This move is automatic, requiring no Command roll, and happens at any time during the Command phase but may not interrupt a character giving orders or units moving (including other Pump Wagons). This gives the Pump Wagon a movement of between 10cm and 60cm each turn.

In the combat phase it charges, pursues or advances, a Pump Wagon receives D6 attacks. This is in addition to any additional attacks it receives for charging enemy in the open and for being a chariot. When charged or retreating as a result of combat, its attacks are halved to D3. Roll for attacks every round of combat.

A Pump Wagon cannot be driven back by shooting and does not roll for drive backs. Pump Wagons ignore confusion. A Pump Wagon cannot be brigaded with other units; not even another Pump Wagon, and characters cannot join it. The enemy does not gain Victory points for a destroyed Pump Wagon and a Pump Wagon does not count towards the Goblin army's break value in any way.

5. Giant. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately.

Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

6. Doom Diver. The Doom Diver has a range of 60cm and a unit hit by a Doom Diver is allowed to make its normal armour save. Doom Divers shoot at such a high trajectory that they cannot shoot at charging enemies.

7. Spear Chukka. Spear Chukka is a Bolt Thrower. See the Rulebook p.75.

8. Wolf Chariot. A General, Hero or Wizard can ride a Wolf Chariot. The character riding a chariot adds +1 to his Attacks.

9. Wyvern. Characters may ride Wyverns. A Wyvern can fly increasing its rider's movement from 60cm to 100cm, and it adds +2 Attacks to those of its rider. A unit that includes a Wyvern rider causes terror in its enemies.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

Goblin Spells

MORK SAVE UZ!

5+ to cast.....Range 30cm

The Shaman summons the power of Mork to protect the greenskins from the enemy.

This spell can be cast on any friendly unit within 30cm of the Shaman. The unit gains a 5+ save worked out in the usual manner until the beginning of their next turn. If the unit already has a saving roll then it can choose which one to make, but may not take both.

GERROFF!!!

5+ to cast.....Range 60cm

The voice of Gork booms out across the battlefield driving back his foes with a rancid gale force yell.

This spell can be cast on any unengaged enemy unit within range regardless of whether the Shaman can see it or not. The spell cannot be cast on a unit engaged in combat.

The enemy unit is driven back 1D6 x 5cm towards its own table edge. This is treated in the same way as a drive back from shooting, except that the direction is established by determining the shortest route to the table edge. A unit cannot be routed by a drive back from a Gerroff spell. If the unit leaves the table edge it must roll as described in the main Warmaster rules.

BRAIN BUSTA

5+ to cast.....Range 30cm

A fearsome bolt of pure Waaagh! energy issues from the Shaman's outstretched hand and strikes an enemy unit.

The Shaman must be able to see his target to use this spell and it cannot be directed at a unit engaged in combat. Brain Busta is treated like three ordinary shooting attacks except that armour saves have no effect (all targets count as having no armour). A unit can be driven back by Brain Busta as with ordinary shooting.

WAAAGH!

4+ to cast.....Range 30cm

The Shaman summons the power of the mighty Waaagh! to invigorate the greenskins.

This spell can be cast on a friendly unit of Goblins engaged in combat; including Squig Herds, Wolf Riders, Wolf Chariots and Pump Wagons but not Trolls, Giants or other non-greenskins. The spell can be cast regardless of whether the Shaman can see the target or not.

The spell lasts for the duration of the following Combat phase. Every stand in the unit, including characters that have joined the unit, adds +1 to its Attacks value.

Witch Hunters

Witch Hunters are some of the most characterful and interesting aspects of the Empire. While it's true to say they invariably fight for the greater good of humanity, their methods are often brutal and arguably little better than those of their enemies. A Witch Hunter knows that evil doesn't play by the rules however, and that to beat it, he must be just as underhand. If a few innocents get killed in the process, then it's regrettable but better than allowing a heretic or warlock to escape punishment.

Often, Witch Hunters prefer to work alone or in small groups, such as during the scouring of Mordheim years ago. Occasionally though there will be need to gather together under one banner to drive out some great, dark army. Probably the two most famous times were during the last Great Chaos Incursion, when a Witch Hunter army was lead by Magnus the Pious; and during the Wars of the Vampire Counts, when the whole Empire united to defend itself against the armies of Vlad and Mannfred Von Carstein. At times like these, Witch Hunters stir up support from the mobs, and priests take up the hammer, leading their congregation to defend the lands. Flagellants seem drawn to these gatherings like flies, preaching damnation and hellfire almost as loudly as the Witch Hunters themselves.

Of course, it does not take a desperate situation such as a Chaos incursion to cause this. Quite often, a Witch Hunter will find need to gather a force to eradicate a tribe of beastmen in a surrounding forest, or cast out a Necrarch from a dark tower in the mountains. If the local noble has not the time, or more likely the inclination, it calls to a Witch Hunter to deal with it. He may have some aid in the form of the town watch or soldiers of the merchants guild, or even a detachment of one of the Knightly Orders, but often this is not the case.

A Witch Hunter's army is a rag-tag sight. The black garbed Zealots of the Witch Hunters' guild stand shoulder-to-shoulder with peasants and hastily gathered watchmen. Packs of Warhounds, equally trained to seek out the scent of the Undead or a heretic, follow baying and howling. Occasionally a regiment of Knights marches ahead, their bright armour contrasts to the rags of the army's bulk. Priests continue their sermons on the battlefield, encouraging their followers to acts of insane bravery, while frothing Flagellants whip themselves for the sins they may have committed.

Witch Hunter Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Zealots	Infantry	3	3	0	-	3	35	3/-	*1
Halberdiers	Infantry	3	3	6+	-	3	45	-/4	-
Crossbowmen	Infantry	3/1	3	0	-	3	55	-/2	-
Handgunners	Infantry	3/1	3	0	-	3	65	-/4	*2
Flagellants	Infantry	5	3	0	-	3	70	-/4	*3
Warhounds	Infantry	3	3	0 or 6+	-	+1	20	-/-	*4
Knights	Cavalry	3	3	4+	-	3	110	-/1	-

Hero	Hero	+1	-	-	8	1	80	-/2	-
Warrior Priest	Wizard	+1	-	-	7	1	55	-/1	-
War Altar	Chariot Mount	+2	-	-	-	-	+15	-/1	*7

Special Rules

ARMY RULES

The abilities of some units in the Witch Hunter army will affect 'Chaos and/or Undead'. 'Chaos' means the Chaos army, Daemons army, Beastmen army, Chaos Dwarfs army and Skaven army. 'Undead' means Tomb Kings army and Vampire Counts army (including units of Ghouls!).

SPECIAL RULES

1. Zealots. Zealots form the main part of a Witch Hunter army, and are drawn from mobs whipped up by priests' sermons. These troops gain +1 Attack in the first round of combat against Undead or Chaos (regardless of who charged) and will always use their initiative to charge these enemies if possible. If victorious in combat with Undead or Chaos-like enemies they must pursue or advance where possible.

2. Handgunners. Count enemy Armour values as one worse than normal when shot by a handgun. So an Armour value of 3+ counts as 4+, 4+ as 5+, and 5+ as 6+, whilst an Armour value of 6+ can't save against a handgun.

3. Flagellants. So keen are they to meet their maker that a unit of Flagellants will always use its initiative to charge an enemy if possible and can't be given orders instead. They'll never use their initiative to evade. They can't be driven back by shooting and do not roll for drive backs. If victorious in combat they must pursue or advance where possible. Flagellants are unaffected by enemies that cause terror in combat, so they do not suffer the usual -1 Attack modifier.

4. Warhounds. Warhound stands are not deployed as independent units. Instead, any infantry unit may add one stand of Warhounds. This brings the size of the unit to 4 stands; 3 regular stands plus the Warhound stand. Warhounds always have the same Armour value as the rest of their unit. They fight as part of their unit and can be removed as a unit casualty if the player wishes.

Warhound casualties never count for Command penalties.

Warhound stands never cause the parent unit to be in Irregular Formation no matter how they are placed. An Infantry unit containing a Warhound stand gains the ability to pursue Cavalry and Chariots.

5. Pistoliers. Pistoliers have a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy.

6. Cannons. See Warmaster Rulebook p.74.

7. War Altar. A Warrior Priest may be mounted on a War Altar. A Warrior Priest with a War Altar suffers a movement reduction to 30cm. The army can only ever include one War Altar, and it can only be included if there is at least 1 unit of Flagellants in the army. The War Altar adds +2 attacks to the Warrior Priest and can be used to add +1 to the Warrior Priest's dice roll to cast a spell once per battle. The player must announce that the War Altar's spell bonus is being used before rolling the dice to determine if the spell is cast.

Witch Hunter Spells

SANCTUARY

5+ to cast.....Range N/A

The Warrior Priest consecrates the ground before the troops, warding off evil.

The Wizard must be with the unit to affect it. The unit counts as being defended, even if in the open. If the unit is already defended, it counts as fortified. Note that this also affects Cavalry units, even though they are not normally able to receive this bonus. The effect lasts until the unit moves or Warrior Priest leaves it or he casts another spell.

DOCTRINE OF SIGMAR

5+ to cast.....Range 30cm

Through the rousting speech of Sigmar's chosen, troops are directed across the field of battle.

The spell can be cast on any unengaged friendly unit within range regardless of whether the Warrior Priest can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible.

The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it: they remain where they are.

HOLY FERVOUR

4+ to cast.....Range N/A

Enraged by their blasphemous enemies the troops rush forward thirsty for blood.

The Wizard must be with the unit to affect it. If successfully cast on a friendly unit, each stand including character stands gains +1 Attack during the following Combat phase.

DIVINE CURSE

4+ to cast.....Range 30cm

Speaking the words of Magnus the Pious himself, the Warrior Priest smites his foes.

This spell can be cast on any enemy unit within range regardless of whether the Priest can see it or not. The spell lasts until the end of the opposing player's following turn.

The unit moves at half pace in all situations: even when charging for example. The unit counts all enemies as terrifying (-1 Attack penalty) even when it is otherwise immune to terror. If the unit would normally cause terror then it ceases to do so and counts all enemies as terrifying just like everyone else. However, if the target is Undead or Daemon it will not count enemies as terrifying although all other penalties apply as described (Undead and Daemons are hard to spook).

Chaos Dwarfs

Many thousands of years ago the Dwarf race moved northwards from its ancestral home somewhere in the Southlands. They moved along the high ridge of mountains known as the Worlds Edge Mountains, following the trail of mineral ores and precious gems.

The Dwarfs spread amongst the mountains, driven onwards by their lust for the secrets of rock and metal. Over a period of many hundreds of years they dug shafts and excavated cavernous underground cities, they sank mines deep into the mountain roots, and constructed tunnels which carried them further north.

Eventually, sometime in the dim and distant past, the Dwarfs reached the upland region at the far north of the Worlds Edge Mountains which they called Zorn Uzkul or the Great Skull Land. Here they found a vast and inhospitable plateau where the air was thin and cold and the rocks barren. Many turned back south to swell the growing numbers of Dwarfs in the Worlds Edge Mountains, others turned west into the cold lands of Norsca, but some of the most adventurous turned east and then south along the bleak Mountains of Mourn.

At first these widespread Dwarf kindreds maintained contact with each other, but the eastern Dwarfs strayed far and when the Time of Chaos came, the northern regions were cut off forever. The Dwarfs of the west believed their eastern kin dead, destroyed by the tides of Chaos that came from the north, but they were mistaken. Chaos did not kill the hardy Dwarfs, instead it worked a dreadful change upon them.

The Chaos Dwarf Empire is sited amidst the Mountains of Mourn and the adjoining eastern part of the Dark Lands. It is a stark and cheerless place, where nature has rent the ground and burst the mountains apart. It is a land rich in the materials that Dwarfs especially covet.

It is impossible to say for certain how or when the Dwarf kindred of the east became the Chaos Dwarfs. Probably it was a slow process of warping and twisting, for Dwarfs are stubborn by nature and more resistant to magic than other creatures. Nonetheless they were changed.

Their Dwarf instincts became perverted into a mockery of traditional values. The huge and monstrous Tower of Zharr-Naggrund, the City of Fire and Desolation, arose on the plain of Zharrduk. This monstrous city is fashioned from black obsidian and stained with the red glow of a thousand diabolic furnaces. Where Dwarfs shun magic the Chaos Dwarfs embraced it and became mighty sorcerers, the creators of arcane machineries and horrific engines.

The refuse of thousands of years of labour fills the Plain of Zharrduk where industry tears at the earth, pock-marking the surface with ugly scars of endeavour. Beneath the flickering flames of countless forges untold thousands of slaves, creatures of many races captured in war or traded from the Orcs of the west, work at the enterprises of the Chaos Dwarfs.

Chaos Dwarf Army Selector

Sorcerer	Wizard	+1	-	-	8	1	90	-/1	-
Great Taurus	Monstrous Mount	+2	-	-	-	-	+80	-/1	*7
Lammasu	Monstrous Mount	+1	-	-	-	-	+35	-/1	*8
Sorcerer Lord	Special Bonus	-	-	-	-	-	+25	-/1	*9

Special Rules

1. Blunderbusses. Units with Blunderbusses have a shooting range of 15cm. The unit has 2 shooting attacks. Units hit by Blunderbusses get a -1 penalty for their armour rolls. One unit of Blunderbusses per full 1000 points can replace a unit of Warriors while still counting for the Chaos Dwarfs min/max value. Note that this unit still counts for max value of Blunderbusses.

2. Hobgoblins. Hobgoblins and Hobgoblin Wolf Riders carry an assortment of smaller ranged arms, so may only shoot up to 15cm and have 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from it's front edge to charge an enemy. Hobgoblins and Orcs have a strong hatred so units of Hobgoblins or Hobgoblin Wolf Riders may not brigade with units of Black Orcs or Orc Slaves unless Chaos Dwarfs or Blunderbuss unit is part of the brigade.

3. Orc Slaves. Slaves are just that, captives forced to work and fight for their cruel masters' enjoyment. A unit of Slaves suffer an additional -1 Command penalty when given an order. This penalty is waived, however, if the Slaves are brigaded with Black Orcs, Chaos Dwarfs or Blunderbusses.

4. Earthshaker Cannon. The Earthshaker acts as a Stone Thrower as described in the Rulebook (p.75). The exception is that the drive back from the Earthshaker shot causes confusion on rolls of 4+ rather than the usual 6+. In addition the Earthshaker shot causes confusion in units in base contact with the victim unit on rolls of 6 on a D6 (roll for each unit). The total number of Earthshakers and Death Rockets in the army is limited in the way that only 1 piece of this kind is allowed per 1000 points.

5. Death Rocket. The Death Rocket acts similar to a Stone Thrower as described in the Rulebook (p.75), except it shoots 1D6 times per phase and hits inflicted on the target can be still saved by the armour with -1 modifier. If the roll for the number of shots comes up a 1, the Death Rocket has misfired and you must roll a 1D6 against the Death Rocket Misfire chart. The total number of Earthshakers and Death Rockets in the army is limited in the way that only 1 piece of this kind is allowed per 1000 points.

6. Bolt Thrower. The Hobgoblin Bolt Thrower is a Bolt Thrower as described in main Rulebook (p.75).

7. Great Taurus. Any character may be mounted on a Great Taurus. This mighty beast is fearsome to face on the battlefield. The Great Taurus causes terror and is able to fly.

8. Lammasu. The Lammasu is a magical creature trained to serve the Chaos Dwarfs. A Chaos Dwarf Sorcerer may be mounted on a Lammasu. A Lammasu is able to fly. In addition once per turn you can attempt to dispel one hostile spell cast on one friendly unit within 30cm of the Lammasu on a roll of 4+ on a D6. There can only be one Lammasu in the army.

9. Sorcerer Lord. The General may be a true Sorcerer Lord, maybe even one of the living ancestors from Zharr-Naggrund. A Sorcerer Lord can cast spells like a Wizard and can carry a magic item restricted to a Wizard if desired. Once during the battle a Sorcerer Lord can add +1 to the dice when attempting to cast a spell. The player must announce that the Sorcerer Lord's special spell casting bonus is being used before rolling for the spell.

Death Rocket Misfire Chart

D6	*Result*
1	**KABOOM!** The Death Rocket explodes in spectacular manner.
2-3	**Dud.** The rocket does only one attack.
4-5	**Whoosh!** The rocket overshoots and does D6 attacks on the first unit in the line of fire past the original target, regardless of range. If the result is 1, don't roll for the misfire again. If the target is engaged in combat, the hits are carried over into Combat phase. If no target is behind the victim the rocket leaves the battlefield without causing any damage.
6	**Big badaboom!** The rocket does 2D6 attacks instead of the normal 1D6.

Chaos Dwarf Spells

FLAMING HAND

4+ to cast.....Range N/A

The Sorcerer's hand glows like molten steel as he calls forth the strength of the forges of the earth.

This can only be cast if the Sorcerer has joined a unit in combat. The spell automatically makes three attacks on one enemy unit which is touching the unit the Sorcerer has joined. These are worked out in the usual way. Any hits scored are carried over into the first round of combat and count as having been struck in combat.

VOLCANIC ERUPTION

6+ to cast.....Range 30cm

The Sorcerer's calls forth a storm of magma from beneath the earth.

Each enemy unit within 30cm of the Sorcerer's stand takes 3 Attacks worked out in the normal way. A unit is not driven back by the Volcanic Eruption. Engaged units carry over any hits scored into the first round of combat and hits caused by the Volcanic Eruption count as having been struck in the combat itself.

WORD OF FEAR

4+ to cast.....Range 30cm

The Sorcerer speaks a blasphemous litany that instills fear in the hearts of his enemies.

This spell can only be cast on any friendly unit within range regardless of whether the Sorcerer can see it or not. The unit counts as causing terror for the duration of the Combat phase.

METEOR STORM

5+ to cast.....Range 30cm

The Sorcerer hurls flaming stones from his fingertips toward the enemy, battering everything in its path.

Draw an imaginary line 30cm long extending from the Sorcerer's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily affect several units and will affect all units that fall beneath its path, including your own. Unengaged units can be driven back by the Meteor Storm as with ordinary shooting. Engaged units cannot be driven back, but carry over any hits that are scored into the first round of combat. Hits caused by the Meteor Storm count as having been struck in the combat itself.

Wood Elves

Elves first settled in the forest of Loren long before the civilised realms of man came into being in the Old World, during the great period of war between the Elves and the Dwarfs known as the War of the Beard. The first Elven settlers of Loren sought to protect this beautiful forest realm from the ravages of the Dwarfs, who would have felled the mighty trees to fuel their furnaces and provide timber to build their war machines. After many years of fighting, the War of the Beard finally ended with the Dwarfs retreating to their mountain halls and the Elven colonists abandoning the Old World to protect their homeland of Ulthuan.

However, not all of the Elves returned home with the armies and ships. Some could not bear to leave their newly founded homes, whilst others were unwilling to return to the decadence and intrigue of the noble courts of their homeland. Whatever their reasons, a small number of the Elven settlers remained in the Old World, and without the Phoenix King's armies to protect them, they soon took refuge with the guardians of Loren, and made the forest their new home. The descendants of these first colonists are the race of Wood Elves, and they continue to protect their forested home to this very day.

It is safe to say that the Wood Elves are not the most active campaigners in the Warhammer world; rather the vast majority of their battles are fought in the defence of Loren – a cause to which they are dedicated with single-minded determination. Due mainly to their small numbers, the Wood Elves prefer to deal with their enemies using deception and guile rather than attacking head-on. Death through traps, ambushes and the unseen arrow all await the unwary intruder into the enchanted forest kingdom of the Wood Elves. Indeed, a large Wood Elf host will only be assembled to fight an open, pitched battle under the direst of circumstances, most often to repel a determined invading army. In such times as these, the Wood Elf warriors will fall upon their opponents with all the savagery of the Wild Hunt, slaying all who would seek to despoil their beloved forest. Often all that remains of the invaders are several large cairns, beneath which lie the bodies of fallen enemies. These serve as a grim warning to all who trespass beyond the boundary stones marking the edge of the realm – you are not welcome here, death awaits.

Special Rules

ARMY RULES

Woodland Folk. Due to living amongst the forests of Loren all Wood Elf infantry does not suffer the usual -1 Command penalty when within woodland.

SPECIAL RULES

1. Glade Guard. Wood Elves are just as famed for their bow as their High Elf cousins, and as such Glade Guard units add +1 to their dice rolls when making shooting attacks. Therefore these units score a hit against targets in the open on a 3+, against defended targets on a 4+, and against fortified targets on a 5+.

2. Wardancers. Wardancer stands are not deployed as independent units. Instead, any Glade Guard or Eternal Guard unit may add one stand of Wardancers. This brings the size of the unit to 4 stands - 3 regular stands plus the Wardancers stand.

Wardancers always have the same Armour value as the rest of their unit. They fight as part of their unit and can be removed as a unit casualty if the player wishes.

Wardancers casualties never count for Command penalties. Wardancers stands never cause the parent unit to be in Irregular Formation no matter how they are placed.

3. Waywatchers. Famous for their bow skills even by Wood Elf standards, Waywatchers shoot the enemy with terrifying accuracy. They add +1 to their dice rolls when making shooting attacks and these attacks are resolved at -1 Armour value of the enemy.

Individual units can be infiltrated onto the battlefield once the game has begun. To infiltrate a unit, the Wood Elf player nominates the point where he wants the Waywatchers to appear and issues an 'infiltration' order from any character. The character does not have to be within his normal command range to issue an infiltration order - the character's command range is considered to extend over the entire tabletop when issuing an infiltration order. Treat the order as issued to the nominated point, and apply any modifiers for distance and proximity of enemy, but ignore penalties of dense terrain. The nominated point must lie either on the table within dense terrain or on any base edge other than the enemy player's own table edge. If successful, place one stand on the nominated spot and arrange the rest of the unit around it. The infiltrated unit cannot be placed so that it touches an enemy unit. Once deployed, orders can be given to the unit by the same character that gave the infiltration order if he is within his normal command range, the infiltrating unit is considered to have used its first order to deploy. If the infiltration order is failed the unit is not deployed and cannot infiltrate that turn, it can attempt to infiltrate in a subsequent turn at the same or a different place. Waywatchers don't suffer the -1 Command penalty for Dense Terrain.

4. Forest Spirits. Forest Spirits are woodland creatures. They are immune to terror and suffer -1 Command penalty when being ordered by General or Noble.

5. Wild Riders. Wild Riders receive +1 Attack in the first round of every combat when fighting to the front.

6. Warhawk Riders. Warhawk Riders can fly. They have a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

7. Treeman. Treeman can enter woods and suffers no command penalty for being within the woods but cannot get defended status there. Treeman causes terror.

8. Treeman Ancient. Treeman Ancient has -1 Command penalty when issuing orders to other than Forest Spirit units. Can join only Forest Spirit units and is able to cast Tree Singing spell. Units joined by Treeman Ancient cause terror. There can ever be only one Treeman Ancient in any Wood Elf army. Cannot be given any magic items.

9. Branchwraith. Branchwraith has -1 Command penalty when issuing orders to other than Forest Spirit units. Can join only Forest Spirit units and is able to cast Tree Singing spell. Cannot be given any magic items.

10.Giant Stag. General, Nobles and Spellweavers may ride a Giant Stag. The Stag adds +1 Attack to those of its rider.

11. Unicorn. This mount can be ridden by Spellweaver only. The Unicorn adds +1 Attack to those of its rider. Once per battle the Unicorn's magical power adds +1 to the dice when casting a spell. The player must announce that the Unicorn's magic before rolling to see if the spell works. There can be only one Unicorn in the army.

12. Warhawk. General, Nobles and Spellweavers may ride a Warhawk. The Warhawk can fly, increasing its rider's move from 60cm to 100cm, and it adds +1 Attack to those of its rider.

13. Forest Dragon. Generals, Nobles and Spell Weavers may ride Forest Dragons. A Forest Dragon can fly, increasing its rider's move to 100cm, and adds +3 Attacks to those of its rider. Any unit joined by a character riding a Forest Dragon cause terror in their enemies and so long as the Dragon is attached to a unit, it can use its Corrosive Breath attack. This is a shooting attack with a range of 20cm, which can be directed against one target as normal. The breath has 3 Attacks, which are worked out in the usual way.

Wood Elf Spells

TREE SINGING

5+ to cast.....Range 30cm

The Spellweaver calls forth a mass of tangling branches to surround their troops, protecting them from harm.

This spell may be cast upon a single unengaged friendly Infantry unit within range, regardless of whether the caster can see them or not. The spell lasts until the start of the caster's next turn, or until the target unit moves in any way. The target Infantry unit counts as Defended, even if it is in open terrain.

TWILIGHT HOST

4+ to cast.....Range 30cm

The Spellweaver shrouds a friendly unit in nightmarish shadows, filling the enemy with fear.

This spell can only be cast on any friendly unit within range regardless of whether the Spellweaver can see it or not. The unit counts as causing terror for the duration of the Combat phase.

CALL OF THE HUNT

5+ to cast.....Range 30cm

The Spellweaver's voice sings out across the battlefield directing troops above the tumult of combat with the magical Call of the Hunt.

The spell can be cast on any unengaged friendly unit within range regardless of whether the Spellweaver can see it or not. The spell affects only a single unit, never a brigade and there is no supporting charge possible. The target unit must make a charge move into base contact with the nearest visible enemy unit in the same way as when charging, so all normal charge rules apply.

A unit moved by means of the spell cannot be affected by stand and shoot attacks until the end of the shooting phase. Character stands that have joined the affected unit will not move with it: they remain where they are.

FURY OF THE FOREST

6+ to cast.....Range 60cm

The Spellweaver awakens the fury of the forest to purge the enemy from their soil.

The spell can be cast upon any terrain piece in range that is designated as woods. All enemy units within 10cm of chosen wooded terrain piece take 3 shooting attacks worked out in the normal way. Affected units get no armour save if at least one of their stands is completely within the chosen terrain.

Unengaged units are not driven back by this spell (the assault comes form the ground beneath their feet). Engaged units carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

Beastmen

In the dark forests of the Old World dwell the favoured Children of Chaos: foul and unholy things that hate the world and hide from the honest light of day. They serve no mortal master, but belong heart and soul to the Dark Gods of Chaos. Men call these creatures Beastmen for they are part-human and part-beast, their twisted bodies a blasphemy of nature. They have horns upon their bestial heads, claws and cloven hooves adorn their limbs. Beastmen are wild and brutish creatures that care little for other beings and despise the race of Men above all else. They are cruel and brutal creatures who brawl and fight amongst themselves when not venting their hatred against mankind.

Beastmen are not natural creatures; they first came into existence when the polar gateway of the Old Ones collapsed, showering the world with corrupting warpstone. It worked a dreadful change on many of the ancestors of Men, causing severe mutations, and the descendants of the foul beasts born from that catastrophe still plague the dark places of the world.

Neither fully man nor fully animal, Beastmen willingly embrace their heritage of Chaos — they have the intelligence of a man, but employ it with the base cunning of a wild animal. To the people of the Empire, it is a deadly combination, for the Beastmen utterly despise the Humans who they can never be, filled with self-loathing that turns to aggressive hatred.

Malformed, base and evil, the Beastmen hate all natural and wholesome creatures. They are wild and crude creatures of animal lusts and an unpredictable, violent temperament. They have long, ridged horns with which to gore their foes, and the legs of cattle and goats with which to stamp the bodies of their victims into the mulch. Their slavering mouths are filled with long, wolf-like fangs perfect for tearing flesh from bone, and their robust, heavily-muscled frames are perfectly suited to sating the murderous desires that gleam in their blood-red eyes.

Beastmen Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Gor	Infantry	4	3	6+	-	3	60	2/-	*1
Ungor	Infantry	3/1	3	0	-	3	45	2/-	*1

Tuskgor Chariot	Chariot Mount	+1	-	-	-	-	+5	-/1	*8

Special Rules

ARMY RULES

The Thing in the Woods. Beastmen infantry do not suffer the usual -1 Command penalty when within woodland.

1. Gor/Ungor. Up to half the Gor units (rounded down) and half the Ungor units (rounded down) may be designated as Ambushers. At the start of the game, you must inform your opponent how many units will Ambush. Ambushers may form Brigades or act as single units.

Ambushers are deployed during any Command phase, not at the start of the game. To deploy ambushers, nominate a character, the ambushing units and a point in a piece of dense terrain or a point on any board edge except the enemy's. Issue an Ambush order to the point, which can be outside the character's Command range. Apply distance and enemy proximity penalties, but ignore dense terrain penalties.

If the Ambush order is successful, place one stand from the unit at the point, then deploy the rest in formation around it. Brigade units form up within a full pace move of the first stand. If the nominated point is in dense terrain it must be chosen that every stand of every unit within the group must be at least partially within the terrain. No Ambusher may deploy within 1 cm of an enemy stand.

After deployment, Ambushers may receive further orders if in the Command range, but the Ambush order counts as their first order. If the Ambush order fails, Ambushers cannot deploy that turn but can try again later in the game.

Once deployed, Ambushers operate like normal units.

Ungor have a shooting range of 15 cm.

2. Minotaurs. Minotaurs are subject to Bloodlust - they always use initiative to charge if possible and cannot be given orders instead. A unit with Bloodlust never uses initiative to evade and must pursue or advance where possible. Also, it is immune to terror, cannot be driven back by shooting and never rolls for drive backs.

3. Centigors. Centigors have a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

4. Dragon Ogres. Dragon Ogres are immune to terror.

5. Chaos Spawn. Spawn units have -1 Command penalty if not part of a brigade that includes more non-Spawn units than Spawn units. Up to two Spawn units can be included in any brigade and do not count towards the maximum size of that brigade.

Spawn units cause terror in combat - enemies suffer the -1 Combat modifier for fighting terrifying creatures. Spawn units cannot be driven back by shooting and never roll for drive backs. Spawn units must pursue or advance if victorious in combat where it is permitted to do so.

Spawn units have a shooting range of 15cm and 360° vision - the unit can draw line of sight from all edges of its stand for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

6. Dragon Ogre Shaggoth. Dragon Ogre Shaggoth must always be given a separate order. It cannot be brigaded with other troops even with other Shaggoths.

Shaggoth has a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Shaggoths have so many hits we must consider the possibility of hurting the Dragon Ogre Shaggoth and reducing its effectiveness in subsequent turns. Therefore, if a Shaggoth has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Shaggoth is badly hurt then all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Dragon Ogre Shaggoth causes terror in its enemies.

7. Doombull. A unit joined by a Doombull cause terror. Also, Gors, Ungors and Bestigors joined by a Doombull will become subject to Bloodlust in the same way as Minotaur units, until the end of the following Beastmen Command phase.

8. Tuskgor Chariot. Beastlord or Wargors can ride a Tuskgor Chariot. A character riding a chariot adds +1 to his Attacks.

Beastmen Spells

TRAITOR KIN

4+ to cast.....Range 30cm

The Shaman dominates the beasts used by the enemy, turning them on their masters.

This spell can be cast on any enemy unit of Cavalry, Chariots or Monsters within range regardless of whether the Shaman can see it or not. The spell takes effect until the end of the opposing player's next turn. Whilst the spell lasts the unit cannot use it's Initiative. Any order given to the unit, or to any brigade of which the unit is a part, suffers a -1 Command penalty.

HUNTING FOR GORE

5+ to cast.....Range 30cm

The Shaman's magic power arouses in the herd an uncontrollable desire to tear asunder any enemy and feast on their bloody remains. Rows of wild warriors charge headlong into their foes.

The spell can be cast on an unengaged friendly unit within range regardless of whether the Shaman can see it or not. The spell affects only a single unit, never a brigade. The unit can be moved just as if it had received an order in the Command phase. Character stands that have joined the unit will not move with it - they remain where they are.

CHAOS BOLT

5+ to cast.....Range 30cm

The dark power of Chaos pulses through the Shaman. A foul incantation flows from his mouth which calls down a mighty lightning bolt from the heavens above that strikes the enemy.

This spell can be cast on an enemy unit. The Shaman must be able to see his target to use this spell. The spell cannot be directed at a unit engaged in combat. The Chaos Bolt is treated like three ordinary shooting attacks except that armour has no effect (all targets count as having no armour). A unit can be driven back by a Chaos Bolt as with ordinary shooting.

POWER OF HERD

6+ to cast.....Range 30cm

The Beastman Herd rise on the Shaman's command. Emboldened by his fervour they charge at the enemy with unbridled fury.

This spell can be cast on all Gor, Ungor and Centigor units engaged in close combat and within range regardless of whether the Shaman can see them or not. When the spell is successfully cast, each affected unit receives additional +1 Attack per stand (including character stands) for the duration of its first following combat engagement. Additional Attack bonus does not apply when these units advance into next enemies.

Norse

The northern regions of the Old World suffer from extremes of climate and geography unlike anywhere else. The dense dark forests, high barren mountains, icy seas and long winter nights conspire to make life here both hard and short. This cruel land known as Norsca is a home to the Norsemen - a race of men that are as fierce, brutal and unforgiving as the landscape itself.

Because little grows upon the rocky soil of the North the Norsemen have traditionally turned to the sea for their livelihood. Their Kingships and Longships set out for the shores of Albion, the coasts of the Old World and even further afield bringing warriors to pillage and extort what they require.

Occasionally they will trade with other races or hire themselves out as mercenaries in return for goods but most of the time they will simply fight to get what they want. It is said that the Norsemen love war-song and ale but most of all they love war.

Old Worlders tell horrifying tales of these berserk warriors from over the Sea of Claws looting and burning from their dragon-headed vessels and ravaging the northern coasts of The Empire and Kislev.

The Norsemen are known as excellent sailors and fearless warriors given to great voyages and adventures; the most wayward of the Norse raiders have sailed as far as Ulthuan and The Southlands bringing home tales of strange lands, immeasurable wealth and wild creatures.

The Norsemen are famously fond of their ale, so much so that they've been known to wage war to obtain a decent stock for the winter. However, some Norsemen whenever they have more than the slightest drop of Mead go into a berserk frenzy, where they feel no pain and fear nothing. A bit annoying in the Mead Hall, but very useful on the battlefield.

Norse Army Selector

TROOP	Type	Attacks	Hits	Armour	Command	Unit size	Points per unit	Min/max	Special
Bondsmen	Infantry	3	3	5+	-	3	60	2/-	-
Huscarls	Infantry	4	3	4+	-	3	110	1/4	-
Huntsmen	Infantry	3/1	3	0	-	3	55	-/-	-

Horn of Resounding	Chariot Mount	+1	-	-	-	-	+20	-/1	*7

Special Rules

1. Berserkers. Such is the eagerness to get into combat that a unit of Berserkers will always use its initiative to charge an enemy if possible and can't be given orders instead. They'll never use their initiative to evade. They can't be driven back by shooting and do not roll for drive backs. If victorious in combat, they must pursue or advance where possible. Berserkers are unaffected by enemies that cause terror in combat, so they do not suffer the usual -1 Attack modifier.

2.Ulfwerener. Unlike usual infantry troops, the Ulfwerener are based facing the short edge in the same way as cavalry. In addition they receive an additional +1 Attack modifier when they charge an enemy in the open in the same way as monsters and chariots and have an ability to pursue cavalry and chariots troop types. The Ulfwerener stands can never support or be supported at all. Because of their rather bestial nature, only characters with the Were Kin Character upgrade may join units of Ulfwerener. Ulfwerener units cannot take any magic items.

3. Storm Giant. Giants must always be given a separate order. They cannot be brigaded with other troops, although several Giants can be brigaded together if you so wish. If you attempt to give an order to a Giant and fail then you must take a test to see what it does. Ignore potential blunders - these are taken into account by the following rules. Roll a dice and consult the Giant Goes Wild chart. Where Giants are brigaded together roll for each separately.

Giants have a great many hits, 8 in fact, which are almost impossible to inflict during even a fairly lengthy combat engagement. Because Giants have so many hits we must consider the possibility of hurting the Giant and reducing its effectiveness in subsequent turns. Therefore, if a Giant has accumulated 5-7 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Giant is badly hurt all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 4 Hits and 4 Attacks). A Giant causes terror in its enemies.

4. War Mammoth. As the Mammoth is so gargantuan, it uses a 40 x 60mm base, with the short edge being the front. It causes terror and may attack troops on ramparts with its trunk in the same manner as a Giant. Alternatively, it may elect to batter a wall section or gateway with its tusks in the same manner as a battering ram.

One last option available in a siege is that if a Norse War Mammoth is in base contact with a wall section, then one Norse infantry unit may assault that wall section via the Mammoth. Climbing up ladders and ropes at the rear of the Mammoth and using boarding ramps and the like to assault the fortress walls. This is not quite as effective as assaulting from a siege tower, so the enemy being assaulted only counts as defended rather than in the open, but is much better than counting it as fortified. If a unit assaults in this manner, then the War Mammoth may not attack with its trunk or batter the walls; as such action would result in attacking your own troops or bringing a wall section down from under them, not a good idea, even for the Norse troops.

If a War Mammoth has accumulated 6-9 hits by the end of the Shooting phase or Combat phase and is no longer engaged in combat it is deemed to have been badly hurt. Once a Mammoth is badly hurt then all accumulated hits are discounted and its maximum Hits value and Attacks are halved for the rest of the battle (to 5 Hits and 4 Attacks).

5. Valkyries. Valkyries can fly. Valkyries will always use their initiative to charge an enemy if possible and cannot be given orders instead. They will never use their initiative to evade. Valkyries are unaffected by enemy that cause terror in combat and they don't suffer the usual -1 Attack modifier.

6. Were Kin. The Were Kin special mount option may be taken by any character in Norse army. It is not actually a mount as such, more an upgrade. A unit that is joined by the character with the Were Kin upgrade causes terror in its enemies. No terrain restriction apply for Were Kin - just treat the character as having +1 extra Attack and causing terror.

7. Horn of Resounding. A single Shaman in the army may be given this chariot upgrade granting the Shaman standard +1 Attack. Once per battle, the Horn can be used by the Shaman to inspire the units around him to fight harder. If the horn is used the Saman may add +1 to all of his Command checks for that single turn only.

Giant Goes Wild Chart

D6 ***Oh no! What's he doing now!***

1. The Giant will neither move nor fight this turn but simply stands rooted to the spot looking dopey.
2. Move the Giant directly towards the nearest table edge. If he moves into another unit he will charge it regardless of which side it is on. If victorious in combat the Giant will hold his ground.
3. The Giant throws an object at the closest visible unit (friend or foe) within 5xD6 cm, inflicting 3 Attacks. If the target is in combat, the attacks contribute to the combat result; otherwise, resolve them in the Shooting phase.
4. The Giant moves straight forward at full pace in the direction he is facing in. If he reaches an enemy unit he will charge. If he reaches a friendly unit he will walk straight through and out the other side if there is room and he has sufficient move. If he reaches a friendly unit and does not have sufficient move or enough room to walk all the way through then he halts on contact. A friendly unit that is walked through or contacted in this way instantly becomes confused as a result.
5. The Giant moves towards the nearest enemy unit that he can see as fast as he can. If he reaches the foe he will charge. If friends are in the way he will walk through them causing confusion as described above. If there is no visible enemy the Giant does nothing this Command phase.
6. The Giant gives a mighty bellow and rushes straight at the nearest enemy unit that he can see. Move the Giant at double his normal full pace move. If he reaches an enemy unit, he charges it and fights by jumping up and down on the foe, furiously doubling his Attacks value in the first round of combat. If there is no visible enemy the Giant does nothing this Command phase.

Norse Spells

ASPECT OF WULFEN

4+ to cast.....Range 30cm

The Shaman turns the friendly unit into an illusive pack of monstrous creatures instilling the fear in a hearts of enemies.

This spell can only be cast on any friendly unit within range regardless of whether the Shaman can see it or not. The unit counts as causing terror for the duration of the Combat phase.

THUNDER OF FO'WOR

5+ to cast.....Range 30cm

Lightning shoots from the Shaman's outstretched arm burning all in its path.

Draw an imaginary line 30cm long from the Shaman's stand in any direction you wish. The line will pass through any intervening units but not beyond terrain that would normally stop a missile shot, e.g. over the crest of a hill, more than 2cm of woodland, and so forth.

Each unit under the line takes three shooting attacks worked out in the usual way. Note that this spell can easily affect several units and will affect all units that fall beneath the line (including your own). Unengaged units can be driven back by a Thunder of Fo'Wor as with ordinary shooting (even including friendly units). Engaged units cannot be driven back by the Thunder of Fo'Wor but carry over any hits scored into the first round of combat; any hits scored count as having been struck in the combat itself.

EYE OF THE RAVEN

5+ to cast.....Range N/A

The Shaman sacrifices a sacred Raven over a mystical flame. Ingesting the ash that is quickly formed, giving him visions

The Norse player may re-roll a single D6 at any time during the rest of his turn, through his opponents turn or in his following turn up to the end of his next Command phase when the effect of the spell ends if the re-roll has not already been used. The result of the re-roll cannot be changed in any way or re-rolled again, for example with an Orb of Majesty, Banner of Fortune or through other means. Likewise the re-roll from this spell cannot be used to re-roll any dice that another re-roll has already been used on. Nor can the re-roll be used in the case of a blunder of a command roll, not even mystical foresight can help avert such mishaps, but it can mitigate the effects, so can be used to re-roll the dice roll on the blunder chart. For example if the Norse player rolled for a command needing a roll of a seven and rolled a five and a three, he could re-roll the dice that came up as a five, hopefully rolling a four or less making it a successful command. Only one Eye of the Raven spell may be in effect per turn.

SPITE OF LOW'KEY

5+ to cast.....Range 30cm

The Shaman makes a weird enchantment calling the gods to curse the enemy with bad luck and failure.

All enemy characters within 30cm of the spell caster that roll a double have those orders count as blunders. This works on all results, from a double one, to a double five. As a result all doubles rolled not only blunder, but as with all normal blunders, it counts as a failed order. The only exception is the enemy general, as he cannot blunder. The spell lasts until the end of enemy Command phase.

Cathay

Located far to the east of the Old World, the Grand Empire of Cathay is populous, wealthy, and technologically advanced in comparison to many of its neighbours. Indeed, it is the largest and probably the most secure of the realms of men. Cathay's people live mostly within highly developed agricultural systems along the great river valleys. The prosperous economy sustains large cities which, like the empire's northern border, are protected by thick walls and strong garrisons. The misty mountainous regions are less densely populated, and their forests are home to many magical creatures, while on the western border the Warpstone Desert is an inhospitable territory for both friends and foes. Cathay maintains some long-distance trade routes and cordial diplomatic relations with other parts of the world, but merchants' ships and caravans must brave dangerous journeys to acquire luxury items from the empire.

Ruled by the immortal Dragon Emperor and his shape-shifting offspring, Cathay's society is extremely hierarchical. Strong administrative structures exist across all provinces, although rivalries do develop between their governors. After many years of rigorous education and training, members the upper classes join the vast bureaucracy to become soldiers, administrators, and sages. Long careers are then dedicated to fulfilling the emperor's wishes. Furthermore, sorcerers harness complex astromancy and manifold lores. These usually seek to generate harmony, but in times of strife they can also be used to disrupt the empire's enemies and shield its defenders. Additionally, at moments of the empire's greatest peril, the Terracotta Warriors can be summoned magically from their underground resting places to provide a silent and stoic bulwark against which even the forces of Chaos have broken.

Regular taxation upon the thriving economy, augmented by the imperial gold mines, provide great riches which the governing elite have channelled into magnificent architectural or engineering projects. Much of this wealth has also been used to fund research that has pushed the boundaries of human technological achievement. For example, the secret of gunpowder has been known for many centuries and, in addition to helping miners and providing firework displays during festivals, the empire's handgun and rocket workshops provide Cathay's armies with a military advantage.

Perennial wars have been fought along all borders, but Chaos incursions and Hobgoblin raiders have been the most challenging, while the Dark Elves have also threatened the empire's coasts and its maritime trade. Happily for the emperor, a strong cadre of professional generals and admirals have honed their defensive tactics over many centuries and, thus far, all invasions have been defeated.

Cathay's armies have relied primarily upon the iron discipline of their conscript troops. Fighting heroically, outnumbered forces will seek to wear down their enemy in order to buy time for overwhelming reinforcements to arrive from neighbouring provinces. The empire has also been successful in recruiting barbarian (Hu) tribes as mercenaries. This has often turned a potential invaders' strength – especially in cavalry – against them. Thus even Ogres, Orcs, and Hobgoblins have found themselves carrying Cathay weapons in exchange for decent pay and regular meals.

Special Rules

ARMY RULES

Structure and Discipline: To reflect their empire's high-quality military organisation and command arrangements, Cathay commanders may issue orders to brigades of up to 6 units instead of the usual 4. However, those 6-unit brigades must include at least 2 units of Bannermen. The 6-unit brigade cannot include chariots, cavalry, or Terracotta Warriors.

1. Handguns. Any or all of the army's Crossbows units can be replaced by Handguns while still counting for the Crossbow min/max value. Their projectiles can pierce armour far easier than a crossbow bolt. Therefore, units hit by Handguns get a -1 penalty for their armour rolls.

2. Terracotta Warriors. These warriors are considered Undead, so cannot act on initiative, are unaffected by terror or enemy within 20cm, and cannot be confused. They can only brigade with themselves and give/receive support only to/from each other. They can only be ordered by Sorcerers, who gain +1 command when doing so.

3. Hu Cavalry. They have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

4. Rocket Launcher. The Rocket Launcher is treated as a Stone Thrower as described in the Rulebook (p.75), except it shoots 1D6 times per phase and any hits inflicted have an armour save with a minus 1 modifier (as for handguns). If the roll for the number of shots comes up a 1, the Rocket Launcher has misfired, and you must roll another D6 against the Rocket Launcher Misfire Chart.

5. Triple Bows. Triple Bows are Bolt Throwers as described in the main rulebook (p.75).

6. Celestial Dragon. One Sorcerer per army can be upgraded to become a dragon which flies, gives orders, casts spells, and causes terror. The dragon cannot give orders to Terracotta Warriors.

7. Tiger. Tigers cannot be ridden by Sorcerers.

8. Qilin. Only a Sorcerer can ride a Qilin. Once per battle the Qilin's magical power adds +1 to the dice roll when casting a spell. The player must announce that they are using the Qilin's magic before rolling to see if the spell works.

Rocket Launcher Misfire Chart

D6	*Result*
1	**KABOOM!** The Rocket Launcher explodes in spectacular manner.
2-3	**Dud.** The rocket does only one attack.
4-5	**Whoosh!** The rocket overshoots and does D6 attacks on the first unit in the line of fire past the original target, regardless of range. If the result is 1, don't roll for the misfire again. If the target is engaged in combat, the hits are carried over into Combat phase. If no target is behind the victim the rocket leaves the battlefield without causing any damage.
6	**Big badaboom!** The rocket does 2D6 attacks instead of the normal 1D6.

Cathay Spells

GLORY OF CATHAY

4+ to cast.....Range 30cm

Channelling powerful lores, the sorcerer gifts remarkable accuracy and reloading dexterity to the empire's defenders. Their opponents are thereby subjected to ferocious shooting.

This spell can be cast upon a friendly unit of unengaged missile-armed infantry or chariots within range. The Sorcerer does not need to be able to see the friendly unit nor their intended target. When the spell is cast on a unit, it can shoot twice that turn instead of once. If it has already shot that turn it can therefore shoot again immediately. If it has yet to shoot it can shoot twice. When a unit shoots twice due to Glory of Cathay the second shot is always at a minus 1 penalty and will therefore hit on a 5+.

LION DOGS ATTACK

4+ to cast.....Range 30cm

Complex astromancy allows the sorcerer to surround enemies with bright and disorientating illusions in the form of terrible beasts.

This spell can be cast on any enemy unit within range regardless of whether the Sorcerer can see it or not. The spell takes effect until the end of the opposing player's next turn. Whilst the spell lasts the unit cannot charge and if engaged in combat will not pursue or advance. Even units that are otherwise obliged to charge, pursue, or advance will not do so if affected by this spell.

FEROCITY OF TIGERS

5+ to cast.....Range 30cm

Opening a portal to the past, the sorcerer imbues Cathay's troops with the spirit and stoicism of their ancestors. Filled with an overwhelming resolve to protect the emperor, they surge forward to slay his foes.

This spell can be cast on a friendly unit engaged in combat. The spell can be cast regardless of whether the Sorcerer can see the target or not. The spell lasts for the duration of the following combat phase. Every stand in the unit adds +1 to its attacks value. The unit also becomes immune to terror.

TRANQUILITY OF HEAVEN

5+ to cast.....Range 15cm

Bestilling the sound and fury of battle, the sorcerer magically deadens the fears of wavering soldiers, thus allowing the commands of their officers to be faithfully obeyed.

All friendly units within 15cm of Sorcerer count as immune to terror until the end of the enemy player's next turn.

Nippon

Far to the east of the Old World, even farther east than the fabled lands of Cathay, lie the islands of the Nipponese archipelago. Inhabited by a sophisticated but stoic nation of humans, where warfare is common and honour is everything.

Nipponese society is highly structured and is based on feudal rule in a strict hierarchy from the Emperor, a semi-divine being who is rarely seen in public, down to the lowest peasants who tend the fields. There are many similarities between Nippon and Brettonian society, though Daimyo – the Nippon Lords – are even harsher and uncaring towards anyone they consider to be their inferior than their Bretonnian counterparts. The strongest Daimyo vie for the position of Shogun – supreme military leader of Nippon, answerable only to the Emperor himself.

Each Daimyo maintains a standing army to defend his lands from neighbouring warlords and pirate raids. The army is mainly composed of Samurai, noble warriors who devote their lives to training in the art of war. The Samurai are supported by Ashigaru, soldiers drawn from his common subjects and given basic training and weaponry. More significant threats require several Daimyo to contribute forces to the Emperor's army, under the command of the Shogun. Sometimes these armies include Mikata – warriors whom a Daimyo may employ outside of their retinue to bolster its strength. These warriors represent the Ronin, Temple Monks, and Junior Samurai. Armies sometimes include Ninja, clans of stealthy warriors, who specialise in all forms of espionage, deception, and covert warfare.

The Nipponese islands are located in the Northern hemisphere of the world, on the same latitude as Ulthuan but the opposite longitude. Many of the magical lines of power which were harnessed into the Great Vortex of the High Elves connect through the planet to Nippon, drawing magical energy away. Thus, the Winds of Magic are relatively thin in this part of the world, so wizards are few.

The Nipponese people are known as highly stoic people from whom expressions of emotion are rare. However, this repressed spiritual energy builds up until it manifests itself in a physical form. Many Nipponese mythical creatures are a natural byproduct of unseen human hopes and fears which can manifest in physical form when emotions are strong or prolonged. Smaller creatures are often a nuisance in daily life and are exorcised before they become too troublesome by a Shugenja, who sometimes draws energy from a magical shrine to assist him in the process.

Larger creatures tend to congregate near temples, drawn by the concentration of emotion and energy at these holy sites. In times of war, they become more common and the Shugenja of the temple can marshal them into useful fighting forces but their control over them is limited and they can disappear back into the magical ether from which they came. The commonest forms are Oni (ogres) who are powerful fighters. If the Shugenja coalesces the energies together onto a physical object such as the Komainu (lion-dog statues which guard temple entrances), the object becomes a living creature. Larger creatures can be created if the temple's Abbott coalesces the energies into larger objects. These colourful creatures bolster the Nipponese army against significant threats facing the whole nation. However the magical energy used to bind them can prove unstable under battlefield conditions.

Shrine	Special Bonus	-	-	-	-	-	+30	1	*11

Special Rules

ARMY RULES

Honour and Duty: A Nipponese army mustered for war is a force unlike any other. Values of honour and duty are so ingrained in the culture of Nipponese society that they will stick around in a fight when many others would leave in disgrace. To represent this, a Nippon army adds 1 to the number of units that must be lost before the army will withdraw. For example – an army of 16 units will normally withdraw once eight units are destroyed – with Nippon, the army will not withdraw until nine units are destroyed.

1. Ashigaru Teppo. These units use black powder handguns. Their projectiles can pierce armour far easier than an arrow. Therefore, units hit by Ashigaru Teppo get a -1 penalty for their armour rolls.

2.Bushido. Samurai live their lives by a strict code of honour and ideals. The troops do not like losing face, so they cannot use Initiative to evade and they roll 1 less dice for drive back.

3. Mikata. A unit of Mikata will always use its initiative to charge an enemy if possible and cannot be given orders instead. They will never use their initiative to evade. They can't be driven back by shooting and do not roll for drive backs. If victorious in combat, they must pursue or advance where possible. Mikata are unaffected by enemies that cause terror in combat, so they do not suffer the usual -1 Attack modifier.

4. Ninja. Ninja have a shooting range of 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

Ninja do not have to be deployed before the game if the player does not wish to do so. Instead, individual units can be infiltrated onto the battlefield once the game has begun. To infiltrate a unit, the Nippon player nominates the point where he wants the Ninja to appear and issues an 'infiltration' order from any character. The character does not have to be within his normal command range to issue an infiltration order - the character's command range is considered to extend over the entire tabletop when issuing an infiltration order. Treat the order as issued to the nominated point and apply any modifiers for distance and proximity of enemy but ignore penalties for dense terrain. The nominated point must lie either on the table within dense terrain or on any base edge other than the enemy player's own table edge. If successful, place one stand on the nominated spot and arrange the rest of the unit into formation around it. The infiltrated unit cannot be placed so that it touches an enemy unit. Once deployed, orders can be given to the unit by the same character that gave the infiltration order if he is within his normal command range, the infiltrating unit is considered to have used its first order to deploy. If the infiltration order is failed the unit is not deployed and cannot infiltrate that turn, it can attempt to infiltrate in a subsequent turn at the same or a different place.

Ninjas ignore penalties for Dense Terrain. Ninja count as Gutter Runners when the Scout Rules are applied.

5. Temple Daemons. Temple Daemons are immune to terror and cannot be given magic items. They also suffer from Daemonic Instability. At the start of the Nippon player's own Command phase, before making any initiatives moves, all friendly Daemon units that have taken at least 1 casualty (i.e. lost at least 1 stand out of 3) must make a 'Daemonic Instability' test. Roll a D6. If the unit has lost 2 stands (i.e. has only 1 stand remaining from 3) deduct 1 from the roll.

0-1	One stand is destroyed – the daemons fade away and are absorbed back into the heaven from which they came. Remove one stand from play. If a character is with the unit and the last stand is removed the character is destroyed too.
2-3	The unit becomes confused - if not already confused the stand becomes confused as it is torn between this world and the next.
4-5	No effect – unless the unit is confused in which case it ceases to be confused as it is favoured with the invigorating power of the Temple.
6	The unit regains one stand. The regained stand is placed in formation with the rest of the unit. If it is impossible to position the stand in formation with its unit then the stand cannot be added.

6. Komainu. If the unit charges against an enemy in the open it receives an additional +1 Attack modifier in the same way as chariots and monsters. Komainu are affected by Instability and Immune to Terror like other Temple Daemons.

7. Tengu. Tengu can fly. They are an exception to the normal conventions for basing monsters in that they face the long edge of the stand in the same way as infantry rather than the short edge as most other monsters. Tengu are affected by Instability and Immune to Terror like other Temple Daemons.

8. Shogun. If a Nippon Hero (Daimyo or Shugenja, not the Shogun) rolls a double 6 when issuing orders, the player must roll on the Blunder table with a -1 penalty on the result. If the table indicates a "You must be crazy" result, the -1 Command penalty must be applied to a Samurai or Samurai cavalry unit if a unit of these troops was being ordered or was in the brigade being ordered. If there is more than one of these units present, the Nippon player may choose which is affected.

9. Shugenja. If an enemy Wizard within 50cm of the Shugenja casts a spell the Shugenja can attempt to anti-magic it. Note that it does not matter what the spell is or where it is cast, the Shugenja can 'anti-magic' it so long as the caster is within 50cm.

To determine if this works, roll a D6 - on a score of 4, 5 or 6 the Shugenja has succeeded and the spell doesn't work, it is dispelled by the Shugenja's defiant efforts. If he fails, then the Shugenja's efforts come to nothing and the spell works as normal. A Shugenja can attempt to anti-magic any number of spells in a turn, but only one attempt can be made to anti-magic any individual spell - even if the army includes more than one Shugenja and several are in range of the enemy Wizard.

The Shugenja adds +1 to any rolls on the Daemonic Instability table if he is within 20cm of the affected Daemon unit. This benefit only applies when rolling on the Daemonic Instability table for friendly units.

Shugenjas may take a Dispel scroll.

10. Tatsu. Generals and Heroes can ride Tatsu, a kind of dragon native to Nippon. Tatsu can fly and cause terror in their enemies. An extra +2 Attacks are added to those of its rider.

11. Shrine. The army can only include a single Shrine and it is incorporated onto the stand of a Shugenja.

If a Shugenja stand includes the Shrine, once per battle he can add +1 to his dice roll when he attempts to dispel enemy magic spells using the Shrine anti-magic ability (see Shugenja).

In addition, the Shugenja can invoke the gods using the Shrine during the Shooting phase of his own turn. The shrine's invocation fills the Nippon army with even greater resolve! Roll a D6. On the score of a 4, 5 or 6 all Nippon units within 20cm of the Shugenja are unaffected by Terror until the start of the Nippon player's next turn. On a roll of less than 4 there is no effect.

Regiments of Renown

The Regiments of Renown is an army lists expansion designed to add a little extra flavour and expand the possibilites of standard army lists. It presents mercenary units that can be added to (hired by) your existing armies. Their rules are described on the following pages. Both players have to agree on using Regiments of Renown before the battle.

Mercenaries are a common sight on the battlefields of the Warhammer world. Not all of them are human although most are. Amongst the Dogs of War, freebooters from the frozen wastes of Norsca rub shoulders with Corsairs from Araby and mysterious warrior monks from the east.

Sellswords are assured of ready and profitable employment. The demand for soldiery in the Warhammer world has led to the establishment of numerous mercenary bands – soldiers who sold their services to whichever general happened to require them. Although some generals are willing to hire mercenary troops on a more or less permanent basis, most mercenaries are hired only when needed. Besides, the fees charged by the very best fighters are far too high for ordinary generals to pay on a long-term basis. The most successful mercenary captains become rich and influential in their own right, and their services are soon in demand throughout the Old World and beyond.

There are many mercenaries around the Old World. They mostly recruit from outlaws, pirates and renegades as well as simple adventurers looking for a fight, wealth and fame. They gather in wandering bands, companies and even entire armies around a charismatic and usually infamous leader and look for an opportunity to fight... especially to fight for proper payment. They call themselves – The Dogs of War.

Around them some are more recognizable than others, mostly by the name of their leader. In the land of Tilea – traditional home of mercenaries – the greatest formations have become Regiments of Renown. They are the most skilled, accomplished and noble mercenaries affordable fonly by the wealthiest leaders such as kings, princes and mighty warlords. Sometimes they may be hired even by a Dogs of War leader, of course if he can pay enough. In the restless Old World they usually have much work on their hands.

Mercenaries commonly form into itinerant bands under the leadership of a charismatic or especially brutal leader. The most famous of these bands are, more often than not, known by the name of their leader, such as Verthhold Brekt's Halberdiers, Hagar Whitefang's Were-Marauders, Bradan Swiftleaf's Glade Riders, Khalag's Sure Shots, and the renowned Golgfag's Ogres.

Regiments of Renown Army Selector

Gotrek and Felix	Hero	+2	-	-	8	1	100	-/1	-
The Witch Hunters	Hero	+1	-	-	8	1	90	-/1	-

Special Rules

ARMY RULES

For hire. Mercenary units are very popular in the Old World. Each army list may add (hire) a maximum 1 Regiments of Renown unit for each full 1000 points of army value following the Allies Table. Hired units count towards the maximum allowance per 1000 points of the unit type indicated in the Hiring Regiments of Renown section.

Led by the Hero. To represent the presence of a strong leader, Regiments of Renown units (including artillery and heroes) type cost 10 points more than their equivalents in the standard armies (extra point value is included in Regiments of Renown unit profile). They also receive a +1 bonus to the combat Attack value of one stand. Note that this gives +1 Attack in total, not +1 to each stand! This extra attack is not included in the Army Selector profile.

No magic item may be given to hired Regiments of Renown units nor heroes.

Independent and Exclusive. Mercenaries recruit from many races and lands of the Old World. Living in the Empire 'humanized' them a lot, but they still stay individual. Therefore, they stay independent to any army and racial special rules - neither bonuses nor drawbacks.

Hired units can be ordered and brigaded without penalties, just like the other units in your army. In case of a blunder make separate Blunder roll for Regiments of Renown units if they are brigaded with other troops. That means one roll for your army list troops and one roll for Regiments of Renown troops.

They may not be targeted by friendly Wizard's spells and do not receive any benefit from friendly spells or effects including area spells and effects.

Additionally your army may contain only one of each unique listed unit. If your opponent hired the same regiment, just roll a dice and decide who got the 'authentic' one and who the 'impersonated' one. This roll is just for fun, without any impact in the game.

UNIT RULES

1. Pikemen. The pike is the traditional weapon of the mercenaries of Tilea. Twice as long as a spear and even longer than a cavalryman's lance this is truly fearsome although rather unwieldy weapon. Pikemen are based facing the short edge of the base in the same way as Cavalry, rather than the long edge like other Infantry. Pikemen can not enter dense terrain (even partially). They still may be in defended position on higher ground or behind low obstacle as usual, but can only claim defended status when fighting to the front. An enemy does not receive charge bonuses when charging Pikemen in the front, nor does Pikemen receive any charge bonus themselves. A Pikemen stand cannot support or be supported by other infantry - only by other Pikemen stands. In all other respects they count as infantry (movement/pursuit etc.).

2. Dense Terrain. Lumpin Croop's Fighting Cocks are well used to sneaking about in woods and bushes. No command penalty is applied to this unit on account of dense terrain.

3. Throwing weapons. The unit has a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

4. Undead. The Cursed Company is undead, and as such the following rules apply to them:

They never act on initiative. The unit only moves in the Command phase if given orders.

They are unaffected by the -1 Command penalty for enemy within 20cm. They are unaffected by the -1 Combat penalty for fighting terrifying troops.

They are unaffected by the Confusion rule - they cannot become confused for any reason.

5. Repeating crossbows. Mengil Manhide's Manflayers are equipped with repeating crossbows. They may shoot once at ranges up to 30cm and twice at ranges up to 15cm. A unit of three stands would therefore shoot 6 Attacks at a target within 15cm and 3 Attacks at a target at greater ranges. They may shoot at enemies that charge them - in which case they shoot 1 Attack per stand regardless of range.

6. Pistols. Long Drong's Slayer Pirates carry pistols... loads of pistols! They have a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

7. Ogres. Ogres flock to mercenaries for the chance of a good fight and as much as they can eat. These creatures are notoriously fond of fresh human meat, although they will eat practically anything that was once alive (or still is). To represent this, if an Ogre unit can use its initiative to charge an enemy unit of humans at the start of the Command phase then it must do so (not Dwarfs, Elves etc.). This happens automatically.

8. Light Cavalry. Light cavalry formations have a great use among the mercenaries. They are experts at outmaneuvering an enemy and harrying his flanks. Light cavalry has a shooting range of only 15cm and 360° vision - stands in this unit can draw line of sight from all edges for the purpose of evading and shooting, including shooting at charging enemies. Note that this unit still needs Line of Sight from its front edge to charge an enemy.

9. Birdmen. Only half-mad nutters like Tileans would try to fly! The Birdmen wear insane contraptions of light wood covered in canvas that are shaped like wings and allow them to glide on the air currents. These 'wings' allow the Birdmen to fly and still use their crossbows as normal. Because they are awkward flyers, they can be pursued by any type of enemy troops. Birdmen are based facing the long edge of the base in the same way as other infantry.

10. Galloper Guns. These are lighter artillery than Dwarf or Empire cannons; due to this they are shorter ranged, but can make up for their lighter shot by producing a higher volume of fire.

Galloper Guns move 20cm. All the normal rules for artillery applies as well as cannon's rules for shooting (bounce through, no saves and reduction of cover values). Because they are light guns they have a range of only 40cm. They still may shoot at the charging enemy by firing 'grapeshot' as normal.

11. Dragons. Asarnil rides a Dragon. The Dragon can fly increasing its rider's move to 100cm. An extra +3 Attacks are added (included in Asarnil's profile). The Dragon can breath fire if the character has joined a unit that isn't engaged in combat. The fire breath has a range of 20cm and can be directed against one target as for normal shooting and has 3 Attacks that are worked out in the usual way. Additionally Asarnil causes terror in its enemies.

\+ Available for this army - see Hiring Regiments of Renown section for details.
/ Not available for this army.

Hiring Regiments of Renown

Each Regiment of Renown unit counts towards the maximum allowance per 1000 points of the unit type indicated in this section. Additionally there are some restrictions in hiring specified units, i.e. Dwarfs would never fight together with Greenskins or Elves or hiring The Cursed Company together with The Witchhunters is not a good idea either.

Examples:

- The player hiring the Alcatani Fellowship in a Dwarf army may field up to one Ranger unit instead of up to two in a 1000p value army. Rangers are highest point value limited infantry type unit in the Dwarf army.

- The player hiring the Marksmen of Miragliano in a Chaos army does not restrict any of his units.

- The player hiring Braganza's Besiegers in a Tomb Kings army may field up to two monster types (chosen by the player) instead of the three available in the army list for every 1000p.

- The player hiring Voland's Venators in a High Elf army may field up to two Chariot units instead of three in a 1000p value army or five chariots instead of six in a 2000p value army. Chariots are the highest point value limited units of cavalry or chariot type in the High Elf army.

- The player hiring Asarnil the Dragonlord in a 1000p Araby army can't field a Djinn monster mount as the limit is one per 1000p. In 2000p army player may field one Djinn instead of two.

Pirazzo's Lost Legion. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army. Lost Legion can not be hired together with Tichi-Huichi's Raiders.

Alcatani Fellowship. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Marksmen of Miragliano. Count as one highest point value limited shooting infantry type unit. If not available, hiring does not restrict taking other units.

Ricco's Republican Guard. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Leopold's Leopard Company. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Braganza's Besiegers. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Lumpin Croop's Fighting Cocks. Count as one highest point value limited shooting infantry type unit. If not available, hiring does not restrict taking other units.

Vespero's Vendetta. Hiring does not restrict taking other units.

Anakonda's Amazons. Hiring does not restrict taking other units.

The Cursed Company. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. The Cursed Company can not be hired together with The Witch Hunters.

Mengil Manhide's Manflayers. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army. Manflayers can not be hired together with Arsanil the Dragonlord, Long Drong's Slayer Pirates, Gotrek and Felix in any army nor Dwarfs in Dogs of War army.

Beorg Bearstruck and the Bearmen of Urslo. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Ruglud's Armoured Orcs. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army. Orcs can not be hired together with Long Drong's Slayer Pirates, Gotrek and Felix in any army nor Dwarfs in Dogs of War army.

Long Drong's Slayer Pirates. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army. Pirates can not be hired together with Ruglud's Armoured Orcs, Oglah Khan's Wolfboyz, Mengil Manhide's Manflyers nor Arsanil the Dragonlord.

Bronzino's Galloper Guns. Count as one highest point value artillery type unit.

Golgfag's Mercenary Ogres. Count as one highest point value limited infantry type unit. If not available, hiring does not restrict taking other units. Count as 1 of any monster type in Tomb Kings army.

Voland's Venators. Count as one highest point value limited cavalry or chariot unit type. Count as one Ranger unit in Dwarf army. Count as one Gutter Runners unit in Skaven army.

The Birdmen of Catrazza. Count as one flying unit with size value 3 stands.

Al Muktar's Desert Dogs. Count as one highest point value limited cavalry or chariot unit type. Count as one Ranger unit in Dwarf army. Count as one Gutter Runners unit in Skaven army.

Oglah Khan's Wolfboyz. Count as one highest point value limited cavalry or chariot unit type. Count as one Gutter Runners unit in Skaven army. Wolfboyz can not be hired together with Long Drong's Slayer Pirates, Gotrek and Felix in any army nor Dwarfs in Dogs of War army.

Asarnil the Dragonlord. Count as one any Hero type unit and one of highest point value Monstrous Mount type causing terror. Arsanil can not be hired together with Mengil Manhide's Manflyers, Long Drong's Slayer Pirates or Gotrek and Felix in any army nor Dwarfs in Dogs of War army.

Tichi-Huichi's Raiders. Count as one highest point value limited cavalry or chariot unit type. Count as one Ranger unit in Dwarf army. Raiders can not be hired together with Pirazzo's Lost Legion.

Gotrek and Felix. Count as one any Hero type unit. They can not be hired together with Ruglud's Armoured Orcs, Oglah Khan's Wolfboyz, Mengil Manhide's Manflyers nor Arsanil the Dragonlord.

The Witch Hunters. Count as one any Hero type unit. The Witch Hunters can not be hired together with The Cursed Company.

MAGIC ITEMS OVERVIEW

This is an overview of Magic Items described in detail in the main Rulebook p.77.

MAGIC STANDARDS

THE BATTLE BANNER
(superior 5 Attacks charging only). . 30 pts
(major 3 Attacks only) . . . . . 20 pts
(minor 2 Attacks only) . . . . . 15 pts
+1 Attack.

THE BANNER OF SHIELDING
(major 5+ Armour only) . . . . . 30 pts
(minor 6+ or 0 Armour only) . . . . . 20 pts
+1 Armour value.

THE BANNER OF FORTITUDE
(3 Hits only) . . . . . 30 pts
+1 Hit.

THE BANNER OF STEADFASTNESS
(superior 4+ Armour only) . . . . . 15 pts
(major 5+ Armour only) . . . . . 10 pts
(minor 6+ Armour only) . . . . . 5 pts
One shooting hit after saves is ignored.

THE BANNER OF FORTUNE
(superior 5 Attacks charging only). . 15 pts
(major 3 Attacks only) . . . . . 10 pts
(minor 2 Attacks only) . . . . . 5 pts
Once per game re-roll all the Attack dice within one roll either in the Shooting or Combat Phase.

MAGIC WEAPONS

SWORD OF DESTRUCTION . . . . . 10 pts
One enemy unit in a combat with the unit with the sword must re-roll one successful Armour roll each combat round.

SWORD OF FATE . . . . . 5 pts
+1 Attack to the unit/character in the first Combat round.

SWORD OF CLEAVING . . . . . 10 pts
Re-roll one unsuccessful Attack dice per combat round.

SWORD OF MIGHT . . . . . 10 pts
+1 Attack to the unit/character in the Combat Phase.

DEVICES OF POWER

CROWN OF COMMAND
(General only) . . . . . 70 pts
First General's command roll each turn may be against unmodified Command 10 value. If failed, the Crown is lost.

HELM OF DOMINION (General only) . . 40 pts
The General has +1 Command value (maximum 10) for duration of one Command phase.

ORB OF MAJESTY (General only) . . . . . 30 pts
The General can re-roll one failed Command roll against Command value of 8 with all usual adjustments.

RING OF MAGIC (Wizard only). . . . . 30 pts
A Wizard is able to cast one spell on a roll of 2+.

STAFF OF SPELLBINDING
(Wizard or Runesmith only) . . . . . 30 pts
If an enemy Wizard fails to cast a spell, he can be spellbound on roll of 4+. Spellbound Wizard has -1 to cast a spell. One use only.

SCEPTRE OF SOVEREIGNITY
(General only). . . . . 20 pts
A General may ignore one Blunder roll made by himself or any other characters. The blundered order counts as successful.

SCROLL OF DISPELLING
(Wizard or Runesmith only). . . . . 20 pts
A Wizard can dispel one enemy spell on a roll of 2+.

WAND OF POWER (Wizard only) . . . . . 10 pts
A Wizard can add +1 to the attempt to cast one spell.

ROD OF REPETITION (Wizard only) . . . 10 pts
If a Wizard casts a spell successfully, once per game he can immediately try to cast another spell.
